2. THE GRADUATE'S COMPETENCE MODEL

In the modern world, the key resource for the economic growth of countries is their intellectual and educational potential. In this regard, the system of training highly qualified personnel acquires strategic importance, turns into the main tool for ensuring the high competitiveness of the national economy.

The competitiveness of a modern worker is determined by his professional competence, broad social outlook, flexibility of behavior and a high level of individual activity. A developing society needs moral, enterprising people who can independently make decisions in a situation of choice, predicting their possible consequences, capable of cooperation, who are distinguished by mobility, dynamism, constructiveness, have a developed sense of responsibility for the fate of their country.

The competence-based approach is the most important methodological tool for bringing the educational system of Kazakhstan closer to foreign education systems within the framework of the Bologna process. At present, it is generally accepted that the comparability of educational levels and qualifications of graduates can be achieved by comparing the educational results and competencies they acquired during their studies..

The competence-based approach implies profound systemic transformations affecting the content, teaching, learning, assessment, links of higher education with other levels of vocational education, the introduction of the European system of transfer and accumulation of credits and the application of the European framework for higher education qualifications.
