I. EXPLANATORY NOTE

The Modular Educational program (MOPP) is compiled in accordance with:

I. Regulatory documents of the Republic of Kazakhstan

1. The Law of the Republic of Kazakhstan "On Education" dated 27.07.2007 with additions and amendments dated 21.02.19;
2. The State standard of higher and postgraduate education, approved by the Order of the Minister of Science and Higher Education of the Republic of Kazakhstan No. 2 dated July 20, 2022;
3. Rules for the organization of the educational process on credit technology of education, approved by Order of the Minister of Education and Science of the Republic of Kazakhstan No. 152 dated April 20, 2011 (as amended by Order of the Ministry of Education and Science of the Republic of Kazakhstan No. 563 dated 12.10.2018);
4. Standard rules of activity of educational organizations implementing educational programs of higher and (or) postgraduate education, approved by the Order of the Ministry of Education and Science of the Republic of Kazakhstan No. 595 dated 30.10.2018;
5. Professional standard "Teacher", approved by the Order of the Chairman of the Board of the National Chamber of Entrepreneurs of the Republic of Kazakhstan "Atameken" No. 133 dated June 8, 2017.

II. Regulatory documents of the Educational institution "Alikhan Bokeikhan University"

1. MR. Revision No. 4 of 05.10.2022 "Structure of the modular educational program";
2. Item Revision No. 4 of 23.08.22 "Regulations on the research work of undergraduates".

The modular educational program (MEP) is developed as a set and sequence of training modules for the entire period of study and is aimed at mastering the competencies necessary for the awarding of the academic degree "Master of Laws" in the educational program 7M04208 - "Actual problems of law". The DB block includes disciplines of the university component (VC), which is 20 credits; and components of choice (CV), which is 15 credits. Modules of these disciplines make it possible to form a complex of key (research), general and professional competencies acquired by a graduate.

The PD block includes disciplines of the university component (VC), which is 14 credits; and an optional component (CV), which is 35 credits. Modules of these disciplines allow you to form a complex of key and professional (developing, creative, organizational and methodological) competencies acquired by a graduate.

RWMS - 24 credits;

FSA – 12 credits.

In total, a master's student at the end of the MEP must master 120 credits (100%).

In total, 7 modules were compiled for the MEP.

To update OP 7M04208 "Actual problems of law" on March 15, 2019 at the Faculty of Law, a round table was held on the topic "Labor market: the state and ways of effective interaction", which was attended by representatives of the Prosecutor's Office of the city of Semey, internal affairs bodies, judges of the city court, etc. At the end of the work, the participants of the round table adopted a resolution with a list of new disciplines for MEPs that meet the requirements of the modern market. On the example of disciplines: "Theory and practice of the application of constitutional legislation", "Legal regulation of commercial activities in the Republic of Kazakhstan and foreign countries", "Modern policy of combating crime".

Objects of professional activity for the qualification "Master of Legal Sciences" under the educational program 7M04208 - "Actual problems of law" prepares qualified specialists who are ready to carry out scientifically grounded professional activities in jurisprudence to meet the staffing needs of law enforcement agencies, public authorities, judicial and law enforcement systems and organizations of all forms of ownership.

During the development of the modular educational program, the wishes and recommendations of social partners and potential employers were taken into account, aimed at the formation of additional professional competencies that meet the requirements of the labor market.

Recommended by the employers

1. The head of the UP G.Semey DP East Kazakhstan region Police Colonel Bazarov E.M.
2. Semey City Prosecutor Senior Adviser of Justice Aimukhan S.A.

In order to create special conditions for people with special educational needs to receive education, the graduate's competence model is supplemented with professional competencies that ensure the adaptive nature of the main educational program. To this end, courses for the formation of the ability of persons with special educational needs to successfully socialize in society and actively adapt to the labor market, taking into account the characteristics of the disease, are introduced into the catalog of courses of the additional educational program "Minor".

After successful completion of the educational program (OP) 7M04208 "Actual problems of law" Master:

ON 1 - analyzes and identifies information from various sources, makes forecasts based on the information received;

ON 2 - interprets and conducts independent planning and coordination of scientific research, characterized by academic integrity, based on modern theories and methods of analysis;

ON 3 - solves professional tasks taking into account an interdisciplinary approach;

ON 12 - analyzes and explores various legal phenomena, legal facts, legal norms and relations in the Ministry of Emergency Situations in modern geopolitical conditions.

II. THE GRADUATE'S COMPETENCE MODEL

In the modern world, the key resource for the economic growth of countries is their intellectual and educational potential. In this regard, the system of training highly qualified personnel acquires strategic importance, turns into the main tool for ensuring the high competitiveness of the national economy.

The competitiveness of a modern worker is determined by his professional competence, broad social outlook, flexibility of behavior and a high level of individual activity. A developing society needs moral, enterprising people who can independently make decisions in a situation of choice, predicting their possible consequences, capable of cooperation, who are distinguished by mobility, dynamism, constructiveness, have a developed sense of responsibility for the fate of their country.

The competence-based approach is the most important methodological tool for bringing the educational system of Kazakhstan closer to foreign education systems within the framework of the Bologna process. At present, it is generally accepted that the comparability of educational levels and qualifications of graduates can be achieved by comparing the educational results and competencies they acquired during their studies..

The competence-based approach implies profound systemic transformations affecting the content, teaching, learning, assessment, links of higher education with other levels of vocational education, the introduction of the European system of transfer and accumulation of credits and the application of the European framework for higher education qualifications.

A graduate of the educational program 7M04208 - "Actual problems of law" is awarded the academic degree "Master of Legal Sciences" is the formation of undergraduates with a high level of professional culture, including the culture of professional communication, who have a civic position, capable of formulating and solving modern scientific and practical problems, teach at universities, successfully carry out research and management activities.

1	Actual problems of law enforcement practice of criminal and criminal procedure legislation - 5 credits	Professional	<p>Brief description of the discipline: The purpose of the discipline is to master students with special scientific knowledge, which is aimed at obtaining professional competencies and skillful application of acquired applied skills in practical activities. Summary of the discipline: this academic discipline is aimed at studying the actual problems of law enforcement practice of criminal and criminal procedure legislation. The study of this course is based on the fundamental and applied foundations of scientific research, analysis of the synthesis of criminal and criminal procedure legislation. Mastering a scientific discipline will contribute to the formation of skills and competencies stated in the learning outcomes.</p> <p>Expected result: To know: in the course of studying the course, students should know the criminal law policy of the state and the concept of the development of national legislation in the field of criminal and criminal procedural law aimed at protecting society and the individual from criminal encroachment and protecting the rights and freedoms of persons involved in the sphere of criminal procedural legal relations. Be able to: analyze and synthesize criminal and criminal procedure legislation on a scientific and legal basis, and on their basis be able to highlight problematic issues of law enforcement practice of criminal proceedings and the correct qualification of a criminal offense. Skills: in the process of studying the course, the student must possess analytical thinking skills that allow him to build a critical analysis of the norms of criminal and criminal procedure law, to make an independent legally justified decision on criminal cases. Competencies: professional</p>
---	--	--------------	--

1	Pedagogical practice	Professional	<p>To know: the regulatory and legal foundations of teaching in the higher education system, ways of presenting and methods of transmitting information to students.</p> <p>Be able to: select the material characterizing the achievements of science, taking into account the specifics of the direction and orientation of training; manage the student team, taking into account the individual psychological characteristics of individuals; use modern technologies in the subject area of training scientific and pedagogical personnel.</p> <p>Own:</p> <ul style="list-style-type: none"> - methods and technologies of interpersonal communication, public speaking skills, argumentation, discussion; the main methods and means of forming the professional competence of trainees; - the basics of designing the content of educational material in educational activities.
2	Research practice	Professional	<p>To know: systematization, consolidation and expansion of theoretical knowledge and practical skills in the field of specialization and their application in solving specific scientific, technical, economic and production tasks, as well as cultural tasks.</p> <p>Be able to:</p> <ul style="list-style-type: none"> - the ability to apply regulatory legal acts, implement the norms of substantive and procedural law in professional activities; - the ability to legally correctly qualify facts and circumstances; - the ability to correctly and fully reflect the results of professional activity in legal and other documentation. <p>Own:</p> <ul style="list-style-type: none"> - possess the skills of preparing legal documents; - formation of skills and abilities necessary for practical activity; - consolidation of existing and obtaining new knowledge necessary for practical activity; - formation of students' ability to independently and efficiently perform practical tasks, assignments, make informed decisions based on law.
1,2	Research work of undergraduates, including internships and completion of a master's thesis	Professional	<p>Knowledge: demonstration of scientific erudition, deep knowledge in the field under study, the formation of theoretical thinking skills, the ability to formulate hypotheses and collect information to solve complex complex problems, the formation of skills for producing scientific papers of theoretical and applied significance, including interdisciplinary nature.</p> <p>Be able to: demonstrate the level of scientific/research qualifications, maturity of a graduate of a master's degree as a researcher capable of creatively formulating and solving scientific and practical problems, including interdisciplinary ones.</p>

			<p>Own:</p> <ul style="list-style-type: none"> - possess the methodology of scientific knowledge and the ability to apply scientific methods in the study of problems of modern science and technology; - development of skills of conducting independent scientific work and mastering the methodology of scientific research and experimentation in solving the problems and issues being developed; - mastering the most advanced scientific methodology in the chosen field of specialization, the formation of the ability to conduct an independent scientific search, the ability to solve specific scientific and practical tasks.
