**MODULAR EDUCATIONAL PROGRAMS**

**7M016 Training of teachers in humanitarian subjects**

**7M01602 - "History" (scientific- pedagogical direction)**

**Semey- 2024**

Developed by the Department of History and geography

Discussed and approved at the meeting of the Department of History and geography  
(Protocol no. \_\_5\_\_ from " \_\_05\_\_ " \_\_01\_\_ 2024 y.)

Reviewed and recommended for approval at a meeting of the Academic Council  
for the Quality of the Faculty  
(Protocol no. \_\_2\_\_ from " \_\_23\_\_ " \_\_02\_\_ 2024 y.)

Reviewed and approved at the meeting of the Educational and Methodological Council of the University  
(Protocol no 5. from of \_28\_\_ \_\_05\_\_ 2024 year).

## **Content**

1. Explanatory note
2. The graduate's competence model
3. The list of modules included in the MEP with their brief characteristics

## 1. Explanatory note

The modular educational program (MEP) is compiled in accordance with the:

- State Standard of Higher and Postgraduate Education, approved by Order No. 2 of the Minister of Science and Higher Education of the Republic of Kazakhstan dated July 20, 2022;
- Rules for organizing the educational process on credit technology of education, April 2011, No. 152;
- Model rules for the activities of organizations of higher and (or) postgraduate education, approved by Order of the Minister of Education and Science of the Republic of Kazakhstan dated October 30, 2018, No. 595;
- Professional standard "Teacher", appendix to the order No.500 dated Desember 15, 2022

The modular educational program includes blocks of basic and core disciplines.

The block of basic disciplines consists (BD) of 35 credits (UC-20, CC – 15).

The block of profile disciplines (PD) – 53 credits, (UC – 21, CC – 32).

The total number of credits upon completion of the educational program is 120 credits.

Including:

Teaching practice – 3 credits, research practice - 13 credits, research work of a graduate student, including the completion of a master's thesis - 24 credits.

The final certification is 8 credits.

Number of discipline modules: 8

Social partners who took part in the discussion of the MEP:

Abdullin J.M. - Deputy Director of the Regional Museum of Local Lore of Semey;

Kadyrova L.K. – Head of the Department of scientific reference apparatus and use of documents of the KSU "Center for Documentation of Modern History" of the Department of Culture, Language Development and Archival Affairs of the Abai region. G.Semey;

G.A. Abenova – Head of the Department of "History and Law" of the National Academy of Sciences Shakarim Semey University

The purpose of the modular educational program is scientific, theoretical and pedagogical training of specialists in accordance with the modern model of humanitarian education with deep scientific and pedagogical education, competitive in the regional labor market OP 7M01602 "history".

### Expected results of the educational program.

#### 7M01602 "HISTORY"

- ON 1** The use of scientific methods of cognition in professional activity; knowledge of the principles and culture of pedagogical activity; the ability to systematize, summarize scientific and pedagogical information for use in professional activity, possess the skills of scientific analysis and solving practical problems in the organization and management of educational activities;
- ON 2** Demonstrate knowledge of the main provisions and categories of modern psychological and pedagogical science, apply in practical pedagogical activity skills in the application of methods and technologies of educational activities and inclusive education in accordance with the age characteristics of students, as well as in the management of the holistic pedagogical process of the school;

- ON 3** Analyze and evaluate processes and phenomena in the development of historical types of civilizations and states, determine the stages of formation and development of state-legal institutions, centers of culture; classify the typology of historical types of nomadism; possess modern methodological principles and methodological techniques of historical research of the problems of formation and development of the Kazakh national statehood, Eurasian steppe civilization;
- ON 4** To integrate and apply knowledge of the facts of the development of the historical process, to identify common patterns, the main facts characterizing the historical orientation, the dynamics of the development of states in different periods of history; to compare models of natural-historical, socio-political, socio-economic development of Kazakhstan and the countries of the world;
- ON 5** Systematize basic historical information, explain and evaluate the driving forces and patterns of the historical process; collect and interpret information to form judgments of political, socio-economic and cultural processes in the context of general trends in the historical development of Kazakhstan and the countries of the East and West;
- ON 6** To understand the logic of the development of national and world history, global processes in their historical conditionality; to apply the theoretical and methodological foundations of the development of historical science; achievements of the previous historiography of national and world history, to learn the achievements of the latest historiography of history, to be able to actualize the range of the most important theoretical and methodological problems of historical science;
- ON 7** Demonstrate and apply modern knowledge about new approaches in teaching; competence in developing and analyzing programs of historical disciplines; understand and be able to explain changes in the content of a teacher's professional activity, patterns of application of ethical and pedagogical knowledge and ethical norms to solve problems of scientific and pedagogical activity; possess the theory, methodology and methodology of teaching history; apply and evaluate the effectiveness innovative educational technologies; establish feedback with students using digital technologies;
- ON 8** Apply theoretical and practical knowledge in the field of history, analyze current problems of historical science, evaluate ways to solve them, carry out comprehensive studies of theoretical and methodological achievements of Kazakh and foreign historical science;
- ON 9** To know the rules and principles of creating research and critical texts in order to form academic literacy and written communication skills; to determine the nature, structure, principles of organization and functioning of science; to form systematic and holistic ideas about the main problems of theory, methodology and methodology of science, including historical and pedagogical; to determine the main patterns of development of historical science and their manifestations in the development of topical problems of domestic and foreign history; to carry out research activities in the professional field using interdisciplinary research methods and innovative technologies.
- ON 10** Demonstrate knowledge of the basic requirements for planning and organizing the educational and scientific process; practice-oriented teaching methods and technologies; organize and conduct training sessions taking into account the principles of student-centered and practice-oriented learning and assessment; develop teaching materials in the disciplines taught, taking into account the integration of education, science and innovation; extrapolate innovations into the educational process in to carry out educational and methodological work and develop methodological competence; to ensure the integration of psychological and pedagogical knowledge and knowledge in the subject area.

**ON 11** To know the lexicographic and stylistic features of the foreign language being studied to solve problems in the framework of future professional activity, the structure and foundations of the construction of written and oral texts on professional topics; to be able to use language tools in communicative and professional activities; to master various methods of receiving and transmitting information in oral and written communication, modern communication technologies, including a foreign language for academic and professional interaction.;

**ON 12** Possess the learning skills necessary for independent continuation of further education in the field of history, evaluate historical events, facts, personalities in history, predict the ideological foundations of social models, identify differences in cultural and social diversity of Western and Eastern societies;

## 2. The competence model of the graduate.

### General professional competencies of graduates of the Master's degree:

must:

1) have an idea of:

- current trends in the development of historical scientific knowledge;
- on the role of education and historical science in public life;
- on current methodological and philosophical problems of the humanities and social sciences;
- contradictions and socio-economic consequences of globalization processes;
- about the current state of the world and national educational environment;

about the professional competence of a high school teacher;

2) know:

- theory and methodology of historical scientific knowledge;
- theoretical and methodological problems of historical science.
- the main tasks of the methodology of science, its main sections - the theory of historical knowledge and the teaching of methods of historical thinking;
- basic conceptual models of history, trends in modern methodology;
- principles and structure of the organization of scientific and pedagogical activity;
- psychology of cognitive activity of students in the learning process;
- methods and means of improving the efficiency and quality of history teaching;

3) be able to:

- to understand the theoretical issues of historical knowledge;
- apply scientific methods of cognition in scientific and pedagogical activity;
- critically analyze existing concepts, theories and approaches to the study of historical processes and phenomena;
- explain the role and significance of various methods of historical research in the system of scientific knowledge;
- to carry out information-analytical and information-bibliographic work with the involvement of modern information technologies;
- to summarize the results of research and analytical work in the form of a master's thesis, an article, an analytical note, etc.
- to apply in practice new approaches to the organization of scientific and pedagogical activities; to think creatively and creatively approach the solution of pedagogical problems and situations;

□ apply interactive methods of teaching history;

- to possess ways of self-determination in situations of choice based on their own positions;
- be able to make decisions, take responsibility for their consequences, carry out actions and actions based on the selected target and semantic settings;
- critically evaluate various aspects of society, culture, science and conduct a constructive discussion.
- make decisions and be responsible for them, carry out professional activities in a team.

4) have skills:

- analysis and solution of practical problems in the organization and management of educational activities;
- determining the relationship of teaching methods with the final learning outcomes, learning tools
- the use of modern information technologies in the educational process;
- professional communication and intercultural communication;

- oratory, correct and logical design of their thoughts
- research of problems in the field of history and methods of teaching history, use the results obtained to improve the methods of organizing the educational, research process;
- implementation of educational and pedagogical activities on credit technology of training

5) be competent:

- in the field of methodology of historical research;
- in solving scientific and pedagogical tasks;
- in the field of modern problems of historical and pedagogical science;
- in ways to ensure the constant updating of knowledge, the expansion of pedagogical skills and abilities.

### **Specially-professional competencies:**

A specialist in this field should:

- on the role of education and historical science in public life;
- to carry out professional pedagogical, scientific and research activities in the field of teaching methods of history and historical research;
- to use knowledge in the field of didactics, theory and methodology of history in professional pedagogical and research activities;
- to know industry, regional, national and global problems in the context of complex historical research;
- to know about fundamental research and scientific and practical innovative developments aimed at the systematic solution of problems in various fields of education and science;
- know the theoretical and methodological foundations of history
- know the terminology, tools and methods of historical science;
- to know the main approaches to the definition of the subject of historiography, periodization of historical science;
- organizational forms of functioning of historical science at various stages of its development;
- to know the state and level of development of historical knowledge, the policy of the state and society in the field of historical science;
- to know the basics of the theory and methodology of historiography as a science and academic discipline;
- apply the acquired knowledge in the course of independent work, use it in the evaluation of scientific and pedagogical processes.
- to know the modern strategy for the development of historical education in the republic;
- to know the variety of modern models and technologies of the organization of education and upbringing, in the system of innovative educational processes;

- systematized theoretical and practical knowledge in solving professional tasks;
- have the ability to carry out historical, cultural and local history functions in the activities of organizations and institutions (archives, museums);
- have the ability to use basic knowledge in the field of history and culture in scientific and pedagogical innovation, cultural and educational activities
- to present the results of their work to other specialists, to defend their positions in the professional environment, to find compromise and alternative solutions;
- critically evaluate information, evaluate practical experience and make constructive decisions based on the generalization of information;
- evaluate alternatives, choose the best solution, evaluate the results and consequences of the management decision;

### **Scientific and pedagogical competencies:**

The graduate must:

- explain the modern strategy for the development of historical education in the republic; be guided by the variety of modern models and technologies of the organization of education and upbringing, in the system of innovative educational processes;
- know the theoretical foundations of innovative scientific technologies in teaching history.
- to know the theoretical and methodological aspects of innovation in education;
- to know the criteria of innovative processes in education;
- know the ways of designing and developing innovative methods of organizing the educational process;
- to master the resources of educational systems and design their development;
- to introduce innovative techniques into the pedagogical process in order to create conditions for effective motivation of students;
- integrate modern information technologies into educational activities;
- to build and implement promising lines of professional self-development taking into account innovative trends in modern education;
- be able to build a logically complete pedagogical system: comprehensive planning of educational tasks;
- be able to determine the significance of a historian's historical concept on the basis of a comprehensive analysis of the evolution of historical science and socio-political development of Kazakhstan;
- apply modern methods and technologies of organizing educational activities, diagnostics and evaluation of the quality of the educational process;
- possess the acquired knowledge in educational, teaching and research activities;
- possess the skills of compiling reviews, annotations, abstracts and bibliographies on the subject of ongoing research;
- possess the ability to accumulate, evaluate, interpret the experience accumulated by historical science;
- own: methods of analysis and critical evaluation of various theories, concepts, approaches to the construction of a system of continuing education;
- possess ways to replenish professional knowledge based on the use of original sources;
- technologies for conducting experimental work, participation in innovative processes.
- possess the ability to apply modern methods and technologies of organizing and implementing the educational process at various educational levels in various educational institutions.
- the ability to form an educational environment and use their abilities in the implementation of the tasks of innovative educational policy ;
- the ability to direct the research work of students.
- possess the skills to develop and implement methodological models, techniques, technologies and teaching methods, to analyze the results of the process of their use in educational institutions of various types.
- possess the skills to implement pedagogical design of the educational environment, educational programs and individual educational routes.
- to know modern methods and technologies of the organization of educational activities, diagnostics and evaluation of the quality of the educational process;
- effectively solve professional, pedagogical and social problems and tasks related to the teaching of the course in accordance with modern requirements;

- to possess modern educational technologies, methodological techniques, pedagogical tools that allow teaching on an innovative basis;
- evaluate the results of pedagogical activity: introspection and analysis of the educational process and the results of the teacher's activity;
- to determine the complex of dominant and subordinate scientific and pedagogical tasks.

### **Research competencies:**

- know the ways and methods of historical research;
- know the main stages of the development of a research topic;
- know the basic methods of registration of scientific research;
- design methods in educational materials of the results of scientific historical research
- analyze and evaluate problematic processes and phenomena occurring in historical science;
- to know the fundamental and relevant principles of the formation of the information base of research on the object of research
- possess fundamental philosophical and methodological knowledge in the field of comprehension of history;
- possess special knowledge in the field of historical epistemology, new branches of world and national history;
- have an idea of innovative approaches to modern problems of historical knowledge;
- skills of applying the theoretical knowledge gained in practice;
- to use fundamental special methods in the analysis of historical sources in professional research activities;
- to the independent qualified formation of the information base of research on the selected object of history, pedagogy, methods of teaching history
- to independently identify current scientific problems of history, to develop methodological tools for scientific research in relation to a specific object of study, to formulate research hypotheses.
- apply scientific research methodologies;
- to draw conclusions and suggestions for improving the methodology of scientific research;
- skills of analysis, interpretation, processing, creative application and presentation of information on the philosophy of history and the theory of historical knowledge
- be able to: independently and fully create an innovative information base for research on a selected object of history, including sources.
- be able to: independently identify current scientific problems of history and develop special methodological tools for research.
- be able to analyze and summarize the results of scientific research based on modern interdisciplinary approaches;
- skills for professional presentation and presentation of the results of research activities
- to prepare and conduct research works using knowledge of fundamental and applied disciplines of the master's degree program;
- possess: special skills of selection, systematization, accumulation and presentation of data for innovative research on the selected object of history
- possess modern methodological principles and methodological techniques of historical research;
- to design innovations in historical research, in the scientific and pedagogical process.
- to have an idea - about general scientific methods and features of the process of scientific cognition in historical science; about the historical-genetic method, comparative-historical method (historical comparative studies), historical-typological method, systematic method of historical research; about the structure of historical research and types of historical works.
- skills of independent comprehension of the studied material and evaluation of modern historical research, reasoned and logical presentation of their own assessments of scientific concepts and research.

**Table 1. The sequence of mastering disciplines in the process of forming special competencies**

№	Competencies	The list of mandatory, elective disciplines and the sequence of their study for each training		Expected results
		List of disciplines	The sequence of their study	
1	Specially – professional, Scientific and pedagogical	Modern pedagogical technologies	1 term	<p>Expected result:</p> <p>To know: types of modern pedagogical technologies and their characteristics and features of the use of pedagogical technologies in the educational process;</p> <p>- apply the acquired knowledge in the course of independent work, use it in the evaluation of scientific and pedagogical processes.</p> <p>Be able to: design, predict and construct pedagogical technologies in professional pedagogical activity; apply pedagogical technologies in the pedagogical process of a modern school.</p> <p>- to draw conclusions and suggestions for improving the methodology of scientific historical and pedagogical research;</p> <p>Skills: creative use of new technologies in professional activity; possess modern methodological techniques, pedagogical tools that allow you to carry out training on an innovative basis;</p>
		Pedagogical ethics of a modern teacher	1 term	<p>To know: historical aspects of the formation of ethics as a science; theoretical foundations of ethics, its conceptual and categorical apparatus;</p> <p>Be able to: apply ethical norms and standards in professional practice; independently navigate ethical problems and ways to resolve them; apply general norms of morality and requirements of professional ethics in practice;</p> <p>evaluate the results of pedagogical activity: introspection and analysis of the educational process and the results of the teacher's activity;</p> <p>Skills: to master the conceptual apparatus of professional ethics of a specialist; methodological approaches to the choice of theoretical tools corresponding to the task being solved;</p> <p>culture of communication in professional and everyday life, skills of public speech, argumentation, discussion.</p>

2	General professional, research competencies.	Formation of the Kazakh national statehood: historical and evolutionary model	2 term	<p>Expected results</p> <p>To know:</p> <ul style="list-style-type: none"> <li>the main periods of the formation of the historical past of independent Kazakhstan statehood;</li> <li>the origins of the formation and development of the idea of nation-building;</li> <li>features and significance of the modern Kazakhstan development model;</li> <li>stages of formation of the idea of a national state;</li> <li>the main provisions of the Constitutional Law on the State Independence of the Republic of Kazakhstan, the state strategy for the development of independent Kazakhstan;</li> <li>the process of forming the foundations of the constitutional system, the creation of the armed forces, state borders, strengthening national security;</li> <li>the processes of development of parliamentarism in the republic, modernization of the public administration system; the main three branches of government as components of the country's political system;</li> <li>the origins and continuity of the Kazakh statehood: antiquity, the Middle Ages and modern times;</li> <li>patterns of political, socio-economic and cultural development of the state;</li> </ul> <p>be able to:</p> <ul style="list-style-type: none"> <li>demonstrate knowledge of the main periods of the formation of the historical past of independent Kazakhstan statehood;</li> <li>to correlate the phenomena and events of the historical past with the general paradigm of the world-historical development of human society through critical analysis;</li> <li>to master the techniques of historical description and analysis of the causes and consequences of events in the modern history of Kazakhstan;</li> <li>to offer possible solutions to modern problems based on the analysis of the historical past and reasoned information;</li> <li>analyze the features and significance of the modern Kazakh development model;</li> <li>to determine the practical potential of international dialogue and respect for the spiritual heritage;</li> <li>to substantiate the fundamental role of historical knowledge in the formation of Kazakhstan's identity and patriotism;</li> <li>to form their own civil position on the priorities of mutual understanding, tolerance and democratic values of modern society.</li> </ul> <p>Skills:</p>
---	--	---	--------	--

				<ul style="list-style-type: none"> <li>-possess the skills of identifying common and distinctive features in historical phenomena,</li> <li>- possess the skills of an analytical approach to scientific and historical information;</li> <li>-possess the skills of applying the scientific categorical and conceptual apparatus of historical science;</li> <li>-possess the culture of oral and written speech;</li> <li>-possess the skills of logical thinking, clear consistency, logic of reasoning,</li> <li>-possess the skills and abilities of independent work, preparation of essays,</li> </ul>
		The history of the Soviet State	2 term	<p>presentation materials, projects.</p> <p>Expected result:</p> <p>To know:</p> <ul style="list-style-type: none"> <li>the causes, periodization and significance of historical processes and upheavals that took place during the revolutions and civil war in Soviet Russia (1917-1920);</li> <li>the specifics and periodization of the history of the development of Soviet statehood (1917-1991);</li> <li>to identify and understand the causes and consequences of the collapse of the USSR;</li> <li>have the ability to analyze and explain the main directions of political, socio-economic, ideological and other reforms and transformations in the 90s of the XX century - the beginning of the XXI century;</li> <li>to identify the specifics of the national and religious policy of the Soviet state.</li> </ul> <p>be able to:</p> <ul style="list-style-type: none"> <li>characterize and evaluate the activities of subjects of Soviet history;</li> <li>to assess the main historiographical problems of the course being studied;</li> <li>to select, analyze and objectively interpret material for research and educational activities.</li> </ul> <p>own:</p> <ul style="list-style-type: none"> <li>knowledge of the theory and methods of historical research;</li> <li>the ability to understand, critically analyze and present basic historical information on the Soviet period of history.</li> </ul>

3	General professional, research competencies;	Theoretical and methodological problems of historical science	3 term	<p>Expected result:</p> <p>to know:</p> <p>the main tasks of the methodology of science, its main sections - the theory of historical knowledge and the teaching of methods of historical thinking;</p> <p>the main conceptual models of history, trends in modern methodology;</p> <p>new branches in world and domestic historiography (tender and oral, demographic and environmental history, intellectual history, etc.);</p> <p>methods of interdisciplinary research paradigms;</p> <p>features of the object of historical knowledge, knowledge of the problems of historical source and historical fact;</p> <p>methods and methods of historical research;</p> <p>the main stages of the development of a research topic;</p> <p>the main methods of registration of scientific research;</p> <p>be able to:</p> <p>understand the theoretical issues of historical knowledge;</p> <p>explain the role and significance of various methods of historical research in the system of scientific knowledge;</p> <p>use modern information technologies in the search and processing of results;</p> <p>to carry out reports on scientific work in accordance with modern requirements;</p> <p>to characterize the features of the object of historical knowledge, the problems of the historical source and historical fact;</p> <p>to possess:</p> <p>fundamental philosophical and methodological knowledge in the field of comprehension of history;</p> <p>special knowledge in the field of historical epistemology, new branches of world and national history;</p> <p>the idea of innovative approaches to modern problems of historical cognition; the terminological apparatus of historical science;</p> <p>skills of independent analysis and generalization of the affected problems;</p> <p>skills of applying the theoretical knowledge obtained in practice;</p>
---	--	---	--------	--

				skills of problem-search methods of mastering historical knowledge; skills of professional analysis and work with scientific material, selection of the research topic and preparation of the dissertation text .
		Conceptual foundations of historical science	3 term	Expected result: To know: the main conceptual models of historical development, various approaches to the periodization of universal and national history; the main scientific approaches and principles, the main directions in the development of foreign and domestic methodology of history; Be able to: analyze and compare the main ideas of conceptual models of historical development; define a set of methods and scientific approaches for writing research projects; to identify the main trends in the modern methodology of history. Possess: the skills of applying general scientific and special techniques, approaches, methods and techniques in research practice to solve the tasks set within the scientific worldview

**Profile disciplines  
Component of choice**

4	General professional, Specially-professional, Research competencies.	Nomadic civilization: genesis and typology	2 term	Expected result: know: - theoretical and methodological approaches, concepts and their evolution in the study of nomadism; - variety of approaches, concepts and theories of typological analysis of nomadic society; - the phenomenon of nomadism, its role as a link between different societies and cultures; - knowledge of the main laws and features of the origin and development of the nomadic mode of production; be able to: formulate and generalize the main laws and features of the origin and development of the nomadic mode of production;
---	--	--	--------	---

				<p>work with historical sources, conduct independent analysis of historical material;  to determine the role of nomadism as a link between different societies and cultures;  to possess  the skills of theoretical generalization and comparative analysis of nomadic societies on the territory of Kazakhstan, the Eurasian and other regions;  skills of forming a holistic picture of the historical stages of the development of nomadism;  skills of studying the essence of nomadism as a special way of producing economy.</p> <p>Expected result: To know:</p> <ul style="list-style-type: none"> <li>- theoretical and methodological approaches, concepts and their evolution in the context of Eurasian history;</li> <li>- variety of approaches, concepts and theories of typological analysis of nomadic society;</li> <li>- the phenomenon of nomadism, its role as a link between different societies and cultures;</li> <li>- knowledge of the main laws and features of the origin and development of the nomadic mode of production in the Eurasian space;</li> </ul> <p>be able to:  formulate and generalize the main laws and features of the origin and development of the nomadic mode of production;  work with historical sources, conduct independent analysis of historical material;  determine the role of nomadism as a link between different societies and cultures of the Eurasian region;  possess:  skills of theoretical generalization and comparative analysis of nomadic societies in the territory of the Eurasian region;  skills of forming a holistic picture of the historical stages of the development of nomadism;  skills of studying the essence of nomadism as a special way of producing economy.</p>
		<p>Nomadic civilization in the Eurasian history</p>	<p>2 term</p>	<p>Expected result:  To know:</p> <ul style="list-style-type: none"> <li>- theoretical and methodological approaches, concepts and their evolution in the context of Eurasian history;</li> <li>- variety of approaches, concepts and theories of typological analysis of</li> </ul>

			<p>nomadic society;</p> <ul style="list-style-type: none"><li>- the phenomenon of nomadism, its role as a link between different societies and cultures;</li><li>- knowledge of the main laws and features of the origin and development of the nomadic mode of production in the Eurasian space;</li><li>- about modern trends in the development of historical scientific knowledge;</li><li>-theory and methodology of historical scientific knowledge;</li><li>- theoretical and methodological problems of historical science.</li></ul> <p>be able to:</p> <ul style="list-style-type: none"><li>-to formulate and generalize the main laws and features of the origin and development of the nomadic mode of production;</li><li>-work with historical sources, conduct independent analysis of historical material;</li><li>- to define the role of nomadism as a link between different societies and cultures of the Eurasian region;</li><li>-critically analyze existing concepts, theories and approaches to the study of historical processes and phenomena;</li><li>-explain the role and significance of various methods of historical research in the system of scientific knowledge;</li><li>- be able to: independently and fully create an innovative information base for research on a selected object of history, including sources.</li><li>- be able to: independently and fully create an innovative information base for research on a selected object of history, including sources.</li><li>- be able to: independently identify current scientific problems of medieval studies and develop special methodological tools for research.</li></ul> <p>Skills:</p> <ul style="list-style-type: none"><li>-possess the skills of theoretical generalization and comparative analysis of nomadic societies in the territory of the Eurasian region;</li><li>--skills of forming a holistic picture of the historical stages of the development of nomadism;</li><li>-skills of studying the essence of nomadism as a special way of producing economy.</li><li>-research of problems in the field of history and methods of teaching history, use the results obtained to improve the methods of organizing the educational, research process;</li><li>- possess: skills of analysis, interpretation, processing, creative application and presentation of information on the philosophy of history and the theory</li></ul>
--	--	--	---

				<p>of historical cognition.</p> <ul style="list-style-type: none"> <li>- possess: special skills of selection, systematization, accumulation and presentation of data for innovative research on the selected object of history.</li> <li>-professional presentation and presentation of the results of research</li> <li>- activities.</li> </ul>
5	General professional, specially-professional, research	Kazakhstan and Russia in the context of historical and cultural ties.	2 term	<p>Expected result:</p> <p>to know:</p> <ul style="list-style-type: none"> <li>an assessment of the events of the 18th and 20th centuries from the perspective of new theoretical and methodological approaches;</li> <li>analysis of the main stages of the process of formation and development of historical and cultural interaction between Kazakhstan and Russia;</li> <li>-the history of Russian-Kazakh relations, containing both unique phenomena of interethnic interaction and phenomena characterizing the universe of historical and cultural relations;</li> <li>- achievements of cooperation between Kazakhstan and Russia based on the historical experience of bilateral cooperation;</li> <li>-methodological aspects, historiography and source base of the most important nodal problems;</li> <li>-the basis of historical knowledge should be the study of factual material;</li> <li>-the main and general directions of studying the historical processes of national history;</li> <li>-theoretical and methodological problems of historical science;</li> <li>-to know industry, regional, national and global problems in the context of complex historical research;</li> <li>-basic conceptual models of history, trends in modern methodology;</li> <li>-know the ways and methods of historical research;</li> <li>-know the main stages of the development of a research topic;</li> <li>-know the basic methods of registration of scientific research;</li> </ul> <p>be able to:</p> <ul style="list-style-type: none"> <li>-to show the historical events that took place on the territory of Kazakhstan, in connection and interaction with the history of Russia;</li> <li>-use knowledge to reproduce the general picture of historical reality;</li> <li>-to compare individual phenomena with the processes taking place on the territory of Kazakhstan and Russia;</li> </ul> <p>to use fundamental historical knowledge in the field of professional activity;</p> <ul style="list-style-type: none"> <li>- critically analyze existing concepts, theories and approaches to the study</li> </ul>

				<p>of historical processes and phenomena;</p> <ul style="list-style-type: none"> <li>- independently and fully create an innovative information base for research on a selected object of history, including sources;</li> <li>- independently identify current scientific problems of history and develop special methodological tools for research;</li> <li>- analyze and summarize the results of scientific research based on modern interdisciplinary approaches;</li> </ul> <p>skills:</p> <ul style="list-style-type: none"> <li>-possess the skills of independent study and analysis of socio-political and socio-economic events of different historical periods;</li> <li>-research skills using the latest theoretical, conceptual and methodological approaches;</li> <li>-skills of using interdisciplinary concepts in scientific research and educational process</li> <li>-knowledge about the development of society: the diversity of cultures, civilizations, forms of social experience, the place of Kazakhstan in the world-historical process;</li> <li>- special skills of selection, systematization, accumulation and presentation of data for innovative research on the selected object of history;</li> <li>-modern methodological principles and methodological techniques of historical research;</li> <li>-to design innovations in historical research, in the scientific and pedagogical process.</li> <li>- skills of independent comprehension of the studied material and evaluation of modern historical research, reasoned and logical presentation of their own assessments of scientific concepts and research.</li> </ul>
		Kazakh-Russian relations in the XIX	2 term	<p>Expected result:</p> <p>To know:</p> <ul style="list-style-type: none"> <li>- evaluate the events of the 19th century from the perspective of new theoretical and methodological approaches;</li> <li>-critically analyze existing concepts, theories and approaches to the study of processes and phenomena;</li> <li>-analysis of the main stages of the process of formation and development of historical interaction between Kazakhstan and Russia;</li> <li>- achievements of cooperation between Kazakhstan and Russia based on the historical experience of bilateral cooperation;</li> <li>-methodological aspects, historiography and source base of the most important nodal problems;</li> </ul>
