3	List of modules included in the MEP	20

1. EXPLANATORY NOTE

The Modular Educational program (MOPP) is compiled in accordance with:

I. Regulatory documents of the Republic of Kazakhstan

1. The Law of the Republic of Kazakhstan "On Education" dated 27.07.2007;
2. The State standard of higher and postgraduate education, approved by the Order of the Minister of Science and Higher Education of the Republic of Kazakhstan No. 2 dated July 20, 2022;
3. Rules for the organization of the educational process on credit technology of education, approved by Order of the Minister of Education and Science of the Republic of Kazakhstan No. 152 dated April 20, 2011;
4. Standard rules of activity of educational organizations implementing educational programs of higher and (or) postgraduate education, approved by the Order of the Ministry of Education and Science of the Republic of Kazakhstan No. 595 dated 30.10.2018;
5. Professional standard "Teacher", approved by the Order of the Chairman of the Board of the National Chamber of Entrepreneurs of the Republic of Kazakhstan "Atameken" No. 133 dated June 8, 2017.

The modular educational program (MEP) is developed as a set and sequence of training modules for the entire period of study and is aimed at mastering the competencies necessary for the awarding of the academic degree "Master of Laws" in the educational program 7M04208 - "Actual problems of law". The DB block includes disciplines of the university component (VC), which is 20 credits; and components of choice (CV), which is 15 credits. Modules of these disciplines make it possible to form a complex of key (research), general and professional competencies acquired by a graduate.

The PD block includes disciplines of the university component (VC), which is 14 credits; and an optional component (CV), which is 35 credits. Modules of these disciplines allow you to form a complex of key and professional (developing, creative, organizational and methodological) competencies acquired by a graduate.

RWMS - 24 credits;

FSA – 8 credits.

In total, a master's student at the end of the MEP must master 120 credits (100%).

In total, 9 modules were compiled for the MEP.

To update OP 7M04208 "Actual problems of law" on March 15, 2019 at the Faculty of Law, a round table was held on the topic "Labor market: the state and ways of effective interaction", which was attended by representatives of the Prosecutor's Office of the city of Semey, internal affairs bodies, judges of the city court, etc. At the end of the work, the participants of the round table adopted a resolution with a list of new disciplines for MEPs that meet the requirements of the modern market. On the example of disciplines: "Theory and practice of the application of constitutional legislation", "Legal regulation of commercial activities in the Republic of Kazakhstan and foreign countries", "Modern policy of combating crime".

Objects of professional activity for the qualification "Master of Legal Sciences" under the educational program 7M04208 - "Actual problems of

law" prepares qualified specialists who are ready to carry out scientifically grounded professional activities in jurisprudence to meet the staffing needs of law enforcement agencies, public authorities, judicial and law enforcement systems and organizations of all forms of ownership.

During the development of the modular educational program, the wishes and recommendations of social partners and potential employers were taken into account, aimed at the formation of additional professional competencies that meet the requirements of the labor market.

Recommended by the employers

1. Akhmetzhanov Zh.R. – First Deputy Head of the UP G.Families of the Oblasi Abai department, Lieutenant Colonel of the police

2. Narbinova Mirgul Maidanovna - Candidate of Law, «Turan-Astana» University

After successful completion of the educational program (OP) 7M04208 "Actual problems of law" Master:

ON 1 - analyzes and identifies information from various sources, makes forecasts based on the information received;

ON 2 - interprets and conducts independent planning and coordination of scientific research, characterized by academic integrity, based on modern theories and methods of analysis, will master the skills of choosing the topic of scientific research and scientific search;

ON 3 - solves professional tasks taking into account an interdisciplinary approach;

ON 4 - able to resolve disputes in the legal field;

ON 5 - has the skills of public speaking and public speaking at international scientific forums, conferences and seminars, will master the skills of analysis, experimentation, data processing, obtaining sound effective solutions using information technology;

ON 11 - is able to conduct a critical analysis of adopted laws and other regulatory legal acts in order to determine the level of their content and compliance with the established criteria;

ON 12 - analyzes and explores various legal phenomena, legal facts, legal norms and relations in the Ministry of Emergency Situations in modern geopolitical conditions.

2. THE GRADUATE'S COMPETENCE MODEL

In the modern world, the key resource for the economic growth of countries is their intellectual and educational potential. In this regard, the system of training highly qualified personnel acquires strategic importance, turns into the main tool for ensuring the high competitiveness of the national economy.

The competitiveness of a modern worker is determined by his professional competence, broad social outlook, flexibility of behavior and a high level of individual activity. A developing society needs moral, enterprising people who can independently make decisions in a situation of choice, predicting their possible consequences, capable of cooperation, who are distinguished by mobility, dynamism, constructiveness, have a developed sense of responsibility for the fate of their country.

The competence-based approach is the most important methodological tool for bringing the educational system of Kazakhstan closer to foreign education systems within the framework of the Bologna process. At present, it is generally accepted that the comparability of educational levels and qualifications of graduates can be achieved by comparing the educational results and competencies they acquired during their studies..

The competence-based approach implies profound systemic transformations affecting the content, teaching, learning, assessment, links of higher education with other levels of vocational education, the introduction of the European system of transfer and accumulation of credits and the application of the European framework for higher education qualifications.

A graduate of the educational program 7M04208 - "Actual problems of law" is awarded the academic degree "Master of Legal Sciences" is the formation of undergraduates with a high level of professional culture, including the culture of professional communication, who have a civic position, capable of formulating and solving modern scientific and practical problems, teach at universities, successfully carry out research and management activities.

- develops legal documents, carries out legal expertise of regulatory legal acts and other documents;
- provides qualified legal opinions and advice;
- makes legal decisions and performs other legal actions in strict accordance with the law;
- demonstrate professional skills of analytical work, the application of NPA, identify gaps in legislation, analysis of law enforcement practice;
- takes the necessary measures to restore the violated rights.

Table 1. The sequence of mastering disciplines in the process of forming professional competencies

№	Competencies	The list of compulsory, elective disciplines and the sequence of their study		Expected Result
		List of disciplines	the sequence of their study (sem.)	
1	Special Pedagogical	Methodological foundations of scientific research of legal disciplines and academic writing	1 semester	<p>The purpose of the discipline: mastering the methodology, theoretical and experimental research, mastering the culture of scientific research, as well as the acquisition of language competencies, the possession of which will allow the researcher to read, understand and write scientific texts in the field of jurisprudence.</p> <p>Summary of the discipline: within the framework of this course, historical and modern aspects, theoretical provisions, technologies, operations, practical methods and techniques of conducting scientific research of legal disciplines are studied, as well as the basics of speech mastery are highlighted, undergraduates study the features of scientific style and rhetoric that contribute to effective academic communication. The methods of analysis of both oral and written samples of the "ideal" scientific discourse are presented, which help to further create their scientific works at a high level on the basis of modern achievements of domestic and foreign scientists and to master the skills of choosing the topic of scientific research, scientific search, analysis, experimentation, data processing, obtaining sound effective solutions using information technology.</p> <p>This discipline contributes to the formation of skills and competencies stated in the learning outcomes.</p>

2	Special Professional	Theory and practice of the application of constitutional legislation	1 semester	<p>The purpose of the discipline is to expand knowledge, skills and ideas about the theory and practice of the application of constitutional legislation.</p> <p>Summary of the discipline: constitutional and legal relations, the history of their development, problems, prospects, patterns of application of constitutional legislation in the Republic of Kazakhstan and individual states, as well as the analysis of constitutional and legal norms and determining the order of their implementation are investigated.</p> <p>This discipline contributes to the formation of skills and competencies stated in the learning outcomes.</p>
3	Special Professional	Theory and practice of application of administrative legislation	1 semester	<p>The purpose of the discipline: disclosure of the features of legislative support of administrative and legal reforms in the Republic of Kazakhstan.</p> <p>Summary of the discipline: the content of the course covers the theory and practice of administrative law, its subjects, the generalized practice of applying administrative legislation, institutions of administration, issues of public service reform, issues of administrative and legal regulation of education, healthcare and other important spheres of public life.</p> <p>This discipline contributes to the formation of skills and competencies stated in the learning outcomes.</p>
4	Special Professional	Theory and practice of proceedings in cases of administrative offenses	2nd semester	<p>The purpose of the discipline is to form a complex of scientific, theoretical and law enforcement knowledge, skills and abilities in the implementation of proceedings in cases of administrative offenses.</p> <p>Course content: this course studies the forms and methods of administrative activity, theoretical aspects of the identification and classification of administrative offenses, the study of forms and methods of generalizing the practice of proceedings in cases of administrative offenses.</p> <p>This discipline contributes to the formation of skills and competencies stated in the learning outcomes.</p>

5	Special Professional	Methodology of legal analysis	2nd semester	<p>The purpose of the discipline: a deep understanding of the content of philosophy and theory of law, as well as the generalization of legal information.</p> <p>Summary of the discipline: within the framework of this course, students study general aspects of the theory of law, the basic concepts of the philosophy of law, the use of various methods of analyzing legal information obtained from various sources, as well as the generalization of legal practice, as well as the formation of undergraduates' ideas about the ways and methods of cognition of the science of jurisprudence, determining its location in the system of professional and cognitive reference points, the need to study the evolutionary processes of legal branches.</p> <p>This discipline contributes to the formation of skills and competencies stated in the learning outcomes.</p>
6	Special Professional	Modern criminal policy of combating crime	2nd semester	<p>The purpose of the discipline: Mastering the theoretical and applied knowledge of the modern criminal policy of combating crime makes it possible to successfully solve scientific and legal issues on the prevention and prevention of criminal offenses for the protection of the rights and legitimate interests of citizens, society and the state.</p> <p>Discipline content: The course studies objective and subjective factors affecting crime, types of crime, personality of the offender, which subsequently determines crime prevention measures. In the process of training, the main contents of national legislation on fundamental issues of development and construction of New Kazakhstan are disclosed. The assimilation of scientific discipline will contribute to the formation of the skills and competence of the training declared in the results.</p>

7	Special Professional	Theory and practice of law enforcement management	2nd semester	<p>The purpose of the discipline: Mastering special knowledge of the legal foundations of the law enforcement system of the Republic of Kazakhstan, as subjects involved in ensuring national security and building a New Kazakhstan.</p> <p>Summary of the discipline: this discipline is aimed at revealing the main tasks of the law enforcement system; the moral and legal foundations of the law enforcement service. Research of the scientific and legal foundations of management processes in the service team, taking into account social, cultural, confessional differences.</p> <p>Mastering a scientific discipline will contribute to the formation of skills and competencies stated in the learning outcomes.</p>
8	Professional	Problems of legal regulation of the activities of legal entities as subjects of civil law	3 semester	<p>The purpose of the discipline: in-depth study within the framework of the master's degree program of issues related to the consideration of such a legal form of collective participation of subjects in civil turnover as the construction of a legal entity to determine their status, specifics and place in modern civil turnover</p> <p>Summary of the discipline: legal regulation of corporate relations, theoretical and practical aspects of the creation and activity of legal entities; actual problems of legal regulation of legal entities as subjects of civil law;</p> <p>Successful completion of this course will allow undergraduates to achieve the stated learning outcomes reflected in the competencies being formed.</p>

9	Professional	Features of the resolution of certain categories of civil cases	3 semester	<p>The purpose of the discipline: consideration and analysis of topical issues of the application of the norms of civil procedure legislation for the consideration of certain categories of civil cases that are most in demand in practice.</p> <p>Summary of the discipline: features of the procedural order of initiation, consideration and resolution of cases in civil proceedings; algorithm of procedural actions to be performed by a judge in preparing a case for trial: correct establishment of the subject and the basis of the claim, as well as facts relevant to the case; features of evidence and evidence with examples from judicial practice; correct legal qualification legal relations of the parties and its significance.</p> <p>Successful completion of this course will allow undergraduates to achieve the stated learning outcomes reflected in the competencies being formed.</p>
10	Professional	Modern problems of the organization and activity of advocacy in the Republic of Kazakhstan	3 semester	<p>The purpose of the discipline is to expand and deepen the system of knowledge obtained in the bachelor's degree on the state of current legislation that determines the place of the bar in the legal system of the state, the main tasks facing the modern bar, the state of current legislation, the practice of its application and development prospects.</p> <p>Summary of the discipline: institute of Advocacy in the legal system of the Republic of Kazakhstan; modern problems of participation of a lawyer in civil proceedings; the role, tasks and modern significance of the bar in the state; current problems of the legal status of the bar association; current problems of reforming the bar in the modern legal system and issues of improving legislation on advocacy and legal assistance in the Republic of Kazakhstan.</p> <p>Successful completion of this course will allow undergraduates to achieve the stated learning outcomes reflected in the competencies being formed.</p>

11	Special Professional	The Roman Civil Trial	3 semester	<p>The purpose of the discipline: to gain knowledge about the Roman civil process and its world-historical significance, to master legal phenomena, institutions of the Roman civil process, its conceptual apparatus, classifications of legal phenomena and to acquire skills in working with sources of the Roman civil process, comparative legal analysis of sources and research papers.</p> <p>Summary of the discipline: Roman civil procedure: the concept, forms, main features, things in Roman law; the history of Roman civil procedure as a universal model of the evolution of the law and order of the ancient world; a characteristic feature of Roman civil procedure during the republican period and the period of the principate; forms of civil procedure and stages of judicial proceedings in Ancient Rome; the legal force of a court decision in the civil process of ancient Rome. Successful completion of this course will allow undergraduates to achieve the stated learning outcomes reflected in the competencies being formed</p>
12	Professional	Private international law in the context of the implementation of cross-border commercial relations under sanctions restrictions	3 semester	<p>The purpose of the discipline: in-depth study, comprehensive discussion of various problems of the implementation of cross-border private law relations, as well as the formulation of effective solutions to modern legal problems.</p> <p>Summary of the discipline:</p> <p>cross-border transactions: legal and practical aspects; the problem of State sovereignty and its significance for private international law; private international law in the context of the development of information and communication technologies; cross-border corporate contract: features of a foreign element; non-state regulation in the field of cross-border agency relations; international commercial arbitration and other alternative dispute resolution methods; problems of legal regulation of sanctions relations.</p> <p>Successful completion of this course will allow undergraduates to achieve initial learning outcomes reflected in the competencies being formed.</p>

13	Professional	Law of obligations: problems of theory and practice	3 semester	<p>The purpose of the discipline is to master the current general provisions on obligations and contracts, identify current problems in the practice of applying general provisions on obligations and contracts, formulate proposals for improving the current legislation.</p> <p>Summary of the discipline: legal fact as the basis of modern civil law regulation of obligations; a system of obligations based on their objects and the obligation to transfer things as an element of this system; liability for breach of obligations: an adequate causal relationship; the fault of the creditor as a basis for reducing the amount of liability.</p> <p>Successful completion of this course will allow undergraduates to achieve the stated learning outcomes reflected in the competencies being formed.</p>
14	Special Professional	Criminal-legal and criminological aspects of the fight against environmental crime	3 semester	<p>The purpose of the discipline is to provide students with theoretical knowledge and practical skills necessary to clarify the concept and qualification of criminal offenses that infringe on the environmental safety of the Republic of Kazakhstan.</p> <p>Summary of the discipline: this subject studies problematic issues of criminal responsibility, as well as scientific and legal aspects of environmental criminal offense, where the features of criminological characteristics, prevention and prevention of environmental crime are considered in detail and disclosed.</p> <p>Mastering a scientific discipline will contribute to the formation of skills and competencies stated in the learning outcomes.</p>

15	Professional	Actual problems of combating corruption crime	3 semester	<p>The purpose of the discipline: The acquisition of professional competencies necessary for the practical activities of specialists, as well as the formation of a legal culture on the anti-corruption model of behavior and a public atmosphere of rejection of corruption.</p> <p>Summary of the discipline: the scientific discipline is aimed at the formation of professional knowledge on the legal analysis of anti-corruption, the scientific basis for the qualification of the composition of a criminal offense, problematic issues of prevention and prevention of corruption criminal offenses committed in the public and quasi-public sector.</p> <p>Mastering a scientific discipline will contribute to the formation of skills and competencies stated in the learning outcomes.</p>
16	Professional	Current issues of operational investigative activity	3 semester	<p>The purpose of the discipline: mastering scientific knowledge on the use of applied methods and techniques for the production of operational investigative measures aimed at forming students' reasonable professional views and judgments about the essence of the ORD.</p> <p>Summary of the discipline: the scientific discipline is aimed at studying the theoretical and legal foundations of the legal nature of operational investigative activities, rules and techniques for the procedural processing and consolidation of operationally significant information, as well as the transformation of these factual data as evidence in criminal cases.</p> <p>Mastering a scientific discipline will contribute to the formation of skills and competencies stated in the learning outcomes.</p>

17	Professional	Conceptual foundations of the production of covert investigative actions	3 semester	<p>The purpose of the discipline: mastering scientific and specialized knowledge that allows evaluating the production of procedural actions from the standpoint of its legality and validity, the formation of students' well-founded professional views and judgments about the essence of covert investigative actions.</p> <p>Summary of the discipline: this course provides for the study of scientific and legal foundations, secret investigative actions, features of criminal procedural justification and rules for conducting secret investigative actions at the stage of pre-trial investigation and legal analysis on the use of the obtained factual data as evidence in criminal cases.</p> <p>Mastering a scientific discipline will contribute to the formation of skills and competencies stated in the learning outcomes.</p>
----	--------------	--	------------	--

Table 2. The sequence of mastering the disciplines of social and professional interaction

Course	Supporting disciplines	Competencies	Expected Result
1	2	3	
1	History and Philosophy of Science - 5 credits	Special Pedagogical	<p>The purpose of the discipline: to discuss the problems of the phenomenon of science as a subject of special philosophical analysis, to get acquainted with the history and theory of science and the laws of its development. Summary of the discipline: the emergence of science and the main stages of its historical evolution; features of the modern stage of science development, prospects of scientific and technological progress; three aspects of the existence of science: science as a generation of new knowledge, a social institution, a special sphere of culture; the problem of truth in philosophy and science, criteria of scientific truth; integration of domestic education into the Eurasian and world educational space; problem, hypothesis and theory as forms of theoretical knowledge.</p> <p>Successful completion of this course will allow undergraduates to achieve the stated learning outcomes reflected in the competencies being formed.</p>
1	Foreign language (professional) -4 credits	Pedagogical Professional	<p>The purpose of the discipline: familiarization with general scientific and special terminology, complex grammatical phenomena for the implementation of the function of oral, written and electronic communication in English in the business and scientific</p>

			<p>spheres.</p> <p>Summary of the discipline: Foreign language as a component of professional training of a lawyer; the study of new vocabulary on the topics of "Crime. Punishment"; work on the text (reading, translation, discussion, performing written exercises on the text); mastering methods of work on the oral and written translation of general scientific and specialized literature, using technologies of rational work with large volumes of English-language information.</p> <p>Successful completion of this course will allow undergraduates to achieve the stated learning outcomes reflected in the competencies being formed.</p>
1	Higher education pedagogy - 4 credits	Pedagogical Professional	<p>The purpose of the discipline: to reveal the essence and structure of the educational process in higher education, the content of higher professional education, concepts, methods, means and organizational forms of education and upbringing.</p> <p>Summary of the discipline: a new model of higher professional education and a credit system of training; methodology of higher school pedagogy; the essence and features of the holistic pedagogical process of higher school; content of higher professional education; problems of organizing research work of students; issues of introducing modern pedagogical technologies, improving the quality of higher professional education.</p> <p>Successful completion of this course will allow undergraduates to achieve the stated learning outcomes reflected in the competencies being formed.</p>
1	Management Psychology - 4 credits	Pedagogical Professional	<p>The purpose of the discipline: consideration of the fundamental concepts of management science, directions and concepts of foreign and domestic management science, mechanisms of functioning and interaction of people in the organization, the use of scientific and psychological knowledge in solving problems of management activities.</p> <p>Summary of the discipline: Socio-psychological characteristics of personality; general concept of managerial communication: its forms and principles, levels, stages; psychology of conflict and ways of its resolution; image creation as an integral part of communication culture; managerial decision-making; models of behavior of the head in the decision-making process.</p> <p>Successful completion of this course will allow undergraduates to achieve the stated learning outcomes reflected in the competencies being formed.</p>
1	Theory and practice of application of civil and civil	Professional	<p>The purpose of the discipline: the study by undergraduates of the problems of modern theory of civil law and process, the practice of law-making and the application of the</p>

	procedural legislation - 5 credits		<p>norms of the current civil and civil procedural legislation.</p> <p>Summary of the discipline: the concept and principles of civil law and civil legislation; problems of theory and law-making; problematic issues of civil rights protection; modern classification of participants in civil proceedings; the problem of proof in civil proceedings of the Republic of Kazakhstan; theory and practice of the application of a settlement agreement and mediation in civil proceedings; problems of modernization and improvement of civil procedural legislation in the light of construction "New Kazakhstan".</p>
1	Current problems of international environmental law – 5 credits	Professional	<p>The purpose of the discipline: disclosure of the concept of international legal norms and principles governing the relations of subjects of international law in the field of environmental protection, rational nature management, environmental safety and protection of human rights to a favorable environment.</p> <p>Summary of the discipline: sources and principles of international environmental law; international control mechanisms in the field of environmental protection; means of peaceful settlement of disputes in the field of environmental protection; international arbitration as a means of resolving international environmental disputes; settlement of environmental disputes within the GATT/WTO.</p> <p>Mastering a scientific discipline will contribute to the formation of skills and competencies stated in the learning outcomes.</p>
1	Actual problems of law enforcement practice of criminal and criminal procedure legislation - 5 credits	Special Professional	<p>The purpose of the discipline: Mastering special scientific knowledge by students, which is aimed at obtaining professional competence and skillful application of acquired applied skills in practical activities.</p> <p>Discipline content: This training discipline is aimed at studying the current problems of law enforcement practice of criminal and criminal procedure legislation. The study of this course is based on the fundamental and applied foundations of scientific research, analysis of the synthesis of criminal and criminal procedure legislation. The assimilation of scientific discipline will contribute to the formation of the skills and competence of the training declared in the results.</p>
1	Modern trends and problems of the science of criminal law – 5 credits	Pedagogical Professional	<p>The purpose of the discipline: the study of scientific and legal theoretical and applied problems of criminal law and criminal legislation in the form of socially dangerous acts as criminal offenses.</p> <p>Summary of the discipline: the academic discipline studies modern trends in the field of criminal law as a science that takes into account the formation, development and ways of solving problematic issues of national material law, as well as the formation,</p>

			development and ways of rational application of foreign experience of the Anglo-Saxon and Romano-Germanic criminal law system in the Republic of Kazakhstan. Mastering a scientific discipline will contribute to the formation of skills and competencies stated in the learning outcomes.
1	Pedagogical practice	Pedagogical Professional	The research practice of the undergraduate is conducted in order to familiarize himself with the latest theoretical, methodological and technological achievements of domestic and foreign science, with modern methods of scientific research, processing and interpretation of experimental data. The purpose of the research practice is to gain experience in the study of an actual scientific problem, to expand the professional knowledge obtained by undergraduates in the course of training, and to form practical skills for conducting independent scientific work.
2	Research practice	Pedagogical Professional	Pedagogical practice takes place during the 1st semester of a master's degree and is a complex of educational and methodological work in order to master pedagogical skills and develop professional and practical competencies of students. The content of the pedagogical practice of undergraduates includes pedagogical activities: conducting at least 4 lectures, at least 4 seminars.
1,2	Research work of undergraduates, including internships and completion of a master's thesis	Special Pedagogical Professional	Knowledge: demonstration of scientific erudition, deep knowledge in the field under study, the formation of theoretical thinking skills, the ability to formulate hypotheses and collect information to solve complex complex problems, the formation of skills for producing scientific papers of theoretical and applied significance, including interdisciplinary nature. Be able to: demonstrate the level of scientific/research qualifications, maturity of a graduate of a master's degree as a researcher capable of creatively formulating and solving scientific and practical problems, including interdisciplinary ones. Own: - possess the methodology of scientific knowledge and the ability to apply scientific methods in the study of problems of modern science and technology; - development of skills of conducting independent scientific work and mastering the methodology of scientific research and experimentation in solving the problems and issues being developed; - mastering the most advanced scientific methodology in the chosen field of specialization, the formation of the ability to conduct an independent scientific search, the ability to solve specific scientific and practical tasks.
