I. EXPLANATORY NOTE

The Modular Educational program (MOPP) is compiled in accordance with:

I. Regulatory documents of the Republic of Kazakhstan

1. The Law of the Republic of Kazakhstan "On Education" dated 27.07.2007 with additions and amendments dated 21.02.19;
2. The State standard of higher and postgraduate education, approved by the Order of the Minister of Science and Higher Education of the Republic of Kazakhstan No. 2 dated July 20, 2022;
3. Rules for the organization of the educational process on credit technology of education, approved by Order of the Minister of Education and Science of the Republic of Kazakhstan No. 152 dated April 20, 2011 (as amended by Order of the Ministry of Education and Science of the Republic of Kazakhstan No. 563 dated 12.10.2018);
4. Standard rules of activity of educational organizations implementing educational programs of higher and (or) postgraduate education, approved by the Order of the Ministry of Education and Science of the Republic of Kazakhstan No. 595 dated 30.10.2018;
5. Professional standard "Teacher", approved by the Order of the Chairman of the Board of the National Chamber of Entrepreneurs of the Republic of Kazakhstan "Atameken" No. 133 dated June 8, 2017.

II. Regulatory documents of the Educational institution "Alikhan Bokeikhan University"

1. MR. Revision No. 4 of 05.10.2022 "Structure of the modular educational program";
2. Item Revision No. 4 of 23.08.22 "Regulations on the research work of undergraduates".

The modular educational program (MEP) is developed as a set and sequence of training modules for the entire period of study and is aimed at mastering the competencies necessary to award the academic degree "Doctor of Philosophy (PhD) in Law" under the educational program 8D04208 - "Modern trends in the development of Kazakhstani law." The DB block includes disciplines of the university component (VC), which is 10 credits; and components of choice (CV), which is 15 credits. Modules of these disciplines make it possible to form a complex of key (research), general and professional competencies acquired by a graduate.

The PD block includes disciplines of the university component (VC), which is 18 credits; and an optional component (CV), which is 10 credits. The modules of these disciplines make it possible to form a complex of key and professional (developmental, creative, organizational and methodological) competencies acquired by the graduate.

ERWD – 115 credits; FSA – 12 credits.

In total, a doctoral student at the end of the MEP must master 180 credits (100%). In total, 3 modules were compiled for MEP.

Objects of professional activity for the qualification of Doctor of Philosophy (PhD) in law under the educational program 8D04208 - "Modern trends in the development of Kazakhstani law" prepares qualified specialists who are ready to carry out scientifically grounded professional activities in jurisprudence

to meet the staffing needs of law enforcement agencies, public authorities, judicial and law enforcement systems and organizations of all forms of ownership.

The goal of EP 8D04208 - "Modern trends in the development of Kazakhstan law" is coordinated with the development strategy of the university.

Thus, the goal of the EP 8D04208 - "Modern trends in the development of Kazakhstani law" is the preparation of competitive PHD doctors who possess scientific and creative thinking and scientific and theoretical skills to identify and solve urgent problems of legal science aimed at progressive scientific, socio-economic, moral and cultural development of the state and society, which corresponds to the mission, goals of the university quality policy.

The mission of ABU is the training of competitive personnel with higher and postgraduate education in a wide range of areas focused on the industrial and innovative development of the region

The category "competitiveness of graduates" is directly and closely related to the quality of EP and education in general.

To assess the achievement of the goal of the educational program, a graduate's competence model is formed in the modular educational program 8D04208 - "Modern trends in the development of Kazakhstani law", which includes a list of competencies necessary for the effective implementation of professional activities.

The approved Graduate Model includes a description of the research tasks of the graduate, namely: demonstrating a systematic understanding of the field of study, mastery in terms of the skills and research methods used in this area; plan, develop, implement and adjust a complex research process, etc.

During the development of the modular educational program, the wishes and recommendations of social partners and potential employers were taken into account, aimed at the formation of additional professional competencies that meet the requirements of the labor market.

Recommended by social partners:

1. Narbinova Mirgul Maidanovna - Candidate of Law, «Turan-Astana» University
2. Kaliakparova Elena Nikolaevna - Doctor of Law, Sarsen Amanzholov East Kazakhstan University

In order to create special conditions for people with special educational needs to receive education, the graduate's competence model is supplemented with professional competencies that ensure the adaptive nature of the main educational program. To this end, courses for the formation of the ability of persons with special educational needs to successfully socialize in society and actively adapt to the labor market, taking into account the characteristics of the disease, are introduced into the catalog of courses of the additional educational program "Minor".

After successful completion of the educational program (OP) 8D04201 – "Modern trends in the development of Kazakh law" doctoral student:

ON 1 - has an idea of the main stages of development and paradigm shift in the evolution of science, methodological specifics in the field of research;

ON 2 - is able to carry out independent planning and coordination of scientific research, characterized by academic integrity, based on modern theories and methods of analysis;

ON 3 - analyzes and identifies information from various sources, makes forecasts based on the information received;

ON 4 - generates its own new scientific ideas, presents its knowledge and ideas to the scientific community, expanding the boundaries of scientific knowledge;

ON 5 - has the skills of public speaking and public speaking at international scientific forums, conferences and seminars;

ON 6 - have an idea about the norms of interaction in the scientific community, about the pedagogical and scientific ethics of a researcher;

and synthesizes the positions of scientific opinions of leading legal scholars: argues his scientific proposals for improving the legislative framework;
ON 9 - competent in the field of scientific and scientific-pedagogical activity in the conditions of rapid updating and growth of information flows;
ON 10 - is able to evaluate and provide qualified scientific and practical advice in the relevant areas of professional activity.

II. THE GRADUATE'S COMPETENCE MODEL

In the modern world, the key resource for the economic growth of countries is their intellectual and educational potential. In this regard, the system of training highly qualified personnel is acquiring strategic importance, turning into the main instrument for ensuring the high competitiveness of the national economy.

The competitiveness of a modern worker is determined by his professional competence, broad social outlook, flexibility of behavior and a high level of individual activity. A developing society needs moral, enterprising people who can independently make decisions in a situation of choice, predicting their possible consequences, capable of cooperation, who are distinguished by mobility, dynamism, constructiveness, and have a developed sense of responsibility for the fate of their country.

The competence-based approach is the most important methodological tool for bringing the educational system of Kazakhstan closer to foreign education systems within the framework of the Bologna process. At present, it is generally accepted that the comparability of educational levels and qualifications of graduates can be achieved by comparing the educational results and competencies they acquired during their studies.

The competence-based approach implies profound systemic transformations affecting the content, teaching, learning, assessment, links of higher education with other levels of vocational education, the introduction of the European system of transfer and accumulation of credits and the application of the European framework for higher education qualifications.
