<b>MAIN DISCIPLINES</b>					
<b>Elective courses (EC)</b>					
1	Problems of speech culture and general word cognition	5	Problems of the theory of literary text and poetics	Research practice	<p><b>The purpose of the discipline:</b> to introduce doctoral students to the holistic systematic concept of word science as a new direction of integrative type research; to form students' systematic views on trends in the development of various forms of communication in the language. During the course, the doctoral student acquires the following knowledge: - acquires knowledge of theoretical and methodological problems, basic concepts and categories of word science; - acquires knowledge of various trends in the development of communication in the language in an interdisciplinary direction (psycholinguistics, philosophy, neurolinguistics, logic); - distinguish the degree of influence of extralinguistic and linguistic factors on different types of communication in linguistics; - analyzes specific facts of the activity of language units in specific speech situations and within the framework of a particular communication; - is able to predict the processes of development of various forms of communication in the language; - summarizes the results of the analysis and evaluation of specific facts of the functioning of language units in the language; - get used to writing theses, doctoral theses, philological comments, and scientific projects on topical issues of speech science.</p> <p><b>Knowledge:</b> presentation of a holistic system concept of literature as a new direction of integrative type research; formation</p>

					<p>of students' systemic ideas about the development trends of various forms of communication in the language.</p> <p><b>Ability:</b> he is proficient in theoretical and methodological issues on the basic concepts and categories of the science of vocabulary, masters various trends in the development of communication in language in an interdisciplinary orientation (psycholinguistics, philosophy, neuro-linguistics, logic); - is able to distinguish the degree of influence of extralinguistic and linguistic factors on various types of linguistics in linguistics;</p> <p><b>Skills:</b> analyzes the specific facts of the activity of language units in a specific speech situation and within a certain communication, can predict the processes of development of various forms of communication in the language, argues the results of analysis and evaluation of specific facts of the activity of language units in the language, gets used to writing theses, doctoral dissertations, philological comments, scientific projects on topical issues of word formation.</p> <p><b>Competence</b> Programmatic, communicative competence</p>
1	Theoretical and methodological foundations of literary research	5	Problems of the theory of literary text and poetics	Research practice	<p><b>The purpose of the discipline:</b> To introduce students to the theoretical and methodological foundations of literary studies, to identify the laws of development of literary studies, modern methodological concepts and directions of research of literary phenomena, to teach them to apply modern teaching methods in practice and promote their professional development. When studying the discipline, students are provided with detailed information about the study of the scientific theoretical foundations of literary studies, stages in the context of changing cultural ideological paradigms, and theoretical concepts of literary studies. Develops the skills of applying theoretical and methodological conclusions of the main directions of modern literary research in the analysis of theoretical works.</p> <p><b>Knowledge:</b> to acquaint students with</p>

				<p>the research in the field of literary studies, to know the laws theoretical and methodological foundations of of the development of literary studies, modern methodological concepts and directions of the study of literary phenomena.</p> <p><b>Skill:</b> to teach to apply modern teaching methods in practice and thereby contribute to professional development. When studying the discipline, students receive complete scientific information about the theoretical foundations of literary studies, stages of development in the conditions of changing cultural and ideological paradigms, theoretical concepts of literary studies.</p> <p><b>Skills:</b> develops skills of applying theoretical and methodological results and conclusions of the main research directions in the field of modern literary studies in the process of analyzing theoretical works.</p> <p><b>Competence Program competence</b></p>
2	Comparative Linguistics and translation: their relationship	5	The main parameters of modern linguistics are anthropocentrism; functionalism; expansionism; cognitivism	<p>Research practice</p> <p><b>The purpose of the discipline:</b> to continue the study of two, sometimes several languages, to identify their similarities and differences at the structural level. To give doctoral students an idea of the relationship between the earlier data of contrastive linguistics and the observation of the characteristics of a foreign language compared to their native language. Contrastive linguistics is usually based on synchronous language materials. Most of the works at different levels of the language are associated with contrasting grammar, to a lesser extent with contrasting phonology and, to a lesser extent, with a system of contrasting vocabulary.</p> <p><b>Knowledge:</b> to continue studying two, and sometimes several languages and determine their proximity and difference at the structural level. Formation of the doctoral students' idea of whether the data of contrast linguistics were previously associated with the observation of the features of a foreign language in comparison with their native language.</p> <p><b>Skill:</b> Comparative (contrast)</p>

					<p>linguistics usually relies on synchronous language materials.</p> <p><b>Skills:</b> a large number of works belonging to different levels of language depend on contrasting grammar, a small number-on contrasting phonology, a smaller number-on the system of contrasting vocabulary. Formation of the ability to argue the results of analysis and evaluation of specific facts of the activity of linguistic units in the language.</p> <p><b>Competence</b> Special professional competence</p>
