IRN «Improvement of the methodological system of language teaching at the stage of digital transformation of education»

Section of the calendar plan with description	Implementation deadlines	Brief description of the work performed/results obtained	Information on possible use
Task 1. 1) analysis and generalization of foreign methods of using e-learning in language training and the practice of organizing language courses	*July - September 2023*	The study examined the results of the implementation of e-learning of languages. To form a holistic view of the current situation of the application and implementation of digital technologies in the field of education, an online survey was conducted. The survey examined the needs for using online communication tools to perform various tasks. The analysis examined the forms of computer-mediated communication and the organization of effective online interaction and their advantages compared to traditional forms of communication.	The analysis of the experience and interpretation of the studied material may be useful for a wide range of readers interested in innovative methods of teaching languages.
Task 2. 2) Working out of a model for teaching languages in the context of digitalization to ensure effective integration of traditional and e-learning; 2.1 Design of structural components of the model of the worked out methodological system		The structural and substantive components of the model, their characteristics and didactic capabilities, as well as the points of interaction between traditional and e-learning are defined. As a result, a structural model of a methodological system of language teaching based on the use of digital technologies is obtained.	The new model of the methodological system of foreign language education will be able to implement the integration of traditional methods and digital technologies. The integration of traditional and electronic learning in this methodological system of language teaching will allow for an individual approach to students; timely feedback between participants in the educational process, the organization of independent work and reflection.
Task 2. **2.2** Substantive content of the components of the methodological system	*October - November 2023*	According to paragraph 2 of task 2, the content and didactic functions of the structural components of the worked out methodological system are defined. Digital resources have a number of didactic functions that allow for the effective solution of a set of linguodidactic tasks.
