11	Criminally-legal and kriminologičeskaja the characteristic of struggle against military crimes	5	Criminal law of the Republic of Kazakhstan (General part)	It is necessary for further practical activities and for studying for a master's degree	<p><b>The purpose of the study:</b> Consideration of the basic principles of public service, spheres of public administration.</p> <p><b>Summary:</b> The system of knowledge in the field of public administration theory and organization of civil service, the study of principles of public service.</p> <p>Expected Result.</p> <p><b>To know:</b> the conceptual and terminological apparatus in the field of Chapter 18 of the Criminal Code of the Republic of Kazakhstan, the characteristics of the current criminal legislation, as well as the practice of its application, the characteristics of objective and subjective signs of military units of criminal offenses based on the methodology of their criminal characteristics, the rules for the qualification of criminal offenses and their application in the criminal legal assessment of factual circumstances established in criminal cases cases, the main law enforcement problems in the field of combating military criminal offenses, with the most typical judicial and investigative errors in the qualification of military criminal offenses and ways to overcome them, skills in solving situational problems. Dynamics, causes and conditions of committing criminal offenses by military service, the identity of the person who committed a military criminal offense.</p> <p><b>Be able to:</b> apply the criminal law norms of Chapter 18 of the Criminal Code of the Republic of Kazakhstan; apply the skills and abilities necessary for the qualification and differentiation of military criminal offenses; interpret with the help of various means and techniques of criminal law norms establishing criminality and punishability of military criminal acts, the differentiation of related criminal offenses, the ability to give qualified legal opinions on the presence/absence of composition criminal offense; possess the skills of legal argumentation, the resolution of certain legal situations.</p> <p><b>Own:</b> the ability to carry out legal expertise of normative legal acts, to give qualified legal opinions and consultations; to analyze judicial practice of sentencing for military criminal offenses; to identify and eliminate investigative and judicial errors, violations of the rule of law in the sphere of application of criminal legislation.</p>
12	Functions of the prosecutor in criminal proceedings	5	Criminal law of the Republic of Kazakhstan (General part)	Industrial practice (III)	<p><b>The purpose of the study:</b> The purpose of this course is to develop knowledge of the norms of prosecutorial supervision in the Republic of Kazakhstan necessary in the professional activity of a lawyer, namely in the field of supervision of the legality of pre-trial investigations and during the main judicial proceedings .</p> <p><b>Summary:</b> The author reveals the powers of the prosecutor, tactics and methods of organizing his work during the pre-trial investigation, as well as the ability of the prosecutor to conduct a reasoned dispute in the conditions of adversarial proceedings and the quality of maintaining the state prosecution in court .</p> <p><b>Expected result.</b></p> <p><b>To know:</b> The student must master the basics of the criminal procedure legislation of the Republic of Kazakhstan, laws and other regulatory legal acts, and regulating the functions of the prosecutor's office in criminal proceedings.</p> <p><b>Be able to:</b> Be able to independently analyze the effectiveness of prosecutorial supervision at the stage of pre-trial investigation and judicial review and resolution of a criminal case based on the study of general and particular theoretical teachings on prosecutorial activity in criminal proceedings.</p> <p><b>Own:</b> Practical skills that allow the student to skillfully apply the acquired knowledge in the process of carrying out professional activities. Independently analyze and assess the legality of the pre-trial investigation, on behalf of the prosecutor to make acts of prosecutorial response to violations of the rule of law in the process of pre-trial and judicial proceedings.</p>

12	Supervision of the prosecutor's office for the execution of laws	5	Criminal law of the Republic of Kazakhstan (General part)	Industrial practice (III)	<p><b>The purpose of the study:</b> mastering students with an integral system of knowledge in the field of legal regulation of the monetary system of the Republic of Kazakhstan</p> <p><b>Abstract:</b> The monetary system of the state. Concept, subject and system of legal regulation of the monetary system of the Republic of Kazakhstan.</p> <p><b>Expected result:</b></p> <p><b>To know:</b> the subject and sources of the discipline "Supervision of the Prosecutor's Office over the execution of the law"; modern problems of the legislation of the Republic of Kazakhstan;</p> <p><b>Be able to:</b> apply their knowledge in practice; navigate the system of regulatory legal acts of the Republic of Kazakhstan regulating this industry;</p> <p>The main forms of classes in the study of this course are lectures, seminars and practical classes, (trainings, situation analysis, solving practical problems, etc.)</p> <p>As a rule, lecture classes are held on the main topics of the course. The choice of seminars and practical classes may vary depending on the degree of preparedness of the trainees and the specific educational objectives of the educational institution.</p> <p><b>Own:</b> The main skills in the course of solving situational issues and tasks, to implement the acquired knowledge in practice.</p>
13	Criminal-legal and criminological characteristics of organized crime and corruption	5	Criminal law of the Republic of Kazakhstan (General part)	It is necessary for further practical activities and for studying for a master's degree	<p><b>The purpose of the study:</b> the students study the current criminal law legislation of the Republic of Kazakhstan, as well as criminology regulating criminal law activities. Formation of students ' deep theoretical knowledge and instilling on this basis strong skills and abilities necessary for them to effectively perform the tasks assigned to the judicial and law enforcement agencies</p> <p><b>Summary:</b> The main characteristics from the point of view of criminal law and criminology are revealed, the analysis of the problematic provisions of science is given, special attention is paid to the characterization and analysis of criminal legislation, judicial and prosecutorial-investigative practice. Problematic issues are discussed, incidents are resolved, procedural acts are drawn up.</p> <p><b>Expected result.</b></p> <p><b>To know:</b> systematic presentation by students of theoretical knowledge about the principles, categories and provisions of the subject "Criminal law and criminological characteristics of organized crime and corruption"</p> <p><b>Be able to:</b> development of the ability to skillfully interpret and apply the norms of the criminal law of the Republic of Kazakhstan, to qualify crimes, to conduct criminological analysis;</p> <p><b>Own:</b> study of the problems arising in modern criminal law and criminology during the formation and construction of the rule of law relations in the Republic of Kazakhstan</p>
13	Criminal-legal and criminological characteristics of organized crime and corruption	5	Criminal law of the Republic of Kazakhstan (General part)	It is necessary for further practical activities and for studying for a master's degree	<p>The purpose of the study is to study the main provisions of the criminal policy of the Republic of Kazakhstan</p> <p><b>Summary:</b> The main provisions of the criminal policy of the Republic of Kazakhstan related to the execution of criminal penalties.</p> <p><b>Expected result:</b></p> <p><b>To know:</b> systematic presentation by students of theoretical knowledge about the principles, categories and provisions of the subject "Criminal law and criminological characteristics of organized crime and corruption"</p> <p><b>Be able to:</b> development of the ability to skillfully interpret and apply the norms of the criminal law of the Republic of Kazakhstan, to qualify crimes, to conduct criminological analysis;</p> <p><b>Own:</b> study of the problems arising in modern criminal law and criminology during the formation and construction of the rule of law relations in the Republic of Kazakhstan</p>

14	Participation of a lawyer in criminal matters	5	Criminal procedure law of the Republic of Kazakhstan (general part)	Industrial practice (III)	<p><b>The purpose of the study:</b> the formation of a comprehensive understanding of the organization and activities of the defense counsel in the criminal process, as well as the conditions for implementation and types of defense counsel.</p> <p>The tasks of the discipline are the development of normative sources that regulate the organization of defense, judicial practice related to the implementation of defense in criminal proceedings; - study of educational, theoretical and monographic literature on criminal procedure, advocacy and advocacy; - obtaining practical skills in drafting documents drawn up in the course of the activities of the defender; - mastering the technique of oral public speaking on relevant topics.</p> <p><b>To know:</b> the procedural order, the rights and obligations of the defender in the exercise of his functions, knowledge of the legal foundations, principles, areas of activity of the defender and understanding of the appointment of the defender to provide legal assistance to individuals and legal entities on a professional basis; the essence and content of the actions of the defender in the process of criminal proceedings; the organization and tactics of using evidence obtained by the defender in order to mitigate the defendant's guilt on criminal offenses.</p> <p><b>Be able to:</b> apply the norms of the CPC in the exercise of the functions of a defender in criminal cases. analyze the criminal procedure legislation; interpret and apply the norms of criminal procedure law in specific life situations (incidents); formulate and legally competently argue their position on the criminal case; methodologically correctly study the materials of the criminal case; perform investigative and other procedural actions.</p> <p><b>Own:</b> the main provisions and terms that the CPC faces when performing the functions of a criminal defense lawyer. skills in the field of legal and organizational and tactical bases of the defense in criminal cases, necessary for the performance of professional duties in the field of criminal law relations.</p>
14	Advocacy of the Republic of Kazakhstan	5	Criminal procedure law of the Republic of Kazakhstan (general part)	Industrial practice (III)	<p><b>The purpose of the study:</b> Expansion and deepening of the received in the system knowledge about the state of the current legislation that determines the place of the bar in the legal system of the state, the main tasks facing the modern advocacy, the state of the current legislation, the practice of its application and development prospects. The study of this discipline "Advocacy of the Republic of Kazakhstan" includes lecturing, consistent consolidation of theoretical knowledge with practical exercises, as well as independent work of students.</p> <p><b>Brief content:</b> The discipline "Advocacy of the Republic of Kazakhstan" is intended for study by students of the Faculty of Law. It reflects the main requirements for the level of preparation of a bachelor of law in the specialty "Jurisprudence" at the present stage. EMCD is designed for the effective development of the discipline "Advocacy of the Republic of Kazakhstan", allows students to get a systematic approach to the study of the current legislation, which determines the place of the bar in the legal system of the state and regulates the activities of the bar in the Republic of Kazakhstan.</p> <p><b>Expected Result:</b></p> <p><b>To know:</b> Obtaining knowledge about other features of the lawyer's law enforcement activities in the field of jurisdictional proceedings as a professional representative: obtaining knowledge about the methodology of drafting procedural acts and other documents in the implementation of legal assistance, followed by consolidation in practical skills.</p> <p><b>Be able to:</b> Development of the ability to professionally assess a situation that is legally significant for the jurisdictional process and make a law enforcement decision corresponding to it as a professional subject: systematization of knowledge about the organizational and legal foundations of advocacy; analysis of regulations establishing the legal regulation of the lawyer's activities.</p> <p><b>Own:</b> Familiarization with the peculiarities of advocacy as a defender, representative of the victim, civil plaintiff, civil defendant, private prosecutor.</p>

15	Electronic format of pre-trial investigation	4	Criminal procedure law of the Republic of Kazakhstan (general part)	Final examination	<p><b>The purpose of the study:</b> The purpose of the discipline is to consolidate the theoretical foundations of digitalization of criminal procedural activities, to acquire practical skills that allow students to correctly navigate in the professional environment related to organizational and legal issues of conducting criminal proceedings in classical and electronic format at the stage of pre-trial investigation.</p> <p><b>Summary:</b> The educational subject is aimed at developing stable knowledge and skills related to the features of electronic document management in criminal proceedings at the stage of pre-trial investigation. During the training process, the student must master the skills to independently and procedurally correctly draw up protocols and decisions in criminal cases in electronic format.</p> <p><b>Expected result:</b></p> <p><b>To know:</b> The fundamental and applied principles of conducting criminal proceedings, the rules and procedure for the established electronic document management in criminal cases at the stage of pre-trial investigation.</p> <p><b>To be able to:</b> Correctly navigate the criminal procedural environment associated with the consolidation of criminal case materials, independently make and make procedural decisions in the form of a resolution, professionally and competently enter the production of investigative actions into the protocol of the electronic format of the pre-trial investigation.</p> <p>Possess: Professional skills that allow students to competently follow the criminal procedure form and structure to master the techniques and methods of conducting criminal proceedings.</p> <p>Competencies: System-forming</p>
15	International cooperation in criminal matters	4	Criminal procedure law of the Republic of Kazakhstan (general part)	Final examination	<p><b>The purpose of the study:</b> mastering students with an integral system of knowledge in the field of legal regulation of the monetary system of the Republic of Kazakhstan</p> <p><b>Abstract:</b> The monetary system of the state. Concept, subject and system of legal regulation of the monetary system of the Republic of Kazakhstan.</p> <p><b>Expected result:</b></p> <p><b>To know:</b> the basic principles of international law and their application in the criminal process of the Republic of Kazakhstan; legal regulation of international cooperation in the field of legal assistance.</p> <p><b>Be able to:</b> solve legal problems arising in the process of interaction with law enforcement agencies of other states in the field of combating crime. Analyze and systematize the collection of operational-search data and, on their basis, be able to output operationally significant information for processing and using the results of operational-search activities as evidence in criminal cases, on the basis of theoretical research and practical skills, they were able to distinguish special operational-search activities from covert investigative actions.</p> <p><b>Own:</b> interpret and apply the norms of international treaties and Kazakh legislation on legal assistance; assess practical situations on legal assistance in criminal cases; On the basis of studying the theoretical provisions of the discipline, students should master techniques and methods for conducting and critical analysis of operational investigative measures. They could state concretely and clearly about the essence of the production and use of operational search materials during the investigation of criminal cases, set out their conclusions and proposals on the methodology and tactics of the production of general and special operational search measures to analyze law enforcement practice on issues included in the subject of discipline.</p>
<b>PROFILING DISCIPLINES</b>					
<b>Components of choice (CCh)</b>					
1	Forensic technology	3	Theory and history of state and law	Criminalistics	<p><b>The purpose of the study:</b> students acquire knowledge about the implementation of criminal procedural activities in the pre-trial investigation of a criminal case and the use of scientific and special knowledge for the production of investigative and secret investigative actions</p> <p><b>Summary:</b> the article reveals the features of the application and use of special scientific knowledge in criminal cases, through the appointment and production of forensic examinations, consultations, etc. The obtained results of consultations or the conclusion of a forensic examination are attached to the materials of the criminal case and used in the subject of proof.</p> <p><b>Expected result:</b></p> <p><b>To know:</b> to justify and make procedural and tactical decisions; - to</p>

					<p>organize the work of the investigative task force conducting an inspection of the scene of the incident, including during the production of other investigative and covert investigative actions; - apply technical and forensic methods and means of detecting, fixing and removing trace information and traces of crimes; - study the sources of investigative and evidentiary information and use them in pre-trial disclosure and investigation of crimes; - determine the initial investigative situations, analyze and evaluate the factors influencing them; - interact with the bodies of inquiry and officials of other law enforcement agencies: the court, the prosecutor's office, the police of internal affairs, the economic investigation service, the anti-corruption service, national security, etc.</p> <p><b>Be able to:</b> to implement the acquired scientific, technical and criminalistic knowledge and skills in the course of criminal proceedings; to analyze and evaluate investigative, investigative and evidentiary information on unsolved criminal cases; to draw up procedural documents in accordance with the requirements of criminal procedural legislation and recommendations of criminalistic tactics and methodology.</p> <p>Own: forensic techniques and scientific and practical experience in identifying, securing and initial investigation of trace information in criminal, civil and administrative cases. Including preparing materials, documents and items for forensic research in scientific and forensic laboratories. To master the basic skills in solving situational issues and tasks, to implement the acquired knowledge in the legal practice of pre-trial investigation bodies.</p>
1	Fundamentals of forensic methodology	3	Theory and history of state and law	Criminalistics	<p><b>The purpose of the study:</b> students acquire knowledge about the implementation of criminal procedural activities in the pre-trial investigation of a criminal case and the use of scientific and special knowledge for the production of investigative and secret investigative actions</p> <p><b>Summary:</b> the article reveals the features of the application and use of special scientific knowledge in criminal cases, through the appointment and production of forensic examinations, consultations, etc. The obtained results of consultations or the conclusion of a forensic examination are attached to the materials of the criminal case and used in the subject of proof.</p> <p><b>Expected result:</b></p> <p><b>To know:</b> methods and means of preliminary verification of facts and events on criminal offenses; to justify and make criminal procedural and tactical decisions; to organize the work of the investigative task force conducting an inspection of the scene of the incident, including during the production of other investigative and covert investigative actions; to apply technical and forensic methods and means of detection, fixation and seizures of trace information and traces of crimes; sources of investigative (secret) and evidentiary information and use them in pre-trial disclosure and investigation of crimes; determine the initial typical investigative situations, analyze and evaluate the factors influencing them; interact with the bodies of inquiry and officials of other law enforcement agencies: the court, the prosecutor's office, the economic investigation service, the anti-corruption service, national security and other state and non-governmental organizations and institutions.</p> <p><b>Be able to:</b> use the help of citizens, mass media in the pre-trial investigation of crimes; analyze and evaluate investigative (secret) and evidentiary information on unsolved criminal cases; compile criminal procedural documents in accordance with the requirements of criminal procedural legislation and recommendations of criminalistics.</p> <p><b>Own:</b> basic skills in the course of solving situational issues and tasks, implement the acquired knowledge in the legal practice of pre-trial investigation bodies. Including the "Fundamentals of Criminalistic Methodology" will also allow you to master practical knowledge that is implemented during the pre-trial investigation of criminal cases during the production of investigative and covert investigative actions, procedural actions and criminal procedural coercive measures using forensic tactics and techniques. The study of the basics of criminalistic methodology will allow students to master the methods of scientific research and academic writing in order to further apply them in legal practice when drafting criminal procedural, civil procedural and administrative procedural documents.</p>
2	Operational-search activity	5	Criminal procedure law of the Republic of	Activities of the bodies of inquiry in the course of pre-trial	<p><b>The purpose of the study:</b> mastering students with an integral system of knowledge in the field of legal regulation of the monetary system of the Republic of Kazakhstan</p> <p><b>Abstract:</b> The monetary system of the state. Concept, subject and system</p>

			Kazakhstan (general part)	investigation	of legal regulation of the monetary system of the Republic of Kazakhstan. <b>Expected result:</b> <b>To know:-</b> general theoretical provisions of the course "Operational investigative activities", to expand knowledge on the most important issues of operational investigative activities and related disciplines, to have an idea of the system and structure of the ORD and its individual institutions. <b>Be able to:</b> analyze and systematize the collection of operational-search data and, on their basis, be able to output operationally significant information for processing and using the results of operational-search activities as evidence in criminal cases, on the basis of theoretical research and practical skills, they were able to distinguish special operational-search activities from covert investigative actions. <b>Own:</b> based on the study of the theoretical provisions of the discipline, students should master the techniques and methods for conducting and critically analyzing operational investigative measures. They could state concretely and clearly about the essence of the production and use of operational-search materials during the investigation of criminal cases, set out their conclusions and proposals on the methodology and tactics of the production of general and special operational-search measures
2	Interaction of the investigator with the operational-search services	5	Criminal procedure law of the Republic of Kazakhstan (general part)	Activities of the bodies of inquiry in the course of pre-trial investigation	<b>The purpose of the study:</b> mastering students with an integral system of knowledge in the field of legal regulation of the monetary system of the Republic of Kazakhstan <b>Abstract:</b> The monetary system of the state. Concept, subject and system of legal regulation of the monetary system of the Republic of Kazakhstan. <b>Expected result:</b> <b>To know:</b> general theoretical provisions of the course "Interaction of the investigator with operational search services", the essence of the interaction of the investigator with operational search services and the role of the investigator of operational search activities in the field of combating crime. <b>Be able to:</b> Correctly apply the legal norms in the field of interaction of the investigator with the operational search services. Independently supplement and develop their knowledge and skills, taking into account changes in legislation, as well as improve skills in the practical application of legal norms in the field of interaction of the investigator with operational search services. <b>Own:</b> based on the study of the theoretical provisions of the discipline, students should master the basic skills of drafting procedural documents in the field of interaction of the investigator with operational search services and techniques and methods for conducting and critical analysis during interaction.
3	Theory of judicial evidence	5	Criminal procedure law of the Republic of Kazakhstan (general part)	It is necessary for further practical activities and for training in magistracy and doctoral studies	<b>The purpose of the study:</b> mastering students with an integral system of knowledge in the field of legal regulation of the monetary system of the Republic of Kazakhstan <b>Abstract:</b> The monetary system of the state. Concept, subject and system of legal regulation of the monetary system of the Republic of Kazakhstan. <b>Expected result:</b> <b>To know:-</b> the fundamentals of the theory of judicial evidence and its significance in establishing objective truth in a case, determine the content of the subject, contributing to the disclosure of the theory of evidentiary law, the conceptual and categorical apparatus of individual institutions of proof and proof. <b>Be able to:</b> apply the acquired knowledge and practical experience of law enforcement activities in the field of criminal proceedings, independently assess the results of actions and decisions of authorized bodies of pre-trial investigation, the judiciary. <b>Own:</b> practical skills that allow you to fully use the acquired skills in legal practice. In particular, to conduct a legal analysis of the relevance and admissibility of evidence in criminal cases, to give conclusions on the legality and validity of the production of operational investigative measures, to make a decision on using the results of investigative actions and court decisions as evidence.
3	Activities of pre-trial investigation bodies	5	Criminal procedure law of the Republic of Kazakhstan (general	It is necessary for further practical activities and for training in magistracy and doctoral studies	<b>The purpose of the study:</b> The bodies of inquiry of the Republic of Kazakhstan are a state body of great importance in ensuring law and order in the country, preventing and detecting criminal offenses. One of the main activities of the body of inquiry is the implementation of pre-trial investigation. The course "Activities of the bodies of inquiry in pre-trial investigation" is the

			part)	<p>formation of knowledge about the directions and significance of the pre-trial activities of the bodies of inquiry and the formation of the ability to apply the knowledge gained in future professions.</p> <p><b>Summary:</b> The study of this discipline is aimed at students obtaining professional knowledge, skills, and abilities in the field of pre-trial investigation. In the process of mastering the course, students should develop a holistic understanding of the main functions, forms, methods and methods of conducting investigative actions and operational search activities during the detection and investigation of criminal offenses.</p> <p><b>Expected results:</b></p> <p><b>To know:</b> the concept of pre-trial investigation bodies, normative legal acts defining the competence of pre-trial investigation bodies, the structure and main areas of activity, forms of pre-trial activity, the ratio of pre-trial investigation bodies with other state bodies</p> <p><b>Be able to:</b> work with normative legal acts defining the functions and competencies of pre-trial investigation bodies, independently make legal decisions in protecting the rights of citizens, and legally correctly analyze facts and events.</p> <p><b>To possess:</b> to apply normative legal acts in accordance with the law, to apply the acquired knowledge exclusively for the purposes of law and order, protection and restoration of the rights of citizens and society.</p> <p><b>Competencies:</b> special</p>
4	Criminalistics	5	Criminal procedure law of the Republic of Kazakhstan (special part)	<p><b>Industrial practice (III)</b></p> <p><b>The purpose of the discipline</b> is to give the student the methodological recommendations necessary for the student in his practical activities related to the investigation of crimes.</p> <p><b>Summary:</b> Legislation regulating the powers of participants in criminal proceedings; departmental, interdepartmental and other legal acts regulating the activities of the preliminary investigation bodies; investigative and judicial practice of investigating various types of criminal offenses.</p> <p><b>Expected result:</b></p> <p><b>To know:</b> methods and means of preliminary verification of statements about crimes; substantiate and make procedural and tactical decisions; organize the work of the investigative task force conducting an inspection of the scene of the incident, including during the production of other investigative and covert investigative actions; apply technical and forensic methods and means of detecting, fixing and removing trace information and traces of crimes; study sources of investigative and evidentiary information and use them in pre-trial disclosure and investigation of crimes; determine the initial investigative situations, analyze and evaluate the factors influencing them; interact with the bodies of inquiry and officials of other law enforcement agencies: the court, the prosecutor's office, the economic investigation service, the anti-corruption service, national security, etc.</p> <p><b>Be able to:</b> to use the assistance of citizens and mass media in the pre-trial investigation of crimes; to analyze and evaluate investigative and evidentiary information on unsolved criminal cases; to draw up procedural documents in accordance with the requirements of criminal procedure legislation and the recommendations of criminalistics.</p> <p>The main forms of classes in the study of this course are lectures, laboratory, seminars and practical classes, (trainings, analysis of the educational investigative situation, solving practical problems, etc.)</p> <p>As a rule, lectures are held on the main topics of the course. The choice of laboratory, seminar and practical classes may vary depending on the degree of preparedness of the trainees and the specific educational objectives of the educational institution. As a result of studying the course, students take an exam.</p> <p><b>Own:</b> the main skills in the course of solving situational issues and tasks, to implement the acquired knowledge in the legal practice of pre-trial investigation bodies.</p>
4	Forensic tools and methods of investigation of crimes	5	Criminal procedure law of the Republic of Kazakhstan (special part)	<p><b>Industrial practice (III)</b></p> <p><b>The purpose of the study:</b> is to study the theoretical and applied foundations of technical and forensic examination as a type of forensic examination. To acquaint students with the concept, subject, objects, tasks and methods of technical and forensic examination; to form an understanding of special knowledge in the field of technical and forensic examination; to develop the skills of independent production of technical and forensic examination of documents, the preparation and execution of an expert opinion.</p> <p><b>Summary:</b> theoretical foundations and prospects for the development of technical and forensic expertise. Methods of technical and forensic examination. Modern possibilities of technical and forensic research of details and materials of documents. The study of documents made with</p>

				<p>the help of character printers.</p> <p><b>Expected Result.</b></p> <p><b>To know:</b> methods and means of preliminary verification of statements about crimes; substantiate and make procedural and tactical decisions; organize the work of the investigative task force conducting an inspection of the scene; apply technical and forensic methods and means of detecting, fixing and removing traces of crimes; study the sources of investigative and evidentiary information and use them in the disclosure and investigation of crimes; determine initial investigative situations, analyze and evaluate the factors influencing them; interact with the bodies of inquiry and officials of other law enforcement agencies.</p> <p><b>Be able to:</b> to use the assistance of citizens and mass media in the investigation of crimes; to analyze and evaluate investigative and evidentiary information on unsolved criminal cases; to draw up procedural documents in accordance with the requirements of criminal procedure legislation and the recommendations of criminalistics.</p> <p>The main forms of classes in the study of this course are lectures, seminars and practical classes, (trainings, situation analysis, solving practical problems, etc.)</p> <p>As a rule, lectures are held on the main topics of the course. The choice of seminars and practical classes may vary depending on the degree of preparedness of the trainees and the specific educational objectives of the educational institution.</p> <p><b>Own:</b> the main skills in the course of solving situational issues and tasks, to implement the acquired knowledge in practice.</p>
5	Investigation of serious types of crimes	3	Criminal procedure law of the Republic of Kazakhstan (general part)	<p>Activities of the bodies of inquiry in the course of pre-trial investigation</p> <p><b>The purpose of the study:</b> mastering students with an integral system of knowledge in the field of legal regulation of the monetary system of the Republic of Kazakhstan</p> <p><b>Abstract:</b> The monetary system of the state. Concept, subject and system of legal regulation of the monetary system of the Republic of Kazakhstan.</p> <p><b>Expected result:</b></p> <p><b>To know:</b> the doctrine of dialectical-materialistic epistemology; The establishment of signs of a specific type of composition of a criminal offense and a criminal offense as a crime and the time of the occurrence of bringing the subject of the crime to criminal responsibility; Knowledge and procedure for identifying signs and events of criminal offenses, conducting covert investigative actions (operational investigative measures); - methods and means of preliminary verification of statements about crimes; - substantiate and make procedural and tactical decisions; - to organize the work of the investigative task force conducting an inspection of the scene of the incident, including during the production of other investigative and covert investigative actions; - apply technical and forensic methods and means of detecting, fixing and removing trace information and traces of crimes; - study the sources of investigative and evidentiary information and use them in pre-trial disclosure and investigation of crimes; - determine the initial investigative situations, analyze and evaluate the factors influencing them; - interact with the bodies of inquiry and officials of other law enforcement agencies: the court, the prosecutor's office, the police of internal affairs, the economic investigation service, the anti-corruption service, national security, etc.</p> <p><b>Be able to:</b> to use the assistance of citizens and mass media in the pre-trial investigation of crimes; - to analyze and evaluate investigative and evidentiary information on unsolved criminal cases; - to draw up procedural documents in accordance with the requirements of criminal procedure legislation and the recommendations of criminalistics.</p> <p><b>Own:</b> the main skills in the course of solving situational issues and tasks, to implement the acquired knowledge in the legal practice of pre-trial investigation bodies.</p>
