**THE CATALOGUE OF ELECTIVE SUBJECTS**  
**6B01606 – «History»**  
**2 years Form of study: part - time**  
Year revenue - 2022

Semey 2022

Developed by the Department of History and Social Sciences and Humanities  
Considered at the meeting of the department

Reviewed and approved at the meeting of the Faculty 's Educational and  
Methodological Council

Protocol № \_\_5\_\_ " \_\_23\_\_ " \_\_05\_\_ 2022 G.

Approved at the meeting of the Educational and Methodological Council of the  
University

Protocol no. \_\_5\_\_ from " \_\_25\_\_ " \_\_05\_\_ 2022 G.

Elective course №	The name of subject	Number of credits	Pre requisites	Post requisites	Short description of the content, the aims of education, expected results
<b>BASIC DISCIPLINES</b>					
<b>Elective courses (EC)</b>					
<b>1</b>	History of the Ancient World	6	The basis for the stories of the schools	History of the Middle Ages,	<p><b>Contents:</b> This discipline develops principles and methods for ensuring the optimal state of the environment – natural, man-made, socio-economic, and cultural-for human health and life. The discipline examines the principles and rules of environmental protection and the rational use of its resources, as well as environmental awareness</p> <p><b>Expected result:</b></p> <p>To know: the main stages and patterns of development of society in the period of antiquity, the chronological framework of the era of the ancient world, the criteria of scientific periodization of the world historical process, the basic terminology of historical science, the main approaches to understanding the essence of historical processes and phenomena of antiquity; the main stages of the history of primitiveness, the genesis of economic, political and cultural development in the ancient world; driving forces and patterns the historical process, the most important achievements of the culture of the ancient era; apply knowledge and understanding of the civilizational approach to the study of the historical process, identify a system of complex dependencies and continuity of various types of civilizations, explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions;</p> <p>Be able to: analyze historical phenomena and processes in their economic, political, cultural manifestations; analyze the problems of the history of primitiveness, identify cause-and-effect relationships, common features and differences of compared historical processes and events; be able to select, analyze and interpret historical sources, historical facts, historical information when solving problems in the field of professional activity;</p> <p>Own: skills of studying and researching the main stages</p>

					<p>of historical development in the epochs of primitiveness; skills of identifying common and special in the history of Eastern and Western civilizations; comparative and systematic analysis of the historical process; research activities to study the main stages and patterns of development of society of the ancient world.</p> <p><b>Competence: Special competencies</b></p>
1	History of the Ancient East	6	The basis for the stories obscure and relevant schools	History of the Ancient World	<p><b>Content:</b> The history of the Ancient East is an integral part of the course of the history of the Ancient world, which forms students' understanding of the causes of the crisis of the primitive communal system and the transition of the ancient Eastern population to a slave-owning state and socio-economic formation. The course also shows various aspects of the spiritual culture of Ancient Eastern society in the context of mythology, literature, architecture, religious teachings, etc.</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>the main stages and patterns of development of society in the period of antiquity, the chronological framework of the era of the ancient world, the criteria of scientific periodization of the world historical process, the basic terminology of historical science, the main approaches to understanding the essence of historical processes and phenomena of antiquity; the causes of the crisis of the era of primitiveness and the transition of the ancient Eastern population to slave-owning statehood; the main patterns of the origin and development of Eastern civilizations; historical facts, events, content of socio-political and socio-economic processes; various aspects of the culture of ancient Eastern society; explain the mechanisms of formation and development of historical forms of statehood, the evolution of state and legal institutions; apply knowledge and understanding of the civilizational approach to the study of the historical process, identify a system of complex dependencies and continuity of various types of Eastern civilizations;</p> <p>Be able to:</p> <p>analyze historical phenomena and processes in their economic, political, cultural manifestations; analyze the problems of the history of the Ancient East, present and critically analyze information about the historical and cultural development of the ancient East and individual countries (regions); apply theoretical knowledge and understanding of the facts of the development of the historical process, be able to select, analyze and interpret historical sources, historical facts,</p>

				<p>historical information in solving problems in the field of professional activity; to identify cause-and-effect relationships, common features and differences of compared historical processes and events; to carry out a comparative analysis of historical facts, events and phenomena of public life of ancient Eastern states on the basis of historical sources;</p> <p>Own:</p> <p>possess the categorical and conceptual apparatus of historical disciplines (Oriental studies); the skills of using knowledge on current problems of the development of the ancient East; the skills of research activities to study the main stages and patterns of development of Eastern societies; the skills of identifying common and special in the history of Eastern and Western civilizations; the skills of comparative and systematic analysis of the historical process; the ability to critically comprehend events and phenomena of eastern historical epochs; the skills of studying scientific literature and its use in specific research; the ability to critically comprehend the events and phenomena of the ancient period of history.</p> <p><b>Competence: Special competencies</b></p>
2	Ancient History of Kazakhstan	6	The basis for the stories obshchobro zovatelnyh schools	<p>Medieval History of Kazakhstan</p> <p><b>Content:</b> The course of ancient history of Kazakhstan examines the formation and development of primitive society, the origin of the producing economy, changes in social relations, the organization of society, the development of cultural and economic ties of tribes, the action of factors that determined the progress of the Bronze Age, the history of the origin and community of tribes that left an original culture, the origin and development of nomadism, Scythian-Saka culture, the history of early state formations, Turkic states on the territory of Kazakhstan.</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>formation and development of archaeological cultures on the territory of ancient Kazakhstan, the origin of the producing economy, changes in social relations, the origin and development of nomadism, Scythian-Saka culture, the history of early state formations and Turkic states on the territory of Kazakhstan; basic terminology of historical science, basic approaches to understanding the essence of historical processes and phenomena of antiquity; knowledge and understanding of the civilizational approach to the study of the historical process, the system of complex dependencies and the continuity of various types of civilizations, explain the mechanisms of formation and development of</p>

				<p>historical forms of statehood, the evolution of state and legal institutions; historical facts, events, the content of socio-political and socio-economic processes in the ancient history of Kazakhstan;</p> <p>Be able to:</p> <p>analyze the problems of the ancient period of the history of Kazakhstan; analyze and compare the forms of organization and the evolution of the state and social structure at various stages of the ancient period of development of Kazakhstan; carry out a comparative analysis of historical facts, events and phenomena of public life based on historical sources; apply theoretical knowledge and understanding of the facts of the development of the historical process, be able to select, analyze and interpret historical sources, historical facts, historical information when solving problems in the field of professional activity;</p> <p>Own:</p> <p>categorical and conceptual apparatus of historical disciplines; skills of analysis of the main stages of the historical development of Kazakhstan in the ancient period of history; identification of common and special in the ancient history of Kazakhstan; comparative and systematic analysis of the historical process; research skills to study the main stages and patterns of development of society; the study of scientific literature and its use in educational and research work;</p> <p><b>Competence: Special competencies</b></p>
2	Ancient civilizations in world history	6	The basis for the stories obscheobrozovatelnyh schools	<p>History of the Ancient World,</p> <p><b>Content:</b> The course introduces the processes of the emergence and development of civilizations, the main theoretical problems of the history of the ancient world, the main historical facts, personalities, events and processes; key concepts and phenomena that characterize the historical originality of these epochs; the main trends of historical development and the specifics of the historical development of various regions of the world.</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>the history of the formation and development of civilizations, the main historical facts, events and processes; key concepts, phenomena characterizing the historical originality of ancient civilizations; the main trends of historical development and the specifics of the historical development of various regions of the world; criteria for scientific periodization of the world historical process, the basic terminology of historical science, the main approaches to understanding the essence of historical processes and phenomena; understand theoretical and</p>

				<p>methodological foundations of world historical science; the general picture of the world historical process with its regional and local features in the most ancient period; the driving forces and patterns of the historical process; the main facts and phenomena characterizing the integrity of the historical process,</p> <p>Be able to:</p> <p>to show and explain the history of the formation and development of civilizations, historical facts, events and processes that characterize the historical originality of ancient civilizations; to reveal historical phenomena and processes in their economic, political, cultural manifestations. to carry out a comparative analysis of historical facts, events and phenomena of public life on the basis of historical sources; to carry out the selection, analysis and interpretation of historical sources, historical facts, historical information in solving problems in the field of professional activity;</p> <p>Own:</p> <p>fundamentals of the analysis of the main stages of the historical development of ancient civilizations; identification of the common and special in the history of Eastern civilizations; comparative and systematic analysis of the historical process; primary research skills for the study of the main stages and patterns of development of society of the ancient world; the study of scientific literature and its use in educational and scientific activities; possess the basics and systematization of scientific research and publications;</p> <p><b>Competence: Special competencies</b></p>
3	Archeology	5	<p>The basis for the stories of the schools of the auxiliary disciplines</p> <p>Medieval History of Kazakhstan Auxiliary historical disciplines</p>	<p><b>Content:</b> The course of archeology as an academic discipline considers the concept of the subject and the methodology of studying the historical past of mankind from material sources. Students study a complex of material sources, which in archaeology include tools of production and material goods created with their help: buildings, weapons, household items, various jewelry and works of art - everything that is the result of human labor activity</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>the main stages and patterns of development of society in the ancient and medieval historical periods, chronological framework of historical epochs, criteria for scientific periodization of the world historical process; basic terminology of</p>

				<p>historical science, basic approaches to understanding the essence of historical processes and phenomena; the history of formation and development, tasks and methods of archaeology as a science, the place of archaeology in the system of historical sciences, archaeological periodization of history, typology of archaeological monuments, the main stages of archaeological research, methods of study and research of archaeological monuments;</p> <p>Be able to:</p> <p>analyze and explain meaningfully historical phenomena and processes in their economic, political, cultural manifestations; apply knowledge and understanding of the civilizational approach to the study of the historical process, identify a system of complex dependencies and continuity of various types of civilizations, explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions, sedentary and nomadic civilizations; apply knowledge of theoretical aspects of archaeology in the process of educational archaeological practice, methods of field research, identify and recognize archaeological monuments, draw up field documentation, date archaeological monuments;</p> <p>Own:</p> <p>possess the categorical and conceptual apparatus of historical disciplines; methods of historical analysis of the main stages and patterns of development of society in different historical periods; fundamentals of analysis of historical sources and documents, possess the basics and systematization of scientific research and publications; terminology of archaeological science, excavation research techniques, skills of working with tools, field camp arrangement, collection and processing, preservation archaeological finds, measurement and mapping of archaeological monuments, reconstruction of the past;</p> <p><b>Competence: Special competencies</b></p>
3	Archaeology Of Kazakhstan	5	The basis for the stories obscheobrozovatelnyh schools	<p>Medieval History of Kazakhstan Auxiliary historical disciplines</p> <p><b>Content:</b> The discipline examines the formation and development of the archeology of Kazakhstan, which was founded by V. V. Barthold, V. V. Radlov, Ch. Ch. Valikhanov, who made a scientific contribution to the study of Kazakh archaeological sites. The article also considers the Kazakh archeology in the Soviet period, when A. H. Margulan was the head of the Department of Archeology in the system of the Academy of Sciences of the Kazakh SSR. The modern Kazakh archaeological school is characterized by the</p>

					<p>results of its research in the context of the history of the material culture of the Great Steppe.</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>to know the main stages and patterns of development of society in the most ancient period of the history of Kazakhstan, the chronological framework of historical epochs, criteria for scientific periodization of the world historical process; basic terminology of historical science, basic approaches to understanding the essence of historical processes and phenomena; the history of formation and development, tasks and methods of archeology as a science, the place of archeology of Kazakhstan in the system of historical sciences, the history of the study of archaeological monuments of Kazakhstan, archaeological periodization of the history of ancient and medieval Kazakhstan, to know the typology of archaeological monuments in Kazakhstan, the main stages of archaeological research, methods of study and research of archaeological monuments;</p> <p>Be able to:</p> <p>analyze and explain meaningfully historical phenomena and processes in their economic, political, cultural manifestations; apply knowledge and understanding of the civilizational approach to the study of the historical process on the territory of Kazakhstan, identify a system of complex dependencies and continuity of various types of civilizations on the territory of Kazakhstan and Central Asia, explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions, settled and nomadic civilizations; apply knowledge of theoretical aspects of archaeology in the process of educational archaeological practice, methods of field and laboratory research, identify and recognize archaeological monuments, draw up field documentation, date archaeological monuments of Kazakhstan;</p> <p>Own:</p> <p>possess the categorical and conceptual apparatus of historical disciplines; methods of historical analysis of the main stages and patterns of development of society in the ancient and medieval periods of Kazakhstan; fundamentals of analysis of historical sources and documents, possess the basics and systematization of scientific research and publications; the terminology of archaeological science, the technique of excavation research, the skills of working with tools, arranging a field camp, collecting and</p>
--	--	--	--	--	---

					<p>processing, preserving archaeological finds, measuring and mapping archaeological monuments on the territory of Kaazakhstan, reconstructing the past</p> <p><b>Competence: Special competencies</b></p>
4	Medieval History of Kazakhstan	5	Ancient history of Kazakhstan	New history of Kazakhstan,	<p><b>Content:</b> It highlights the main periods and features of the historical process of the Middle Ages, shows the indissoluble connection between the ethno-political development of Kazakhstan in the late Medieval period with the previous Turkic period, with the process of Kazakhstan's entry into the Mongolian statehood, the formation of post-Mongolian state formations, shows the historical paths of the Kazakh people, its place in the world and Eurasian historical and cultural integration processes, features of the national culture of the Kazakhs.</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>the main stages and patterns of development of society in the medieval period of Kazakhstan, the chronological framework of the Middle Ages, to know the basic terminology of historical science, the main approaches to understanding the essence of historical processes and phenomena of medieval history of Kazakhstan; the overall picture of the world historical process with its regional and local features during the Middle Ages; apply knowledge and understanding of the civilizational approach to the study of the historical process, identify a system of complex dependencies and continuity of various types of civilizations, explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions, settled and nomadic civilizations; the processes of Kazakhstan's entry into the Mongolian statehood, the history of post-Mongolian state formations, the problems of the ethnogenesis of Kazakhs and the peculiarities of the formation of the Kazakh nationality and statehood, its place in the world and Eurasian historical and cultural integration processes, the specific features of the formation of the national culture of the Kazakh people;</p> <p>Be able to:</p> <p>to show the inextricable link between the ethnopolitical development of Kazakhstan in the late medieval period with the preceding Turkic period; to have a scientific understanding of this period of historical development, to analyze the historical past on the basis of the principle of historicism; to have an idea of the sources on the medieval history of Kazakhstan; to put into practice the knowledge gained on the socio-</p>

				<p>economic, political and cultural development of medieval Kazakhstan; to apply knowledge and understanding of the civilizational approach to the study of the medieval historical process, to identify a system of complex dependencies and continuity of various types of civilizations, to explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions, settled and nomadic civilizations; to select, analyze and interpret historical sources, historical facts, historical information when solving problems in the field of professional activity;</p> <p>Own:</p> <p>skills of applying the scientific categorical and conceptual apparatus of historical science; skills of identifying common and special in the history and development of nomadic civilizations; methods of historical description and analysis of causes and consequences of events in the history of medieval Kazakhstan, methods of historical analysis of the main stages and patterns of development of society during the Middle Ages; fundamentals of analysis of historical sources and documents, fundamentals of systematization of scientific research and publications; skills of comparative and systematic analysis of the historical process; the basics of research activity on the study of the main stages and patterns of development of Kazakh society, selection and study of scientific literature and its use in educational and research activities;</p> <p><b>Competence: Special competencies</b></p>
4	History of the Kazakh Khanate	5	Ancient History of Kazakhstan	<p>New history of Kazakhstan, Actual problems of national history</p> <p><b>Content:</b> Highlights the events in the dynamics of the main stages of the history of the Kazakh khanates, in the context of new conceptual approaches to the study of the history of the Kazakh Khanate, traces the stages of the formation of the Kazakh nation, socio-economic, political, cultural processes, reveals the role and place of the Kazakh people in the system of nomadic civilization; shows the evolution of the spiritual world of nomads and their contribution to the civilization of the Eurasian world.</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>the main stages and patterns of development in the history of the Kazakh Khanate, in the context of new conceptual approaches, the stages of the formation of the Kazakh nation, socio-economic, political, cultural processes, the political history of the Kazakh Khanate, the role and place of the Kazakh people in the system of nomadic civilization; the processes of the colonization</p>

				<p>movement of Russia, the results of colonization, its consequences; the evolution of the spiritual world of nomads and their contribution to the civilization of the Eurasian world; apply knowledge and understanding of the civilizational approach to the study of the historical process, explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions.</p> <p>Be able to:</p> <p>analyze the historical past on the basis of the principle of historicism, apply in practice the knowledge gained on the socio-economic, political and cultural development of Kazakhstan, identify cause-and-effect relationships of events; carry out a comparative analysis of historical facts, events and phenomena of public life based on historical sources; navigate in modern historical literature, characterize the principles and guidelines of new methodological approaches; to carry out the selection, analysis and interpretation of historical sources, historical facts, historical information when solving problems in the field of professional activity; to compare and analyze historical facts in their connection with the world-historical process.</p> <p>Own:</p> <p>skills of applying the scientific categorical and conceptual apparatus of historical science; skills of identifying common and special in the history and development of nomadic civilizations; methods of historical description and analysis of causes and consequences of events in the history of the Kazakh Khanate, methods of historical analysis of the main stages and patterns of development of Kazakh societies; fundamentals of analysis of historical sources and documents, fundamentals of systematization of scientific research and publications; skills of comparative and systematic analysis of the historical process; fundamentals of research activity on the study of the main stages and patterns of development of Kazakh society, selection and study of scientific literature and its use in educational and research activities; skills of independent and research activities using the latest theoretical, conceptual and methodological approaches;.</p> <p><b>Competence: Special competencies</b></p>
5	History of the Middle Ages	5	Ancient world history	<p>The history of the countries</p> <p><b>Content:</b> He gives an idea of the genesis of feudalism in the Middle Ages, its disintegration and information about the development of capitalist relations, examines the political development, social system and culture of states from the 5th to the 17th centuries. The history of</p>

of the East and West in modern times,

medieval Europe forms an understanding of the laws of the historical process and the cause-and-effect relations of the genesis of feudal society and the state after the collapse of the Roman Empire in 476 and the formation of national European states, which passed through the stages of feudal fragmentation, centralization, class monarchy and absolute monarchy from the 5th to the 17th centuries.

**Expected result:**

To know:

the periodization of the history of the Middle Ages and the main directions of the development of medieval studies; the terminological apparatus used by medieval studies; the main types of medieval historical sources; to understand the specifics of working with them; the main facts of the history of the Middle Ages, the processes of the origin, formation, flowering and decomposition of feudal relations, the emergence of nationalities and nations, states of modern Europe, the genesis of capitalism and the preparation of the modernization process, formation of the basis of Christian doctrine and organization of Roman Catholic, Orthodox and Protestant churches; the most important achievements of medieval history; names and biographical information about outstanding historical figures; the main trends of the processes that took place in society, political institutions, economy, religion, culture, the development of structures of everyday life; to understand the historical and cultural originality of medieval civilization to represent its place and significance in the general historical process, the influence of the Middle Ages on modern socio-political realities; the main methodological concepts and research schools in the history of the Middle Ages.

Be able to:

to orient oneself in the main, most significant, modern methodological approaches to medieval history; to describe historical events, cultural monuments, comment on the main content of individual factors and phenomena of the history of the Middle Ages; to analyze, explain, evaluate historical facts and phenomena in the history of the Western European Middle Ages, to work with chronology;- work with a historical map; independently pose a research problem; demonstrate the ability and willingness to work with various types of historical sources, educational, methodological and scientific literature on the problems of the course, the performance of educational and research tasks,

				<p>independent search, processing and use of various types of information.</p> <p><b>Own:</b></p> <p>possess the categorical and conceptual apparatus of the historical discipline; competently reproduce scientific information about the subject of study, trace the cause-and-effect relationships of historical events and processes, identify the main trends of social development, determine their specifics, give an objective assessment taking into account the latest achievements of historical science; the basics of systematization of scientific research and publications; skills of comparative and systematic analysis of the historical process; the basics of research activity on the study of the main stages and patterns of development of medieval society, the selection and study of scientific literature and its use in educational and research activities</p> <p><b>Competence: Special competencies</b></p>
5	History of the Middle Ages of Europe	5	History of the Ancient East	<p>History of East and West countries in modern times,</p> <p><b>Content:</b> The history of medieval Europe forms an understanding of the laws of the historical process and the party-and-effect relations of the genesis of feudal society and the state after the collapse of the Roman Empire in 476 and the formation of national European states, which passed through the stages of feudal fragmentation, centralization, class monarchy and absolute monarchy from the 5th to the 17th centuries.</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>the main periods of European medieval history; the main facts and phenomena characterizing the integrity of the historical process, the driving forces and patterns of the historical process in Europe in the Middle Ages; the content of the evolution of Western European civilization in the Middle Ages based on the achievements of modern historical knowledge; the place of medieval man in the historical process, the most important parameters of his spiritual culture and value system formed in the course of historical development; to understand the significance of the spiritual heritage of medieval civilization.</p> <p>Be able to:</p> <p>to orient oneself in the issues of periodization and chronology of the Middle Ages, economic, social and political history; to analyze historical events, establish cause-and-effect relationships; to identify common features and differences of historical phenomena and processes being compared; to draw lessons from historical events; to formulate and justify one's position on the key problems of the development of world</p>

				<p>civilizations during the Middle Ages; to orient oneself in specialized literature on the profile, competently refer the educational and scientific literature on the subject; apply the acquired knowledge in solving pedagogical, educational, methodological and scientific tasks;</p> <p>Own:</p> <p>to identify the civilizational features of the development of Western European countries in the V–XVII centuries; to comprehend the place and role of the medieval civilization of Western Europe in the history of mankind; to possess a system of knowledge about the main stages of development and the most important events of world history in the Middle Ages; to realize the place and role in the world history of Western European civilization, to understand the general and special in their development, the main complexes of historical sources on the history of individual countries and regions in the Middle Ages; the basics of systematization of scientific research and publications; the skills of comparative and systematic analysis of the historical process; the basics of research activities for the study of the main stages and patterns of development of medieval society, the selection and study of scientific literature and its use in educational and research activities</p> <p><b>Competence: Special competencies</b></p>
6	Auxiliary historical discipline		Archaeology	<p>Fundamentals of scientific research</p> <p><b>Contents:</b> Auxiliary historical disciplines combine sciences that help to comprehensively study the historical source, to give maximum information about its origin. Each has its own field of research and develops specific methods and techniques in order to solve the problems of mainly external criticism of a certain type of source. They have both an independent value in the study of the historical process, and help to solve the problems of source criticism.</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>the history of the emergence and development of special historical disciplines, the stages of their formation and modern state; the basic concepts of the studied disciplines, their specifics and application in the learning process; the subject of research of each special historical discipline, the features of the disciplinary structure of modern historical science and the place of special historical disciplines in it ;</p> <p>Be able to:</p> <p>apply basic research methods of special historical disciplines in the process of working on sources; analyze the information obtained in the study of</p>

				<p>special historical disciplines and link them with the real historical process, analyze historical problems, establish cause-and-effect relationships; identify common features and differences of historical processes and events being compared; historical sources, establish cause-and-effect relationships; work with paleographic, metrological and chronological material.</p> <p>Own:</p> <p>general professional knowledge of the theory and methods of historical research; the ability to understand, critically analyze and present basic historical information;</p> <p>skills of working with educational and methodical literature, with historical sources (material and written); necessary theoretical knowledge for the passage of archaeological, archival and museum practices; principles and methods of selection and systematization of archival documents;</p> <p><b>Competence: Special competencies</b></p>
6	Historical geography	History of the Ancient World Ancient History of Kazakhstan	Fundamentals of scientific research	<p><b>Content:</b> Historical geography is a branch of historical science that studies the main characteristic features of the geographical, spatial side of the historical process. It concretizes our ideas about historical events and phenomena, connects them with certain territories, studies the geography of the historical past of humanity, including in terms of interaction and mutual influence of nature and society. In other words, historical geography is the geography of a certain territory at a certain stage of the historical development of its population</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>the main stages of the development of historical geography and modern problems of its development; the place of historical and geographical research in historical and geographical science; patterns of spatial and historical development, the problems of the main branches of historical geography, directions of practical use of historical and geographical research; stages of the development of the earth's territory by human society, the formation of the world map in various historical epochs; the history of the formation and the development of human society in close connection with the geographical, climatic and economic environment.</p> <p>Be able to:</p> <p>make historical and geographical characteristics of regions; carry out historical and geographical studies of territories; explain the reasons for the reevaluation of the territory; take inventory of historical and cultural landscapes for the purpose</p>

				<p>of protection and museification; make historical and geographical reviews; critically approach the content of sources and scientific literature on the discipline;</p> <p>Own:</p> <p>general professional knowledge of the theory and methods of historical and geographical research; methodology of historical and geographical zoning and compilation of historical and geographical maps; methods of reconstruction of the past interaction of society and nature; methodology of inventory and museification of historical and cultural landscapes</p> <p><b>Competence: Special competencies</b></p>
7	Basics of museology and archival studies	5	Archeology  Fundamentals of scientific research	<p><b>Content:</b> Studies museum business, history and formation of archival business. The purpose of the discipline is to study the features of the functioning of museums and archives as a socio-cultural phenomenon of human society. Students study the development of museums and archives as a social institution in foreign and domestic culture. Students are also introduced to the main stages of practical work in museums and archives.</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>to master the basics of archival science and museology; the history and organization of archival and museum business, principles, methods of research work in archives and museums; theory and methodology of archival and museum business; archival law and archival legislation; management and marketing in archives and museums; basic methods, tools for organizing and conducting research in the field of archival science and museology; understand the goals, methodology and methods of professional activity of an archivist and museologist; use fundamental knowledge of archival and museology, know methods of information protection; basic concepts and theoretical research in archival science and museology; methods of analysis and classification of conceptual and theoretical research in museology; fundamentals of museology; the main stages and events of the world and national history of museology; fundamentals of methodological work in the field of broadcasting and popularization of professional knowledge and skills.</p> <p>Be able to:</p> <p>to apply in practice normative acts in the field of archival affairs and; to use in professional activity the conceptual apparatus of archival science and museology; to conduct an examination of the value of documents, prepare them for archival</p>

				<p>storage or destruction; to identify, select materials for compiling collections of historical documents; to communicate professional information to specialists and consumers of services; to use theoretical knowledge and research methods on practice; design, construct professional activities, carry out diagnostics, evaluate and adjust the results. to use archive materials in the process of scientific research; to apply knowledge about the basics of modern museology, to use knowledge of the main stages of the development of museology; knowledge about the processes of formation and development of the main trends in the field of museology; to use in practice knowledge of techniques and technologies for the design of exhibitions and art expositions; interpret information obtained as a result of their own observations or their own search activities in the field of museology via the Internet;</p> <p>Own:</p> <p>methods of information protection; examination of the value of documents, research work in archives; methods of archival work; diagnostics and evaluation of documents; methods of work in archives of republican, regional and local significance; skills of analysis of museum artifacts (in written and oral form); presentation of research results in the form of a report, abstract; techniques of presentation of research results; independent acquisition of new knowledge in the field of museology; analysis of significant problems of modern museology; comparison and evaluation of domestic and foreign samples of museum material;</p> <p><b>Competence: Special competencies</b></p>
7	History of museums in the world	5	Archeology History of the Ancient World	<p>Fundamentals of scientific research</p> <p><b>Content:</b> It provides information on the formation of museum studies, theoretical and practical information about the museum collections and exhibits of the world's leading museums. Studies museum business, history and evolution of museum business. Students receive information about museums in the context of the history of national and world culture. The role of museum artifacts as objective sources in the reconstruction of historical events and facts is also shown.</p> <p><b>Expected result:</b></p> <p>To know:</p> <p>the main stages and patterns of the emergence and development of the world's leading museums in the context of global trends, the dynamics of the formation of the museum as a cultural form in a set of countries, the patterns of formation and evolution of the museum as a socio-cultural institution from ancient times to the present; the</p>

				<p>main prerequisites and conditions and components of the process of formation of museums; the typology of museums in their historical dynamics; the stages of formation and collection the composition of the largest museum collections in the world (Europe, Asia, Africa, America), the purpose of the museum and its functions in different eras; the processes of formation and dynamics of the main directions of museum activity (preservation, educational, educational, etc.), the social functions of museum institutions as institutions of social memory and storage of cultural experience, carrying out specific activities for the acquisition, storage, restoration and publication of cultural monuments;</p> <p>Be able to:</p> <p>to orient oneself in the diversity of cultural and historical epochs; to orient oneself in the typological features of the museums of the world; in the activities of the leading museums of the world, their specifics, diversity of forms of cultural contacts; to apply the knowledge gained in the development of socio-cultural projects; to show the importance of historical experience for improving the modern theory and practice of domestic museum business; to analyze the facts of the history of museums of the world from the standpoint of patterns of the emergence and development of museum business in the context of global trends;</p> <p>Own:</p> <p>skills of analysis of museum artifacts (in written and oral form); presentation of research results in the form of a report, abstract; techniques of presentation of research results; independent acquisition of new knowledge in the field of museology; analysis of significant problems of modern museology; comparison and evaluation of domestic and foreign samples of museum material; ability to apply theoretical foundations and methods of historical and cultural and museological knowledge in the study of modern museums and objects of cultural and natural heritage;</p> <p><b>Competence: Special competencies</b></p>
8	Fundamentals of scientific research	5	Archeology, the basics of museology and archivalistics	<p>The history of the countries of the East and West in modern times Modern history of</p> <p><b>Content:</b> The discipline "Fundamentals of Scientific Research" involves familiarizing students with the specifics of research work, understanding the logic of the research process, mastering the methods of research work, and developing skills in working with scientific literature. The discipline forms the students' system of theoretical and practical knowledge, skills and abilities necessary for use in the process</p>

				<p>Kazakhstan</p> <p>of scientific research.</p> <p><b>Expected result</b></p> <p>To know:</p> <p>the logic of scientific research, procedures and levels of scientific work; methods of scientific research, the scope and features of their application, the importance of ideological positions in scientific research; the essence of science, scientific directions and scientific results; basic theoretical provisions, laws, principles, terms, concepts, processes, methods, technologies, tools, operations for the implementation of scientific standards and regulations for the design of research results, preparation of scientific reports, publications for seminars and conferences; general methodology of scientific design and creativity; procedures for testing the results of scientific research.</p> <p>Be able to:</p> <p>to designate the object and subject of scientific research, to pose problems, to find facts, to build hypotheses and their proofs; to orient oneself in the main methodological and ideological problems; to perform the procedure of setting and solving scientific problems; to be able to justify the relevance of the chosen topic, to formulate and solve problems arising in the course of research activities, to choose the necessary research methods and apply them, to make an individual work plan; to carry out the selection of material for scientific research (thesis, systematize literature, work with various sources of information, compile bibliographic lists, apply theoretical knowledge. to build the structure of scientific work (thesis), set tasks and find ways to solve them, perform computer layout of scientific work (thesis), implement verbal speech.</p> <p>Own:</p> <p>the skills of choosing a scientific research topic, collecting and processing information, the basic rules for taking notes of scientific literature, the methodology of conducting scientific research; professional vocabulary; conceptual and categorical apparatus, the culture of presentation of the material and the skills of scientific polemics, the use of scientific literature in the process of creating a scientific text. skills to study methods of planning and organizing scientific research; conducting the initial stages of scientific research, selecting the necessary bibliographic publications.</p> <p><b>Competence: Special competencies</b></p>
