ALIKHAN BOKEIKHAN UNIVERSITY

Faculty of information technology and economics Department of business and management

CATALOGUE OF THE ELECTIVE COURSES

6B04116 Economics

Year ofentrance-2023

Developed by the department of "Business and management"

Discussed and approved at the meeting of the department of Business and management (protocol N_0 8 of april 13, 2023)

Reviewed and recommended for approval at a meeting of the Academic quality council of the faculty (protocol N_0 3 of may 3, 2023)

Reviewed and recommended for approval at a meeting of the educational and methodological council of the university (protocol N_0 5 of may 25, 2023)

Student's Memo

Dear student of "ALIKHAN BOKEIKHAN UNIVERSITY", a catalog of elective disciplines is offered to your attention. This is a systematic list of all optional academic subjects with a brief description. It is designed so that you can quickly, conveniently and comprehensively form an individual learning trajectory. This is an assistant in creating your own curriculum.

In accordance with the credit technology of education, all academic disciplines are divided into three cycles: general education disciplines (GED), basic disciplines (BD) and specialized disciplines (SD). Disciplines in each of these cycles are divided into types: mandatory component, university component and elective component (elective disciplines).

The disciplines of the compulsory component are determined by the state mandatory standard of higher education according to the educational program and are mandatory for students to study.

Disciplines of the elective component are presented according to the educational program at a meeting of the department with the participation of employers and students. From the entire list of elective courses offered, you can choose the most interesting ones.

The methodology for choosing elective courses using the catalog for inclusion in your individual curriculum is as follows:

- 1. Find the course and academic semester in the list.
- 2. Determine the number of credits in an elective subject issued from the structure of the educational program of higher education.
- 3. Carefully read the list of elective courses offered. Focus on combining academic subjects according to the selected courses. Only one subject can be selected from a group of elective courses.
 - 4. Read a brief description of the elective courses you are interested in and make your choice. 5.Check whether the total number of credits for the courses you have chosen corresponds to the

required amount of credit in accordance with the structure of the higher education program.

6. When choosing elective disciplines, use the help of an adviser.

1	Statistics	5	Economic	Economic	Contents: basic concepts and categories of						
			theory Mathema	analysis	statistics, the process and stages of statistical research, time series, indices, sample						
			tics in		observation, in addition, statistical and socio-						
			economics		economic indicators used to analyze the current social and economic situation.						
					Expected results:						
					Know: sample observations, statistical						
					methods for studying the dynamics of social phenomena, the subject and method of						
					statistics, statistical observation, statistical						
					summary and grouping, absolute and relative values, average values and indicators of						
					variation, sample observation, series of						
					dynamics, indices, statistical study of the						
					interrelationships of social phenomena, statistics of the population and labor						
					resources, system of national accounts, basic						
					macroeconomic indicators, statistics of the standard of living of the population.						
					Be able to: formulate the goals and objectives						
					of statistical research; draw up statistical research programs, systematize and						
					generalize economic information, analyze the						
					structure and development trends of the						
					Kazakhstani and world economy, predict economic processes; collect and register						
					information, carry out primary processing						
					and control of observation materials, perform calculations of statistical indicators and						
					formulate the main conclusions, carry out a						
					comprehensive analysis of the studied socioeconomic phenomena. apply the						
					acquired knowledge and skills: in practice.						
					Skills: use of statistical information in the						
					further development of general and special economic disciplines; application of						
					statistical methods for the processing and						
					analysis of quantitative and qualitative information on the development of socio-						
					economic processes and phenomena.						
					Competencies: economic, organizational and						
1	Socio-economic	5	Economic	Economic	managerial Contents: bases and system of indicators of						
1	statistics		theory	analysis	socioeconomic statistics, statistics of						
			Mathema		population and labor resources, statistics of national wealth, costs and intermediate						
			tics in economics		consumption, commodity and money						
					circulation, price statistics, statistics of						
					production efficiency, main macroeconomic indicators, statistical study of dynamics ki						
					socio-economic phenomena.						
			<u> </u>	<u> </u>							

	T	1			T
					Expected results:
					Know: methodological foundations of the
					concepts of assessing the state of the
					economic, social, political environment;
					principles of statistical concretization of
					systems of indicators of various areas of
					socio-economic statistics, methods of their
					measurement or calculation; construction
					methodology and information capabilities of
					the system of generalizing statistical
					indicators
					Be able to: systematize and summarize
					quantitative and qualitative statistical
					information; draw up a plan for a statistical
					study of the real socio-economic situation,
					form a circle of initial indicators
					characterizing it, conduct
					targeted data collection and statistical
					analysis using appropriate methods; develop
					specific proposals based on the results of
					research, prepare reference and analytical
					materials for management decisions
					Skills: conducting a statistical study of the
					real socioeconomic situation, evaluate the
					proposed options for management decisions
					and develop proposals for their improvement,
					taking into account the criteria of
					socioeconomic efficiency
					Competencies: economic, organizational and
					managerial
