## CATALOG OF ELECTIVE DISCIPLINES 6B01201 – «PRESCHOOL EDUCATION AND UPBRINGING» Year of admission - 2023

Semey 2023

Reviewed and approved at the meeting of the Faculty's Educational and Methodological Council

Protocol No. 5 of 23.05.2023

Chairman of the UMS Faculty \_\_\_\_\_

Approved at the meeting of the Educational and Methodological Council of the University Protocol No. 5 of 25.05.2023

Chairman of the UMS of the University \_\_\_\_\_

## Degree awarded: Bachelor of Education

## According to the educational program: 6B01201 - "Preschool education and upbringing

N <sup>6</sup> component of choice	Name of the discipline or module	Number of credits	Prerequisites 2. BASIC DIS Components of c		A brief description indicating the purpose of the study, brief content and expected results of the study (knowledge, skills, skills, competencies)
1	Psychological and pedagogical diagnostics of preschool children	3	Psychology	Psychological readiness for school	The purpose of the study: the formation of skills of psychological and pedagogical study and development of children, teaching effective practical ways of obtaining and interpreting information about a person both in the process of direct interaction and on the basis of non-contact study of it. Summary of the course: In the course of studying this discipline, the classifications of psychodiagnostic tools, the technology of creating and adapting tests, the requirements for psychodiagnoses are considered. The technology of applying psychological and pedagogical diagnostics in a preschool institution is shown. Ethical and professional issues of psychodiagnostics are revealed. Expected results: To know: theoretical and

					schools of psychological counseling using art therapy methods. <b>Skills:</b> the use in the activities of preschool institutions of the most important means of establishing and maintaining relationships with the use of art therapy, conducting art- therapeutic methods of emotional and cognitive regulation of mental state in the psychological service of preschool institutions, art- therapeutic techniques and techniques to activate the creative potential of the individual. <b>Competencies:</b> Special competence:
4	Family education and psychology	5	Pedagogy	Social pedagogy	The purpose of the study: Formation of students' ideas about the field of scientific knowledge and practical activities in family pedagogy and psychology, about the object and subject of its research and the main categories; - To systematize the psychological and pedagogical knowledge of students on family education and family relations; - Formation of psychological and pedagogical skills in working with the family, identification of problems of family education and demonstration of ways to solve them. Summary of the course: This discipline reveals the leading role

	1
	of the family as a social
	institution of personality
	formation. Examines the
	current problems and
	features of family
	education in the
	historical aspect,
	innovative approaches
	to various forms of
	psychological and
	pedagogical assistance
	to the family. Also
	examines the prospects
	and psychological and
	pedagogical features of
	1 0 0
	family education at the
	present stage.
	Expected results:
	To know: patterns of
	personality
	development and
	manifestations of
	personal properties;
	features of the content
	and organization of the
	pedagogical process in
	preschool educational
	institutions; forms,
	methods and means of
	teaching and
	upbringing, their
	pedagogical
	capabilities and
	conditions of
	application; patterns of
	formation and
	1
	functional role
	structure of the family
	at various stages of the
	life cycle of preschool
	children; psychological
	features of marital and
	child-parental relations,
	problems of family
	pedagogy and
	psychology as a sphere
	of scientific and
	practical activity;
	methods of providing
	psychological and
	pedagogical counseling

4	Psychology and ethics of family life	5	Pedagogy	Socialization of children of early and preschool age	The purpose of the study: to familiarize students with the most relevant problems of modern psychological and pedagogical science concerning the psychology of the family, as well as to prepare them for practical activities Summary of the course: This discipline forms theoretical knowledge about the family as a social institution; introduces the moral norms of marriage in traditional culture; the basics of relationships between boys and girls, develops ideas about various social roles of people in the family. Expected results: To know: the theoretical foundations of the family as a social institution, the moral norms of marrial relations, approaches to understanding the essence of family relations that contribute to the development of family culture and its psychological climate among students. Be able to: distinguish between the social roles of people in the family, their responsibility for the life and health of children, conduct psychological techniques related to family issues, form ethical norms, prevent conflict situations. Skills: interaction with different types of families, identification of

					the typology of families and marital relations,
					regulation of conflict situations in families. <b>Competencies:</b> General
					professional competence
5	Development of communication and communicative competence of preschool children	5	Age psychology	Production practice	The purpose of the study: the formation of professional competence of teachers, which will allow them to effectively develop the communication skills of preschoolers and organize correctional and developmental classes with children Summary of the course: This discipline is aimed at studying the abilities, knowledge, skills, attitudes, initiatives and communicative experience of a person necessary for understanding others and producing their own programs of speech behavior that are adequate to the goals, spheres, situations of communication; for active interaction with other speech subjects. Expected results: Know: functional and semantic types and styles of speech; norms and rules of speech etiquette, principles of effective communication with preschoolers, parents and colleagues; the main types of communication used in professional activities; barriers preventing effective communication between the educator and preschool children. Be able to: organize communication in

		1		, I		1
						accordance with the age and individual characteristics of preschoolers; use methods of verbal and nonverbal communication with children; form effective ways of relationships between children and parents. Skills: demonstrate the ability to establish relationships between children and master the work on the development of communicative competencies; the use of effective approaches to building relationships between the educator and children; continuous improvement of communicative competence; the use of rules of speech etiquette depending on the situation; continuous improvement of communicative competence in the professional activities of the educator. <b>Competencies:</b> Special competence:
5	Organization of activities and interaction of children	5	Age psychology		Production practice	The purpose of the study: the formation of professional competence in the organization of activities and interaction of children Summary of the course: This discipline examines the possibilities and conditions for the development of cooperation of preschool children, their ways of interaction during the organization of the main types of activities, determines the impact of

					joint actions of children with each other on overcoming egocentrism and the development of creative abilities of the child in individual activities <b>Expected results:</b> <b>To know:</b> principles of organization, main directions, tasks and forms of individual work of a teacher with children; organization of joint activities of preschool children, ways of relationships with peers and interaction of preschool children. Be able to: form communication skills necessary for preschool children with peers and adults; create conditions for friendly relations between children in appropriate activities; create pedagogical conditions for communication and development of children in accordance with their age and individual characteristics and inclinations. Skills: active communication with
					in accordance with their age and individual characteristics and inclinations.
6	Modern pedagogical systems	6	Pedagogy	Organization and management of preschool education	The purpose of the study: the formation of students' ideas about modern pedagogical technologies implemented in primary school; the development

					of a conscious attitude to
					their choice;
					Summary of the course:
					This discipline is aimed
					-
					at familiarizing with
					various types of
					pedagogical systems,
					their historical formation
					and pedagogical value, as
					well as with the

8	Psychological readiness for school	5	pedagogical diagnostics of preschool children	Psychology and pedagogy of giftedness	psychological support, theoretical preparation for personal and social adaptation of children in the process of learning at
					school

			Summary of the course:
			This discipline considers
			the main types of a child's
			readiness for school
			(intellectual,
			motivational, physical,
			speech, readiness for
			communication) and is
			aimed at forming the
			readiness of the child's
			psyche for the transition
			to a new stage of
			development –
			educational activity.
			Expected results:
			<b>To know:</b> basic
			principles of
			psychological support of
			personality; features of its
			development; causes of
			problems in the
			development of
			personality; moral norms
			and foundations of moral
			behavior; regularity of
			the dynamics of cognitive
			functions in preschool
			age; psychological
			foundations of preschool
			preparation for school.
			Be able to: analyze the
			main problems of a
			child's readiness for
			school; use theoretical
			knowledge of the
			psychological aspects of
			preschool children's
			health; evaluate the
			content, tasks and
			problems of preschool
			children's education; use
			proven standard methods
			and technologies that
			allow solving the
			problems of organization,
			diagnosis and correction,
			development of
			individual and joint
			activities in accordance
			with the age norms of
			preschool children's
			development.

					Skills: knowledge of methods and techniques of analysis of psychological phenomena and processes; implementation of psychological education of educators and parents on the mental development of preschool children. <b>Competencies:</b> Special competence: <b>The purpose of the</b>
8	Game Psychology	5	Workshop on child psychology	Technology of work with gifted children	<pre>Ine purpose of the study: to equip students with knowledge of the theoretical foundations of game teaching methods, features of the organization of play activities of preschool children; Summary of the course: This discipline considers the features of the game as a universal, specifically human activity, which ensures the full-fledged mental development of the child, its forms, types, psychological aspects of the effectiveness of gaming activities and features of their application in the training and upbringing of preschool children. Expected results: to know psychological foundations of the game, features of thei organization of play activities of preschoolers and its types, the influence of the game on the socialization of the personality of a preschooler, psychodiagnostic possibilities of the game in identifying the</pre>

					personal characteristics of the child. Be able to: manage the game based on knowledge about the individual and social differences of children, organize the play interaction of preschool children in the educational process of preschool Skills: apply methods and techniques of organizing play activities of preschool. <b>Competencies:</b> Special competence: <b>The purpose of the</b>
9	History of pedagogy	6	Pedagogy	Organization of scientific research on the problems of preschool education	study: the formation of a system of historical and pedagogical knowledge; acquaintance with outstanding thinkers of various historical epochs and peoples. Summary of the course: This discipline introduces students to the theoretical foundations of the development of pedagogical science from ancient times to the present day, with the knowledge advanced in the past by progressive teachers and prominent thinkers; promotes the ability to comprehend and identify historical patterns of the development of the theory and practice of education. It teaches to identify the main and relevant for the present in the pedagogical theories of outstanding teachers. Expected results: To know: the theoretical foundations of the

					development of
					pedagogical science from
					ancient times to the

			competence:

					partnerships with the family, involvement of parents in partnership with subjects of preschool institutions. <b>Competencies:</b> Special competence:
13	Social pedagogy	5	Family education and psychology	Production practice	The purpose of the study: to expand the understanding of the impact of the social environment on the upbringing and formation of personality; to develop systems of measures to optimize the upbringing of personality, taking into account the specific conditions of the social environment. Summary of the course: This discipline introduces students to the basics of social pedagogy, its subject, content, principles, factors, stages of the socio-pedagogical process, as well as to the peculiarities of social development of the individual, the influence of family and upbringing on the socialization of the individual, with the activities of educational institutions in the direction of socialization of the younger generation. Expected results: To know: the essence, content, principles, factors, stages of the socio-pedagogical process, patterns of social development of the individual, the impact on the socialization of the individual, the impact on the socialization of the family, social anomalies of children's development and technologies of socio-pedagogical

					activity. Be able to: comprehend and analytically evaluate theoretical and applied problems of socio- pedagogical practice; independently analyze materials, develop and apply methods of socio- pedagogical study of various phenomena. Skills: organization of work on the socialization of children, provision of social and pedagogical assistance. <b>Competencies:</b> General professional competence
13	Socialization of children of early and preschool age	5	Inclusive education	Production practice	The purpose of the study: to form students' ability to use psychological and pedagogical technologies in professional activities necessary for individualization of learning, development, education, including students with special educational needs Summary of the course: This discipline reveals the essence of the concept of "socialization", factors, types and features of socialization of children of early and preschool age in the family and preschool institution, promotes the ability to create conditions for the full-fledged social development of children: to provide the child with the opportunity to show social motivation, the ability to independently choose a style of behavior adequate to the situation, to improve personal relationships with others. Expected results:

				1	[	
						to know: patterns, content, mechanisms and types of socialization of preschoolers; the main institutions of socialization of preschool children; the role of the family in the socialization of preschool children. Be able to: create a positive psychological atmosphere for the full social development of children: provide the child with the opportunity to show social motivation, the ability to independently choose a style of behavior appropriate to the situation, improve personal relationships with others; carry out joint activities with preschool children, create problematic conditions that contribute to the development of new ways of interaction. Skills: organization of interaction and improvement of personal relationships with others. <b>Competencies:</b> Special competence:
14	Fundamentals of pediatrics and hygiene of children of early and preschool age	5	Age-related physiology, anatomy, and hygiene		Production practice	The purpose of the study: the formation of students' knowledge about the prevention of various childhood diseases, skills for the protection and promotion of children's health in preschool institutions. Summary of the course: This discipline introduces students to the physiological characteristics of children of early and preschool age, health groups, criteria and

					factors, with hygienic requirements for certain regime moments, forms knowledge about the prevention and timely detection of diseases, teaches practical skills in the organization of first aid. <b>Expected results:</b> <b>To know:</b> physiological features of children of early and preschool age, hygienic requirements for the prevention and health protection of preschool children, age-related changes in the child's physique, deviations in the physical development of preschool children. Be able to: conduct comprehensive monitoring of the health and physical development of children of early and preschool age, conduct hygienic control, carry out prevention and timely detection of diseases. Skills: to justify and implement preventive measures aimed at improving the hygiene and health of children of early and preschool age;
					improving the hygiene
14	Fundamentals of medical knowledge and fundamentals of child protection	5	Age-related physiology, anatomy, and hygiene	Production practice	The purpose of the study: the formation of conscious motivation aimed at preserving, strengthening, and shaping health; the formation of skills and abilities to use health improvement methods in a preschool environment in the mode of training, work and recreation; the

					formation of gustainable
					formation of sustainable principles of healthy
					lifestyle in order to
					preserve and strengthen
					health.
					Summary of the course:
					This discipline considers
					the conditions for
					organizing the work of
					preschool institutions in
					accordance with hygienic
					requirements, the levels
					of functional capabilities
					of the child's body, the
					state of health, the
					creation of external
					favorable conditions for
					preserving the health and
					preventing diseases of
					preschool children, forms
					the skills of first aid.
					Expected results: to
					know: anatomical and
					physiological features of
					preschool children, their
					physical and mental state,
					factors affecting health,
					features of preserving,
					strengthening and
					multiplying the health of
					preschool children. Be able to: provide first
					aid when foreign bodies
					get into the respiratory
					tract, eyes, ears, nose;
					determine physical well-
					being, psycho-emotional
					state with the help of
					psychological tests, apply
					rehabilitation methods in
					a preschool environment,
					at work and at rest.
					Skills: first aid and
					prevention of diseases of
					preschool children.

1	Children's literature for preschool children	3	Pedagogy	Development of speech of children of preschool age	The purpose of the study: formation, development and improvement of skills and abilities of analyzing works of children's literature from an artistic, educational point of view and from the point of view of their significance in the formation of a child's personality, skills of expressive reading of literary texts. Summary of the course: This course introduces students to literature specially designed for children; examines works intended for children's reading, written in an artistic language, performs tasks of upbringing and education of children, forms skills of working with children's text. Expected results: To know: the main stages of the history of children's literature and current trends in its development, the main literary terms, the classification of genres of children's folklore, the specifics of children's literature. Be able to: independently analyze and evaluate works of children's literature of different types and genres, select works in accordance with

						the age of preschool
						children and the tasks of
						the work.
						Skills: application of
						knowledge in practice, to
						carry out training and
						education of preschool
						children.
						Competencies: Special
				-		competence: The purpose of the
						The purpose of the study: Improving the
						aesthetic culture of
						students and teaching
						methods of education and
						training of preschool
						children by means of
						fiction
						Summary of the course:
						During the study of this
						course, students get
						acquainted with the
						methodology of working with fiction, the
	Methods of		Pedagogy			with fiction, the peculiarities of
	familiarization		1 cddgogy			understanding a literary
	with the fiction of					text, methods and
	preschool children					techniques of analyzing a
	1					work of art in accordance
					Workshop on	with the age
1		3			expressive	characteristics of
1					reading	preschool children.
					ieuuing	Expected results:
						To know: various forms
						of work with fiction in
						preschool institutions, the role of fiction in the
						speech development of
						children, the
						methodology of reading
						and telling a work of art
						in the classroom in
						preschool, the structure of
						classes to familiarize
						children with the genres
						of prose and poetry, the
						methodology of
						preliminary and final
						conversations with
						children on the content of the work of art.
						Be able to: apply

					communication skills, methods of introducing preschool children to fiction, expand the vocabulary of a preschooler; form initial ideas about the features of fiction: about genres (prose, poetry, about their specific features; about composition; about the simplest elements of imagery in language; educate literary and artistic taste, the ability to understand and feel the mood of the work. Skills: demonstrate communication skills necessary to familiarize preschool children with fiction. <b>Competencies:</b> Special competence: <b>The purpose of the study: to</b> form a set of
2	Development of speech of children of preschool age	5	Children's literature for preschool children	Correctional pedagogy	theoretical knowledge about the means and methods of mastering the technique of speech, practical skills and abilities that develop professional qualities of speech: <b>Summary of the course:</b> This discipline considers the features of the formation of speech skills, the introduction of a child to the world of culture, universal values, methods of speech development (verbal, visual, game) and the features of their application in classes with children of early and preschool age. <b>Expected results:</b> <b>To know:</b> scientific foundations of the methodology of children's
