

ALIKHAN BOKEIKHAN UNIVERSITY

**MODULAR EDUCATIONAL PROGRAM
6B01404 "Physical culture and sports"**

Semey, 2024

Developed by the Department of Applied Biology

Discussed and approved at the meeting of the Department of Applied Biology
(Protocol No.9 23.08.2024)

Reviewed and recommended for approval at a meeting of the Academic Quality Council of the Faculty of Information Technology and Economics
(Protocol No. 6 of 26/08/2024)

Reviewed and approved at the meeting of the Educational and Methodological Council of the University
(extraordinary of 30/08/2024)

CONTENT

1. Explanatory note
2. The graduate's competence model
3. The list of modules included in the MOS with their brief characteristics

1. EXPLANATORY NOTE

The modular educational program (MEP) is compiled on the basis of the following documents:

- The State Standard of Higher and Postgraduate Education approved by the Order of the Minister of Science and Higher Education of the Republic of Kazakhstan dated July 20, 2022 № 2;
- Rules for the organization of the educational process on credit technology of education, approved by the Order of the Minister of Education and Science of the Republic of Kazakhstan №152 dated April 20, 2011;
- Model rules for the activities of organizations of Higher and (or) postgraduate Education, approved by the Order of the Minister of Education and Science of the Republic of Kazakhstan dated October 30, 2018 № 595;
- Professional standard "Teacher" approved by the order of the Acting Minister of Education of the Republic of Kazakhstan dated December 15, 2022 No. 500;
- Form 26 "Structure of the modular educational program"

The MEP is designed as a set of sequential training modules for the entire period of study and is aimed at mastering the competencies necessary for awarding the Bachelor of Education **degree under** the educational program 6B01404 "Physical Culture and Sports".

The modules of the block of general education disciplines (GED) include disciplines of the mandatory component (MC) – 51 credits and elective components (EC) – 5 credits.

The block of basic disciplines (BD) includes disciplines of the university component (UK) – 37 credits and components of choice (CC) – 75 credits.

The block of profile disciplines (PD) includes disciplines of the university component (UK) – 30 credits and components of choice (CC) - 34 credits.

Additional types of training (ATT) – 8 credits, which include the final certification.

The criterion for the completion of the educational process is the development of 240 credits by a student.

The MEP consists of 21 modules.

The purpose of the educational program

Training of qualified teaching staff according to the educational program "Physical Culture and Sport" - having professional competencies aimed at meeting the needs of the teaching staff of the region. Capable of implementing professional activities at a high scientific and pedagogical level in any socio-economic conditions, capable of carrying out professional activities in the following areas: education in the spirit of patriotism, friendship of the peoples of the Republic of Kazakhstan, respect for different cultures, traditions and customs; formation of universal and socio-personal values;

Expected results of the educational program (formed learning outcomes)

ON1 - analyze anatomical data and physiological processes occurring in the human body during muscular and athletic activity and apply this knowledge when performing physical exercises in the process of various sports.

ON2 – apply knowledge and understanding at a professional level, formulate arguments and solve problems in the field of theory and methodology of the chosen sport. Have the ability to manage the fitness of the body based on knowledge about the functions of the body, its individual adaptive capabilities and reserves, taking into account the reaction of its systems to physical exertion.

ON3 - demonstrate knowledge and understanding in the field of the history of physical culture, including elements of the most advanced knowledge; Implement a system of selection and sports orientation in the chosen sport using modern methods for determining the anthropometric, physical and mental characteristics of students. Have the ability to carry out scientific research in educational activities and use their results in the theory and practice of physical culture and sports.

ON4 - analyze and generalize the existing scientific, methodological and research experience in the chosen type of professional activity; master innovative technologies in the field of sports and introduce them into professional activity; the ability to apply modern technologies, organizational forms, methods, techniques, teaching and upbringing tools in pedagogical activity to improve the quality of educational activities.

ON5 – demonstrate specialized knowledge and understanding in the field of linguistics, computer science, including elements of the most advanced knowledge at a professional level.

ON6 – analyze and evaluate socio - cultural, service, tourism activities, international markets of socio -cultural and tourist services, promotion and delivery of services to consumers; predict the results of socio - cultural and tourism activities.

ON7 – Use the basic provisions of general hygiene and hygiene of physical culture and sports, sanitary and hygienic bases of activity in the field of physical culture and sports, patterns of biochemical and physiological adaptation to muscle work of various capacities and duration, biochemical bases of rational nutrition of athletes. To give hygienic and chemical assessment of nutrition of athletes of different ages.

ON8 – demonstrate theoretical and methodological knowledge, practical skills and abilities necessary for independent pedagogical activity when working at various sports facilities. Apply innovative technologies in the field of sports in practice, improve professional skills during training sessions. Demonstrate technical and tactical actions in outdoor games.

ON9- apply knowledge of physical education and sports teaching methods, develop physical qualities and skills, use physical education means for educational and professional tasks; distribute physical activity taking into account age and training, organize sports events, motivate and improve the results of players through psychological aspects; introduce modern techniques and innovations, including artificial intelligence, to improve the effectiveness of training; judge competitions, develop educational materials, comply with educational regulations, monitor training and apply a criteria-based assessment system.

ON10 – to apply practical methods of physical therapy and methods of health-improving physical culture and sports activities with various groups of the population; to demonstrate the skills and management skills of educational and training processes, allowing to increase the training effect of preventing possible diseases and injuries with non-rational physical exercises for people of different genders and ages.

ON11 – develop and analyze long-term and operational plans and programs of specific classes in the field of youth sports and with athletes of mass categories; independently conduct training sessions on the chosen sport in youth sports and with athletes of mass categories, the implementation of injury prevention.

ON12 – demonstrate knowledge of the main provisions and categories of modern psychological and pedagogical science, age physiology and school hygiene, apply in practical pedagogical activity skills in the application of methods and technologies of educational activities and inclusive education in accordance with the age characteristics of students, as well as in the management of the holistic pedagogical process of the school; to comply

with modern requirements for personal and professional qualities of a teacher; to manage the behavior of students, motivating their educational and cognitive activities, to promote their personal growth.

ON13 – possess the skills of using professional-pedagogical and organizational-managerial knowledge and skills in the field of physical culture and sports based on the analysis of historical and modern methods of teaching and education.

ON14 – Demonstrate knowledge of the idea of a modern law state to instill entrepreneurial skills, leadership qualities, receptivity to innovation based on scientific research with integrity, as well as ensuring safety standards.

In order to create special conditions for people with special educational needs to receive education, the graduate's competence model is supplemented with professional competencies that ensure the adaptive nature of the main educational program. To this end, courses for the formation of the ability of persons with special educational needs to successfully socialize in society and actively adapt to the labor market, taking into account the characteristics of the disease, are introduced into the catalog of courses of the additional educational program "Minor".

2. The graduate's competence model

The learning outcomes are determined on the basis of the Dublin descriptors of the first level (Bachelor's degree) and are expressed through competencies.

Competence is the possession of a certain competence, the knowledge, skills and abilities necessary for effective activity in a certain professional field.

Competence is the ability to apply knowledge, skills, and successfully act on the basis of practical experience in solving professional tasks.

Competencies are formed both at the level of the entire program, and at the level of a module and a separate discipline.

The competencies that a graduate should have after mastering the MEP are listed below.

1. Competence of general education

- aimed at the formation of ideological, civic and moral positions of the future specialist, competitive on the basis of knowledge of information and communication technologies, building communication programs in Kazakh, Russian and foreign languages, orientation to a healthy lifestyle, self-improvement and professional success;
- they form a system of general competencies that ensure the socio-cultural development of the personality of the future specialist on the basis of the formation of his ideological, civil and moral positions;
- develop the ability to interpersonal social and professional communication in Kazakh, Russian and foreign languages;
- contribute to the development of information literacy through the mastery and use of modern information and communication technologies in all areas of their lives and activities;
- form the skills of self-development and education throughout life;
- they form a personality capable of mobility in the modern world, critical thinking and physical self-improvement;
 - to evaluate the surrounding reality on the basis of worldview positions formed by knowledge of the fundamentals of philosophy, which provide scientific understanding and study of the natural and social world by methods of scientific and philosophical cognition, to reveal the meaning of the content and specific features of the mythological, religious and scientific worldview;
 - to show a civic position based on a deep understanding and scientific analysis of the main stages, patterns, peculiarities of the historical development of Kazakhstan, to use methods and techniques of historical description to analyze the causes and consequences of the events of the history of Kazakhstan;
 - to assess situations in various spheres of interpersonal, social and professional communication, taking into account the basic knowledge of sociology, political science, cultural studies, psychology, arguing their own assessment of everything happening in the social and industrial spheres, as well as synthesize knowledge of these sciences as a modern product of integrative processes;

- to use scientific methods, methods of research of a specific science, as well as the entire socio-political cluster, to choose a methodology, analyze and summarize the results of the study; *вырабатывать собственную нравственную и гражданскую позицию на основе общественных, деловых, культурных, правовых и этических норм казахстанского общества;*
- to put into practice knowledge in the field of social sciences and humanities, which has worldwide recognition, synthesize new knowledge and present it in the form of humanitarian socially significant products;
- to engage in communication in oral and written forms in Kazakh, Russian and foreign languages, using linguistic and speech means based on grammatical knowledge to solve the problems of interpersonal, intercultural and industrial (professional) communication, as well as to analyze information, actions and deeds of communication participants in accordance with the situation of communication;
- use various types of information and communication technologies in personal activities: Internet resources, cloud and mobile services for the search, storage, processing, protection and dissemination of information;
- to build a personal educational trajectory throughout life for self-development and career growth, to focus on a healthy lifestyle to ensure full-fledged social and professional activities through methods and means of physical culture;
- to know and understand the basic laws of the history of Kazakhstan, the basics of philosophical, socio-political, economic and legal knowledge, communication in oral and written forms in Kazakh, Russian and foreign languages;
- apply the acquired knowledge for effective socialization and adaptation in changing socio-cultural conditions, possess the skills of quantitative and qualitative analysis of social phenomena, processes and problems.

2. Basic Competencies (BC):

- to conduct psychological and pedagogical research in order to identify the specifics of human mental functioning, taking into account the peculiarities of age stages, developmental crises and risk factors, in order to assess and analyze the processes of higher nervous activity; to apply methods and technologies of educational activities and inclusive education in accordance with the age characteristics of students based on knowledge about the peculiarities of the regulation of behavior and human activity at various age levels; to select the means of training and education, methods and technologies of education that meet the modern requirements of traditional and inclusive education; to use the basic theories of motivation, leadership and power to solve managerial tasks; to apply risk management in educational organizations to make managerial decisions to reduce the degree of risk.
- use professional documentation in the state and foreign languages; use Kazakh, Russian and foreign languages in professional and research activities; present their position in a reasoned manner and conduct scientific discussions; perceive and analyze scientific articles in foreign journals and reports at international conferences.
- to plan, design and analyze the educational process in the organization of education; to solve the tasks of education and spiritual and moral development of students in educational and extracurricular activities; to develop programs of extracurricular work in biology and chemistry: scientific circles, excursions, field expeditions to study the flora and fauna of the region, research of the chemical composition of soils, reservoirs et al.
- to analyze and synthesize the studied material to isolate and reveal the causal relationships of the formation of the human body;

- to determine the main anatomical formations on a living person, to demonstrate the details of the structure on bone preparations.
- demonstrate knowledge and understanding in the field of theory and methodology of physical culture, including elements of the most advanced knowledge; Implement a system of selection and sports orientation in the chosen sport using modern techniques to determine the anthropometric, physical and mental characteristics of students.
- to analyze the adequacy of physical activity to the physiological capabilities of the body depending on age, gender, level of athletic training in cyclic sports; to possess the skills of analysis, training, demonstration of movement techniques of physical exercises, sports tactical actions.

3. Professional Competencies (PC):

In order to create special conditions for people with special educational needs to receive education, the graduate's competence model is supplemented with professional competencies that ensure the adaptive nature of the main educational program. To this end, courses for the formation of the ability of persons with special educational needs to successfully socialize in society and actively adapt to the labor market, taking into account the characteristics of the disease, are introduced into the catalog of courses of the additional educational program "Minor".

- to master the technique of performing basic exercises on gymnastic projectiles, to master the technique of techniques for the safe location of projectiles in the gym.
- to analyze and summarize the existing scientific, methodological and research experience in the chosen type of professional activity; to master innovative technologies in the field of sports and introduce them into professional activity, to improve professional skills in the process of training sessions. Mastering technical and tactical actions in a chosen sport.
- to form students' understanding of modern management and its relevance, practical significance in modern conditions; to study the functions, types of management;
- able to plan and conduct analytical, simulation and experimental studies; Able to critically evaluate data and draw conclusions. Organize, hold sports holidays, judge competitions in physical culture and sports in educational institutions, clubs, institutions; possess pedagogical technologies of training, control and correction of preparedness, taking into account functional capabilities in age, gender and qualification aspects.
- owns the technique of knitting knots; - able to organize meals in field conditions; able to set up a bivouac for a halt on the route of the hike and for an overnight stay in a multi-day hike.
- to analyze the results of scientific research and apply them in solving specific educational and research tasks. To develop long-term and operational plans and programs of specific classes in the field of youth sports and with athletes of mass categories; independent training sessions on the chosen sport in youth sports and with athletes of mass categories, the implementation of injury prevention. in the organization of management and marketing at different levels of physical culture and sports management.
- to master the methodological basics of conducting sports activities, to master the basic technical, tactical, judicial skills in the chosen sport.

Table 1. The sequence of mastering disciplines in the process of forming special competencies

№	Competencies	The list of compulsory, elective disciplines and the sequence of their study		Expected results
		List of disciplines	The sequence of their study	
Basic disciplines				
1	Professional	Anatomy the basics of sports morphology and biomechanics	3rd semester	<p>To know: about changes in the structure of organs in connection with function, general signs of the structure of organ systems as a whole, morphological research methods.</p> <p>Be able to: determine on a living person the main anatomical formations of bone protrusions, crevices, the direction of ligaments, muscle contours, the place of their origin and attachment, the projection of internal organs, vessels and peripheral nerves; use the knowledge gained in practice and in the subsequent study of other disciplines of the biological cycle and in further work in the specialty.</p> <p>Skills: to analyze and synthesize the studied material to isolate and reveal the cause-and-effect relationships of the formation of the human body; - to determine the main anatomical formations on a living person to demonstrate the details of the structure on bone preparations;</p>
		Human anatomy	3rd semester	<p>To know: - anatomical structure of the human body, justification of means and methods of physical education.</p> <p>Be able to: - perform physical exercises that affect the body and outline ways to improve it.</p> <p>Skills: - competently use knowledge about the structure of the human body, about the activity of the central nervous system and organs of internal secretion; - determine the impact of physical exertion on the human body.</p>
		Theory and methods of teaching basic sports	3rd semester	<p>To know: The history of the emergence of basic types of physical education. The importance and place of basic and new types in the system of physical education and sports.</p> <p>Be able to: Formulate specific tasks of teaching basic types of physical education and sports in various parts of the physical education system, taking into account the state of health, age, level of physical development, physical fitness of students, available conditions for classes.</p> <p>Skills: To master the features of the educational and training process of basic sports.</p>

		Theory and methods of weightlifting sports	3rd semester	<p>To know: Basic principles, means and methods of training and initial training in basic types of physical education and sports.</p> <p>Be able to: Select and apply in the educational and training process of basic types of physical education and sports adequate to the tasks set modern scientifically based means and methods of training, education and initial training.</p> <p>Skills: Rational organization of the educational and training process in accordance with the content of existing programs and the specifics of the contingent of students.</p>
		Theory and methodology chosen sport	3rd semester	<p>Know: knowledge of the principles, techniques, methods of physical education;</p> <p>Be able to: carry loads during sports training, depending on gender, age, physical development, mental and motor abilities</p> <p>Skills: competent preparation of the lesson in accordance with the goals and objectives based on the state program. Correct execution of the movement technique</p>
		Athletics with methods of teaching	4th semester	<p>To know: - the theoretical and practical foundations of athletics, the requirements for mastering the professional and pedagogical skills of the basics of technique in athletics, the structure and conduct of the lesson.</p> <p>Be able to: - submit commands, organize the formation for performing exercises, explain and show exercises, identify and correct mistakes, select and compose exercises, judge competitions.</p>
		Bases of training in athletics	4th semester	<p>To know: - the sequence of training in technical and tactical actions in athletics, to know the basic means and methods of sports training, to study the features of the training process at various stages of training a weightlifter.</p> <p>Be able to: - submit commands, organize the formation for performing exercises, explain and show exercises, identify and correct mistakes, select and compose exercises, judge competitions.</p> <p>Skills: - to instill skills and abilities for the development and improvement of general and special physical training with the help of basic means and methods of physical culture at different stages of the training process.</p>
		Basketball teaching methods	4th semester	<p>To know: - the theoretical and practical foundations of sports games, the requirements for mastering the professional and pedagogical skills of the basics of the technique of sports play, the structure and conduct of the lesson.</p> <p>Be able to: - submit commands, organize the formation for performing exercises, explain and show exercises, identify and correct mistakes, select and compose exercises, judge competitions.</p> <p>Skills: - possess the means and methods of managing sports training in a sports game in various age groups, taking into account individual characteristics and adaptation to</p>

			physical exertion; - master the technique of sports play perfectly; - master the methodology of teaching sports game techniques, building a training process for athletes of various sports qualifications; - have the skills to control the level of sports training, research work and sports training management.
	Theory and methodology of basketball	4th semester	Know: safety requirements in basketball classes; basic concepts; rules of the game; requirements. Be able to: perform stands and movements; transfers on the spot and in motion; throws into the ring, etc. techniques. Skills: Organizational skills for conducting sports competitions, technical and tactical motor actions in the game basketball brought to automatism.
	History of physical culture and sports	4th semester	To know: - the history, social essence, structure and functions of physical culture, goals, objectives, the main components of the pedagogical process in the field of physical culture. - history, theory and methodology of the chosen sport. Be able to: - use the values accumulated in the field of physical culture and sports to foster patriotism and love for the fatherland, the desire for a healthy lifestyle, personal hygiene skills, prevention and control of the state of your body, the need for regular physical fitness classes. - to argue the social and personal significance of the chosen type of sports activity, to predict the conditions and directions of its development in the socio-cultural aspect, to form the motivation of the population to engage in the chosen sport. Skills: - to use knowledge of the history of physical culture and sports in professional activities, including when solving problems of moral and patriotic education of schoolchildren, increasing interest in physical culture and sports; - to possess the general principles of the evolution of physical culture and sports, such as its wellness orientation, the formation of positive personal qualities in the process of physical education.
	Olympic sport	4th semester	Know: the history of Olympic sports Be able to: competently plan the topics of Olympic education, paying attention to the key points of this discipline. Skills: on the use of means, forms and methods, ideas and theory in the field of physical culture and sports; to instill skills for research work, methodological foundations of control and management of sports training.
	Gymnastics with methods of teaching	4th semester	Know: development of coordination (accuracy of reproduction and differentiation of spatial, temporal and force parameters of movements, balance) abilities; Be able to: maintain balance when performing exercises; form correct posture,

			voluntary relaxation skills; basic didactic algorithms for teaching motor actions in recreational aerobics; symmetry, dynamism of movements in cardio training; Skills: methods of teaching basic movements; composing bundles of exercises; symmetry, dynamism of movements in cardio training. Competencies: is able to model the educational process and implement it in practice; is capable of forming healthy lifestyle skills in accordance with the requirements of hygiene, occupational safety and the rules of protection from possible negative external influences.
	Theory and methodology of gymnastics	4th semester	Know: Basics of gymnastics techniques Be able to: methodically correctly plan and conduct classes on the basics of gymnastics, dose physical activity depending on the age groups of those involved and their physical fitness. Skills: master the technique of performing basic exercises on gymnastic projectiles, master the technique of techniques for the safe location of projectiles in the gym.
	Outdoor games with the methods of teaching	4th semester	To know: the history of the emergence and development of mobile games; the importance and place of mobile games in the system of physical education; Features of the formation of motor skills and the development of physical qualities in mobile games; methods of conducting classes on mobile games with different age groups of students; methods of conducting mobile games in the classroom and after school; methods of organizing and conducting scientific and methodical and research works on outdoor games; Methods of organizing and conducting outdoor games competitions; Age and physiological characteristics of students of junior, middle and senior classes. Be able to: take into account age characteristics, use the skills of organizing and conducting outdoor games and the methodology of developing physical qualities when practicing outdoor games; determine the causes of errors that occurred during the game, be able to predict them and find opportunities to eliminate them; setting specific tasks, planning and conducting the main types of outdoor games classes with different groups of students; organization and verification of research and scientific-methodical work on outdoor games; Showing and conducting research and scientific-methodical works on mobile games; Skills: to combine knowledge of a complex nature, to draw conclusions based on incomplete or limited information, taking into account the social and ethical responsibility associated with their use.
	Biochemistry of physical culture and sports	5th semester	To know: the chemical composition of the body, bioenergetics, hormones, enzymes, vitamins, as well as the biochemistry of muscle contraction and the patterns of biochemical adaptation;

			<p>Be able to: analyze the biochemical characteristics of motor qualities in athletes engaged in physical culture and other persons engaged in physical activity;</p> <p>Skills: formation of students' comprehensive knowledge about the biochemical processes occurring in the human body during physical activity;</p> <p>Learning outcomes: The formation of opportunities for the practical application of theoretical knowledge acquired during the study of the course "biochemistry of physical culture and sports".</p>
	Biochemistry in the practice of sports	5th semester	<p>To know: the chemical composition of the body, bioenergetics, hormones, enzymes, vitamins, as well as the biochemistry of muscle contraction and the patterns of biochemical adaptation;</p> <p>Be able to: analyze the biochemical characteristics of motor qualities in athletes engaged in physical culture and other persons engaged in physical activity;</p> <p>Skills: formation of students' comprehensive knowledge about the biochemical processes occurring in the human body during physical activity;</p> <p>Learning outcomes: The formation of opportunities for the practical application of theoretical knowledge acquired during the study of the course " Biochemistry in the practice of sports ".</p>
	Theory and methodology of physical culture	5th semester	<p>To know: the methodology of modeling the educational system of the class; planning the educational work of the class teacher; the methodology of forming a children's team, methods and forms of cooperation between the school and the family in the upbringing of children.</p> <p>Be able to: determine the goals, objectives and content of the education of schoolchildren; model the educational system of the class, the system of versatile educational work with schoolchildren; diagnose the class and personality of students, analyze the research results and use them as input data to determine the program of development and education of schoolchildren;</p> <p>Skills: to organize various types of student activities; to plan educational work with parents of students.</p>
	Theory and methodology of game sports	5th semester	<p>To know:the methodology of modeling the educational system of the class; planning the educational work of the class teacher; the methodology of forming a children's team, methods and forms of cooperation between the school and the family in the upbringing of children.</p> <p>Be able to: determine the goals, objectives and content of the education of schoolchildren; model the educational system of the class, the system of versatile educational work with schoolchildren; diagnose the class and personality of students,</p>

			analyze the research results and use them as input data to determine the program of development and education of schoolchildren; Skills: to organize various types of student activities; to plan educational work with parents of students.
	Physiological basis of physical sports	5th semester	Know: knows and owns key concepts and a complex of scientific knowledge on physiology, the basics of the influence of physical activity on the body. Be able to: be able to analyze physiological states and processes occurring during muscular and athletic activity ; Skills: is able to apply a set of skills for physiological control and independent analysis of the athlete's condition, decision-making during sports selection according to physiological indicators and for correction of physical exertion in case of incorrect application.
	Hygienic basics of physical culture and sports	5th semester	To know: The basic principles of "Hygienic foundations of physical culture and sports" requirements for personal hygiene, sanitary and hygienic conditions of playgrounds and halls where sports training is held. Types of hygiene depending on the type of sport. Be able to: determine the value of a genetically adequate and inadequate choice of sports specialization, style of competitive activity and sensorimotor dominance in sports; use genetic markers to search for highly and quickly trained athletes in sports Skills: to give future specialists in physical culture and sports theoretical, practical knowledge of personal hygiene and sports hygiene, to organize safe, harmless activities.
	Hygiene of physical education	5th semester	Know: the organization and content of physical exercises; - the volume and intensity of physical exertion during physical exercises; - the nature of nutrition during various sports; - technical equipment and equipment of athletes Be able to: develop and follow hygienic recommendations, norms and rules for creating favorable conditions for physical culture and sports; - improve health-improving efficiency and ensure that athletes can achieve high sports results without compromising their health; Skills: to prevent diseases, to correct the functional state of the human body by means of physical culture and sports; - to form a harmonious physical development of the younger generation and prolong the period of active longevity of the adult population.
	Hygiene of athletes' nutrition	5th semester	To know: features of the energy supply of the body at rest and under muscular loads; 3 - characteristics of the energy supply of the main functional systems of the body that ensure the movement of athletes; - features of the athlete's nutrition organization at

			<p>various stages of preparation; - features of the influence of various foods on the athlete's body; - consumption rates of various nutrients and biologically active substances.</p> <p>Be able to: reasonably form a list of food products necessary for the proper nutrition of a training athlete (which products predominate, in what quantity and ratio); - to calculate the energy consumption and energy consumption of an athlete at various stages of sports training;</p> <p>Skills: - proficiency in conducting research in the field of rational nutrition; - skills in planning, organizing and implementing rational nutrition activities for different ages and genders of students.</p>
	Fighting teaching methodology (Judo, Sambo)	5th semester	<p>Know: Classification of judo techniques. Classification of judo tactics. Mastering the technique of shifting judo. Professional development of the athlete. Physical qualities such as strength, speed, agility develop.</p> <p>Be able to: Manage the training process by sports from the selected type, training exercises, running, walking, jumping, throwing, training tactics with techniques.</p> <p>Skills: Mastering the technique of judo wrestling and its improvement. Training of highly qualified specialists.</p>
	Kazakh (Russian) language	5th semester	<p>To know:</p> <ul style="list-style-type: none"> - professional vocabulary and terminology; - the specifics of oral communication in the professional sphere; - language features of oral and written communication; - features of business communication and business etiquette. <p>Be able to:</p> <ul style="list-style-type: none"> - use the Russian language in interpersonal communication and professional activities; - to carry out business communication and conduct business conversations on professional topics; - to formalize and transmit the necessary information in writing; - explain your point of view and critically evaluate the proposed provisions; - create your own statements, essays, etc. - apply the norms of business etiquette in speech <p>Own:</p> <ul style="list-style-type: none"> - skills of expressing their thoughts and opinions in interpersonal and business communication in Russian; - professional terms and concepts; - professional text analysis;

				- information competence: the ability to work with a book, textbook, reference literature, dictionaries, to find the necessary information.
		Skiing with the methods of teaching	6th semester	To know: the theoretical foundations of winter sports, the requirements for mastering the professional pedagogical skills of the basics of technology and winter sports, the organization and conduct of classes, methods of teaching winter sports, the mechanics of judging. Be able to: give commands, organize a formation for performing exercises, explain and show exercises, identify and correct mistakes, select and compose exercises, exercise, use literary sources, repair and care for places of study, equipment and inventory. Skills: methods of teaching basic movements; compilation of bundles of exercises; methods of teaching winter sports, mechanics of judging.
		Theory and methodology of skiing	6th semester	Know: The basics of skiing Be able to: apply methodological techniques of ski racing training for all age groups and degree of preparedness. Skills: master the technique of walking on skis in classic and skating, turns at different sliding angles.
		Handball with methodology of teaching	6th semester	Know: The basics of the handball technique Be able to: organize handball classes in accordance with all methodological and theoretical requirements of the higher school. Skills: master the basic technical and tactical motor actions perfectly, master the skills of judging.
		Theory and methodology of handball	6th semester	Be able to: organize handball classes in accordance with all methodological and theoretical requirements of the higher school. Skills: master the basic technical and tactical motor actions perfectly, master the skills of judging
		Swimming with methods of teaching	6rd semester	Know: The basics of swimming with teaching methods Be able to: competently plan and methodically rationally build the learning process of swimming. Skills: to master at a practical level the main methods of swimming: crawl, Breaststroke, butterfly, freestyle, as well as the skills of servicing competitions of various scales.
		Theory and methods of teaching swimming	6th semester	Know: The basics of swimming with teaching methods Be able to: competently plan and methodically rationally build the learning process of

		swimming. Skills: to master at a practical level the main methods of swimming: crawl, Breaststroke, butterfly, freestyle, as well as the skills of servicing competitions of various scales.
Professional development in the chosen sport	6th semester	To know: the methodology of teaching the technique of competitive exercises; - theoretical foundations of the organization and methods of conducting training sessions in the chosen sport; a system of long-term sports training in the IVS; Be able to: conduct historical analysis on IVS; conduct analysis of sports training; Skills: to master the methodology of teaching motor actions and exercises of the chosen sport to people of different age groups;
Improvement of vocational coaching with activities in the ITT	6th semester	Know: - the system of long-term sports training in the IVS; - fundamentals of scientific and methodological activities in IVS; - fundamentals of coaching skills in IVS. Be able to: - show and explain individual exercises, make a separate set of exercises, conduct a lesson (training). Skills: - master the basics of sports training techniques in your chosen sport.
Professional work of the coaches and ski leader you head in the ITT	6th semester	To know: The basics of professional activity of trainers and instructors in IVS Be able to: organize and conduct educational and sports events, both in high-performance sports and in labor collectives. Skills: to master the methodological basics when conducting sports activities, to master the basic technical and tactical, judicial skills in the chosen sport.
Osobnosti performance coaches	6th semester	To know: The basics of the specifics of the activity of trainers Be able to: plan and conduct training activities for athletes of all ages and skills. Skills: master the techniques of transferring all technical and motor skills to their pupils. Master the skills of judging and organizational methods in the course of classes.
Professionally-oriented foreign language	6th semester	To know: - lexical material on the topics of this discipline; - regulatory requirements for registration (official letter, essay, etc.). - improve pronunciation skills; - develop productive and receptive lexical and grammatical skills; - to improve the skills of dialogical speech of a general nature related to situations of everyday and professional communication; - develop listening skills (with full understanding of what you have heard); - develop and improve writing skills;

		<p>- improve the skills of introductory, studying, viewing and searching reading.</p> <p>Be able to:</p> <ul style="list-style-type: none"> - automate technical skills of reading about yourself; to develop the ability to transmit scientific information and literature of a socio-political nature; -develop skills of monologue (prepared) speech – thesis deployment; -master the reversed reading aloud of a prepared message; -teach referencing skills. <p>Own:</p> <ul style="list-style-type: none"> - complexity in solving practical, educational, educational and developmental goals (with practical goals acting as the leading ones); the communicative orientation of the learning process.
Therapeutic physical culture and massage	7th semester	<p>To know: - the main mechanisms of the therapeutic effect of massage; principles of determining indications and contraindications to the use of massage; - psychological and pedagogical features of work on rehabilitation of disabled people.</p> <p>Be able to: - perform classical, sports, segmental reflex and acupressure techniques; - develop self-massage skills.</p> <p>Skills: - physical therapy and medical control for various injuries in physical education classes.</p>
Fundamentals of Sports Medicine	7th semester	<p>Know: Basics of Sports Medicine methodology</p> <p>Be able to: apply medical means to restore athletic performance. Apply methods of sports medicine to various types of sports activities.</p> <p>Skills: competently apply sports pharmacology in the sports life of athletes.</p>
Volleyball with the methods of teaching	7th semester	<p>To know: the theoretical and practical foundations of sports games, the requirements for mastering the professional and pedagogical skills of the basics of the technique of sports play, the structure and conduct of the lesson.</p> <p>Be able to: submit commands, organize the formation for performing exercises, explain and show exercises, identify and correct mistakes, select and compose exercises, judge competitions.</p> <p>Skills: to possess the means and methods of managing sports training in volleyball in various age groups, taking into account individual characteristics and adaptation to physical exertion; to master the volleyball technique perfectly; to have the skills to control the level of sports training, research work and sports training management.</p>
Theory and methodology of volleyball	7th semester	<p>To know: - the theoretical and practical basics of volleyball, the requirements for mastering the professional and pedagogical skills of the basics of volleyball technique,</p>

		<p>the structure and conduct of the lesson.</p> <p>Be able to: - submit commands, organize the formation for performing exercises, explain and show exercises, identify and correct mistakes, select and compose exercises, judge competitions.</p> <p>Skills: to master the technique of volleyball perfectly; to master the methodology of teaching volleyball techniques, building a training process for athletes of various sports qualifications; to have skills in monitoring the level of sports training, research work and sports training management.</p>
National sports (togyz kumalak, wrestling)	7th semester	<p>To know: - the history of development and the place of national sports in the system of physical education of various groups of the population; - the causes of injuries and ways to prevent it when practicing national sports; - rules of competitions in national sports;</p> <p>Be able to: - formulate specific tasks, plan and conduct the main activities of national sports with different groups of the population; - organize recreational and physical culture mass work on national sports with different age groups of the population;</p> <p>Skills: - basic knowledge of national sports in the educational process; - methods of teaching exercises in national sports; - methods of teaching exercises in national sports; - master the methodology of developing physical qualities when practicing national sports.</p>
Table tennis with teaching methods	7th semester	<p>Know: - Know the rules of the game and refereeing. Methodically competently build an educational and training process in table tennis. Use physical education methods in your work.</p> <p>Be able to: Be able to organize and conduct competitions in this sports game.</p> <p>Skills: As a result of mastering the discipline, the student should know: the history of the emergence and development of table tennis, knowledge and place of table tennis in the system of physical education. Features of the formation of motor skills and the development and development of physical qualities necessary for playing table tennis.</p>
Football with teaching methods	7th semester	<p>To know: Technical and tactical training, general physical training, the history of the development of the game of football, the marking of the playing field, the basics of refereeing, the organization and conduct of football for various age groups</p> <p>Be able to: - be able and ready to form program goals, solve tasks, criteria and indicators for achieving goals, build a structure of their interrelations, identify priorities for solving tasks</p> <p>Skills: The variety of technical and tactical techniques of football players and methods of their application, which make up the content of this discipline, allows you to</p>

			purposefully influence the development of all the main functions of the body in accordance with motor capabilities.
	Theory and methodology of football	7th semester	<p>To know: To know the specifics of the selection of young football players, the assignment of sports titles in football, to plan the work of a physical education teacher and a coach on the theory and methodology of football.</p> <p>To be able to: Be able to correctly apply methodological techniques in the educational process of football players of different age groups. Be able to methodically competently organize the competitive process.</p> <p>Skills: To organize and carry out various forms of organization of the educational process using different means and methods of teaching. Plan and implement the content of the school physical education course in the educational process. Effectively apply the methodical system of training. Engage in continuous self-education</p>
	Sports facilities	7th semester	<p>Know: The basics of sports facilities</p> <p>Be able to: be able to competently, rationally operate a sports facility.</p> <p>Skills: possess practical skills in the maintenance and maintenance of sports facilities in proper order, up to major changes in the drawing of the sports complex.</p>
	New types of physical fitness classes	7th semester	<p>Know: New types of physical education and wellness classes</p> <p>Be able to: make a plan of wellness activities for all age groups and the degree of preparedness of those involved.</p> <p>Skills: master the basic motor skills of wellness training perfectly.</p>
	Theory and methodology of youth and professional sports	7th semester	<p>To know: The phenomenon of culture, its role in human life. Sanitary and hygienic bases of activity in the field of physical culture and sports. Psychophysiological, socio-psychological and medico-biological patterns of the development of physical qualities and motor skills of students, psychological and pedagogical means and methods of organization and management of an individual, a group of people.</p> <p>Be able to: apply the acquired knowledge in practice; Use the values accumulated in the field of physical culture and sports to foster patriotism and love for the fatherland, the desire for a healthy lifestyle, personal hygiene skills, prevention and control of the state of your body, the need for regular physical fitness classes.</p> <p>Skills: Skills and abilities of psychophysical self-improvement based on the scientific understanding of a healthy lifestyle</p>
	Features of training in youth sports	7th semester	<p>To know: The history of the development of pedagogical thought, didactic technologies, methods of pedagogical control and quality of education. Theory and methodology of the chosen sport. The main provisions of management sciences,</p>

		<p>organizational foundations of the sphere of physical culture and sports. Organizational and methodological foundations of youth sports and the reserve training system in the IVS</p> <p>Be able to: Use in professional activities relevant methods of teaching and upbringing, various forms of classes, taking into account the age, morphofunctional and psychological characteristics of those involved, their level of physical and athletic fitness, health status, select tools and methods adequate to the tasks.</p> <p>Skills: apply the acquired knowledge in practice;</p>
Management of physical culture and sports	8th semester	<p>Know: - functions, types and psychology of management; - the basics of organizing the work of a team of performers; - principles of business communication in a team;</p> <p>Be able to: implement management functions in professional activities; - make management decisions; - manage the dynamics of the conflict and own methods of its prevention;</p> <p>Skills: to form students' understanding of modern management and its relevance, practical significance in modern conditions; to study the functions, types of management;</p>
Innovations in physical culture and sports	8th semester	<p>Know: - information technologies in the field of management in the field of physical culture and sports; - features of management in the field of professional activity</p> <p>Be able to: - follow the ethics of business communication in behavior. be able to analyze the signs of market and administrative command management.</p> <p>Skills: to form students' understanding of modern management and its relevance, practical significance in modern conditions; to study the functions, types of management;</p>
Tourism and orienteering	8th semester	<p>To know: types and types of bonfires, rules of bonfires and fire safety; - rules for the installation of tents on foot, types of tents for mass hiking; safety rules when performing movement in a tourist group.</p> <p>Be able to: collect equipment for a multi-day hike, taking into account meteorological forecasts;</p> <p>Skills: owns the technique of knitting knots; - able to organize meals in field conditions; able to set up a bivouac for a halt on the route of the hike and for an overnight stay in a multi-day hike.</p>
Accommodation in different types of tourism	8th semester	<p>Know: safety rules when driving in a tourist group; the principle of operation and components of a tourist compass, the rules of orientation on a topographic map and compass, topographic signs; methods of providing first aid, the composition of a tourist</p>

			<p>first aid kit.</p> <p>Be able to: collect equipment for a multi-day hike, taking into account meteorological forecasts;</p> <p>Skills: owns the technique of knitting knots; is able to organize meals in field conditions; is able to break a bivouac for a halt on the route of the hike and for an overnight stay in a multi-day hike.</p>
