ON15—to know and be able to characterize the criminalistic characteristics of cybercrime and technogenic crimes. To use modern achievements of science and technology that assist in the establishment of factual data relevant to the criminal case. On the basis of the acquired knowledge and skills acquired by the science of criminalistics, criminal process, be ready to independently make a procedural decision, put forward versions and analyze the information and

data obtained during the production of operational investigative measures and investigative actions, be able to take responsibility for the procedural decision or action taken during the investigation of a crime.

In order to create special conditions for people with special educational needs to receive education, the graduate's competence model is supplemented with professional competencies that ensure the adaptive nature of the main educational program. To this end, courses for the formation of the ability of persons with special educational needs to successfully socialize in society and actively adapt to the labor market, taking into account the characteristics of the disease, are introduced into the catalog of courses of the additional educational program «Minor».

## **2. The graduate's competence model**

In modern conditions, the key resource of the country's economic growth is the intellectual and educational potential. In this regard, the system of training highly qualified personnel is becoming important in ensuring high competitiveness.

The competitiveness of a specialist is determined by his professional competence, broad social outlook, flexibility of behavior and a high level of individual activity.

The competence-based approach in higher professional education opens up wide opportunities for better training of specialists for real life.

The competence of the graduate is formed taking into account the needs and satisfaction of the labor market.

The graduate is awarded the academic degree «Bachelor of National Security and Military Affairs», according to the educational program 6B12330 – «Law Enforcement»

In order to realize their competitiveness and competence, a student under the educational program 6B12330 «Law Enforcement» receives in the educational institution «Alikhan Bokeikhan University»:

- a) the required amount of basic (theoretical) knowledge for professional suitability;
- b) applied skills for the application of theoretical knowledge in public relations;
- c) application of the acquired knowledge, skills and abilities (during educational, industrial and undergraduate practice, laboratory work, independent research, etc.) in practical activities.

All these separate elements of the results of education together constitute "competence".

Competence is a complex characteristic of a graduate's readiness to apply knowledge, skills and personal qualities in standard and changing situations of professional activity.

A graduate of the educational program 6B12330 «Law Enforcement» is able to conduct professional, analytical, consulting activities in law enforcement agencies.

Bachelors in the educational program 6B12330 «Law Enforcement» are engaged in the study of legal issues and problems of a theoretical and practical nature, as well as the development of recommendations for the reform of the regulatory framework. Bachelors of this profile should analyze individual normative legal acts, contribute to strengthening the quality indicators of the legal services provided.

### **Classification of competencies according to the educational program 6B12330 «Law enforcement»:**

#### **Competencies of general education:**

- aimed at forming the ideological, civil and moral positions of the future specialist, competitive on the basis of knowledge of information and communication technologies, building communication programs in Kazakh, Russian and foreign languages, orientation to a healthy lifestyle, self-improvement and professional success;
- they form a system of general competencies that ensure the socio-cultural development of the personality of the future specialist on the basis of the formation of his ideological, civil and moral positions;
- develop the ability to interpersonal social and professional communication in Kazakh, Russian and foreign languages;

- contribute to the development of information literacy through the mastery and use of modern information and communication technologies in all areas of their lives and activities;
- form the skills of self-development and education throughout life;
- they form a personality capable of mobility in the modern world, critical thinking and physical self-improvement;
- to evaluate the surrounding reality on the basis of worldview positions formed by knowledge of the fundamentals of philosophy, which provide scientific understanding and study of the natural and social world by methods of scientific and philosophical cognition, to reveal the meaning of the content and specific features of the mythological, religious and scientific worldview;
- to show a civic position based on a deep understanding and scientific analysis of the main stages, patterns, peculiarities of the historical development of Kazakhstan, to use methods and techniques of historical description to analyze the causes and consequences of events in the history of Kazakhstan;
- to assess situations in various spheres of interpersonal, social and professional communication, taking into account basic knowledge of sociology, political science, cultural studies, psychology, arguing their own assessment of everything happening in the social and industrial spheres, as well as synthesize knowledge of these sciences as a modern product of integrative processes;
- to use scientific methods, methods of research of a specific science, as well as the entire socio-political cluster, to choose a methodology, analyze and summarize the results of the study;
- to develop their own moral and civic position on the basis of social, business, cultural, legal and ethical norms of the Kazakh society;
- to put into practice knowledge in the field of social sciences and humanities, which has worldwide recognition, synthesize new knowledge and present it in the form of humanitarian socially significant products;
