1. Explanatory note of the educational program 6B01606 - "History"

The modular educational program (MEP) is compiled on the basis of the State Mandatory Standard of Higher Education approved by the Order of the Ministry of Education and Science of the Republic of Kazakhstan No. 604 dated 31.10.2018. The Regulation on the introduction of educational programs (Order 01.26/2019). Regulations on the dual system of education at the Kazakh Humanitarian and Legal Innovation University (Order 01.13/2019). The structure of the modular educational program was approved by the Academic Council of the University (Protocol No. 5 of 17.01.2014). Rules of registration for Elective Component Disciplines (Order 01.18/2019).

Considering the levels of the National Qualifications Framework (NQF) and the Sectoral Qualifications Framework in Education (ORC). NRK and ORC in the field of education give grounds to recognize the results of both formal and informal and formal training, create conditions for access to assessment and recognition of qualifications not only by the academic environment, but also by employers.

During the updating of educational programs by stakeholders on 05.02.2021, an online seminar was held on the topic "Formation of competencies of a specialist competitive in the labor market". During the seminar, the issues of employment of young specialists, partnership, work experience were discussed with employers, as well as experts on OP 6B01606 "History" shared their opinions and suggestions. For example, a specialist of the Semipalatinsk Regional Museum of Local Lore, Tortenova Gulnur Shalataevna, a history teacher of the multidisciplinary college of Semey Smagulova Shynar Sovetkhanovna and history teacher Nygmanbekova G. M. according to the educational program 6B01606 "History", it was proposed to introduce several elective disciplines "Criterion assessment and technologies in history teaching", "Modern history course in secondary education" and "IT in history teaching" (Protocol No. 2 of 05.02.2021).

Modular educational programs are designed to provide a unified approach to the formation of educational programs on credit technology training. They are developed on the basis of regulatory documents of the Ministry of Education and Science of the Republic of Kazakhstan on the creation of methodological foundations for the development of educational programs. This regulation contains a description of the learning outcomes based on Dublin descriptors and competencies, the definition of general and subject competencies, requirements for the development of an educational program on a modular basis

The MEP is designed as a set of sequential training modules for the entire period of study and is aimed at mastering the competencies necessary for awarding a bachelor's degree in the educational program - 6B01606 – History.

The modules of the OOD block (OK 51 credits) and elective components (KV) – 5 credits, include disciplines common to all educational programs, during the study of which the graduate must master the following competencies: : knowledge of the laws of development of society and its socio-political, legal, economic, environmental foundations, as well as cultural and historical values, the basics of computer science, language communication and understanding of the principles of a healthy lifestyle, possession of information about the political life of the country.

The DB block includes disciplines of the university component (OK) – 41 credits and elective components (KV) - 71 credits. The modules of these disciplines form a set of competencies: the formation of professional qualities, covering deep scientific, theoretical and methodological knowledge, practical skills and skills in historical, theoretical and branch sciences in the field of the educational program.

The PD block includes disciplines of the university component (OK) - 20 credits; and elective components (KV) - 40 credits. Modules of these disciplines allow you to form a complex of key and special competencies acquired by a graduate: the formation of professional qualities, including theoretical and empirical knowledge, as well as skills for practical actions, the ability to analyze and solve geographical problems, for successful problem solving.

The criterion for the completion of the educational process is the student's mastering of 228 credits of theoretical training and the IGA - 12 credits of the MOS consists of 19 modules.

Duration of training - 4 years

1.2 The purpose of the modular educational program B015 "Teacher training in humanitarian subjects" **6B01606- "History" in accordance with the mission of the university are: ensuring the training of professional teachers in the field of historical education who are able to carry out analytical, research and practical activities aimed at updating and improving the education system in modern conditions.**

The main objectives of OP 6B01606 History are: the **formation of fundamental knowledge and professional competencies necessary in practice, providing the secondary education system with teachers-historians capable of successfully competing in the domestic and foreign labor market, achieving integration into the European educational and research space**

2. Competence of the graduate model

Competence of general education

- aimed at forming the ideological, civil and moral positions of the future specialist, competitive on the basis of knowledge of information and communication technologies, building communication programs in Kazakh, Russian and foreign languages, orientation to a healthy lifestyle, self-improvement and professional success;
- they form a system of general competencies that ensure the socio-cultural development of the personality of the future specialist on the basis of the formation of his ideological, civil and moral positions;
- develop the ability to interpersonal social and professional communication in Kazakh, Russian and foreign languages;
- contribute to the development of information literacy through the mastery and use of modern information and communication technologies in all areas of their lives and activities;
- form the skills of self-development and education throughout life;
- they form a personality capable of mobility in the modern world, critical thinking and physical self-improvement;
- to evaluate the surrounding reality on the basis of worldview positions formed by knowledge of the fundamentals of philosophy, which provide scientific understanding and study of the natural and social world by methods of scientific and philosophical cognition, to reveal the meaning of the content and specific features of the mythological, religious and scientific worldview;
- to show a civic position based on a deep understanding and scientific analysis of the main stages, patterns, peculiarities of the historical development of Kazakhstan, to use methods and techniques of historical description to analyze the causes and consequences of events in the history of Kazakhstan;
- to assess situations in various spheres of interpersonal, social and professional communication, taking into account basic knowledge of sociology, political science, cultural studies, psychology, arguing their own assessment of everything happening in the social and industrial spheres, as well as synthesize knowledge of these sciences as a modern product of integrative processes;
- to use scientific methods, methods of research of a specific science, as well as the entire socio-political cluster, to choose a methodology, analyze and summarize the results of the study;
- to develop their own moral and civic position on the basis of social, business, cultural, legal and ethical norms of the Kazakh society;
- to put into practice knowledge in the field of social sciences and humanities, which has worldwide recognition, synthesize new knowledge and present it in the form of humanitarian socially significant products;

- to engage in communication in oral and written forms in Kazakh, Russian and foreign languages, using language and speech means based on grammatical knowledge to solve the problems of interpersonal, intercultural and industrial (professional) communication, as well as to analyze information, actions and deeds of communication participants in accordance with the communication situation;

- to build a personal educational trajectory throughout life for self-development and career growth, to focus on a healthy lifestyle to ensure full-fledged social and professional activities through methods and means of physical culture;
- to know and understand the basic laws of the history of Kazakhstan, the basics of philosophical, socio-political, economic and legal knowledge, communication in oral and written forms in Kazakh, Russian and foreign languages;
- apply the acquired knowledge for effective socialization and adaptation in changing socio-cultural conditions, possess the skills of quantitative and qualitative analysis of social phenomena, processes and problems.

General professional competencies

Upon graduation, the graduate will be able to:

- to know the main provisions and categories of modern psychological and pedagogical science,
- to know the theoretical and methodological foundations of pedagogy as a science, modern trends in education,
- to understand the essence of pedagogical activity, the role of the teacher in the pedagogical process, the features of the management process;
- be able to carry out diagnostic, analytical and design activities within the framework of a unified management system of an educational institution;
- be able to carry out professional activities in accordance with regulatory legal acts in the field of education and professional ethics
- be able to demonstrate mastery of technologies of personality-oriented learning, critical thinking, technologies of collective mutual learning, problem-based approach to learning;
- be aware of the social significance of their future profession, have motivation to carry out professional activities
- to carry out training, education and development taking into account social, age, psychophysical and individual characteristics, including the special educational needs of students ;
- possess theoretical, methodological and applied components of psychology and pedagogy, methods of team formation, use the most promising methods and technologies of teaching and upbringing;
- possess communication technologies, pedagogical rhetoric skills, communication strategies, pedagogical cooperation;
- possess the skills of planning and designing the educational process; teaching methods and modern educational technologies;
- apply knowledge about the basics of age physiology and school hygiene
- to apply in practical pedagogical activity skills in the application of methods and technologies of educational activities and inclusive education in accordance with the age characteristics of students, as well as in the management of the holistic pedagogical process of the school.
- to design and put into practice modern methods and technologies of education and upbringing;
- to use systematized theoretical and practical knowledge for setting and solving research problems in the field of education;The competence of general education disciplines includes:

Labor function:

Educational - translates educational information, teaches to acquire knowledge independently

For this , the graduate must:

To know:

- classical provisions of school didactics in integration with theoretical concepts of historical science
- new achievements in the field of psychological and pedagogical sciences;
- pedagogical technologies of differentiated and integrated learning, developmental learning, features and specifics of the competence approach in teaching;
- methods of developing students' research skills;
- methods of pedagogical goal-setting for designing new models and strategies of the educational process;
- principles and mechanisms of integration and continuity of school, post-secondary and higher education;
- paradigms of co-study of languages, co-study of languages and cultures (for teachers involved in multilingual education programs);

Be able and have skills:

- conducting standard training sessions using didactic knowledge in integration with knowledge in the historical field;
- under the guidance of a mentor, creates conditions for the adaptation of school-age children to communication in target languages: Kazakh Ya2, Russian Ya2, English Ya3 (for teachers involved in multilingual education programs);
- in cooperation with colleagues, plans training sessions taking into account the principles of integration and continuity of education at all levels of secondary education (basic secondary, general secondary).

Labor function:

Educating - introduces students to the system of social values

For this , the graduate must

To know:

- school pedagogy;
- pedagogical psychology;
- innovative technologies for the education of school and adolescent children;
- educational potentials of historical subjects;

Be able and have skills:

- observe pedagogical tact, rules of pedagogical ethics;
- show respect for the personality of students;
- to adhere to a democratic style in relations with students;
- to show commitment to the highest social values, to the ideas of humanistic pedagogy;
- to show familiarity with the system of universal and national values in their unity;

Labor function:

Social and communicative - interacts with the professional community and with all interested parties of education

For this , the graduate must

To know:

- fundamentals of communication psychology and professional communication;
- forms and methods of cooperation in the professional community, including the network community;
- forms and methods of interaction with various social groups (external stakeholders of education);
- fundamentals of professional leadership;

Be able and have skills:

- to involve students in the system of additional education independently;
- independently initiate innovative ideas that unite education stakeholders (various creative associations, associations, etc.);
- independently involve representatives of professional communities, law enforcement agencies, social services, children's and youth movements, youth associations, public and political parties, non-governmental organizations, etc. in the educational process.

Special competencies

Upon graduation, the graduate will be able to:

- to know the main stages and patterns of development of society in different historical periods, the chronological framework of various historical epochs, criteria for scientific periodization of the world historical process;
- to know the main facts and phenomena characterizing the integrity of the historical process, the driving forces and patterns of the historical process;
- to know and understand the theoretical and methodological foundations of world historical science and the basic terminology of historical science, the main approaches to understanding the essence of historical processes and phenomena;
- to know and identify patterns and stages of socio-historical development of various countries, cultures and peoples; to know, critically perceive, analyze and evaluate the diversity of socio-historical development of societies;
- to know and use key concepts, methods of historical science in the analysis of processes, phenomena, events of the past and modern socially significant problems;
- to understand the general picture of the world historical process with its regional and local features from ancient times to the present;
- be able to extract historical information from historical sources, assess its reliability, attribute a particular historical source,
- be able to navigate scientific concepts that explain the unity and diversity of the historical process, the specifics of the interpretation of the past by various schools and trends in historical science
- possess the categorical and conceptual apparatus of historical disciplines;
- master the methods of historical analysis of the main stages and patterns of development of society in different historical periods
- mechanisms for searching historical sources, scientific and educational literature, information databases, the latest scientific and theoretical developments in the subject area and the specifics of their use in teaching and research activities of a teacher-historian;
- to identify cause-and-effect relationships between historical events, to determine the interrelationships of socio-economic, political and cultural processes in the course of the development of civilizations;
- apply knowledge of the main problems and concepts in the field of national and universal history;
- apply at a basic level knowledge of the theory and methodology of historical science in professional activity; be able to use general scientific principles and methods of cognition in the analysis of concrete historical problems

- to apply knowledge and understanding of the civilizational approach to the study of the historical process, to identify a system of complex dependencies and continuity of various types of civilizations, to explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions, settled and nomadic civilizations;
- analyze and explain meaningfully historical phenomena and processes in their economic, political, cultural manifestations, the historical past on the basis of the principle of historicism;
- to carry out the selection, analysis and interpretation of historical sources, historical facts, historical information in solving problems in the field of professional activity; to carry out a comparative analysis of historical facts, events and phenomena of public life on the basis of historical sources;

- to know the main categories and provisions of modern historical and pedagogical science and consciously apply them in the process of practical activity;
- to know the current trends in the renewal of school historical education;
- to know the content characteristics of the concept of "criterion evaluation of educational achievements", a process based on the comparison of students' educational achievements with certain criteria, contributing to the formation of educational and cognitive competence of students;
- know the methodological foundations and technologies of criteria-based learning;
- to realize the value of Kazakhstan's history and culture, the importance of national values for building a nurturing educational environment, the implementation of spiritual and moral education of students;
- be able to determine the criteria of innovative processes in education, possess methods of modeling the innovation process;
- be able to organize the process of teaching the subjects "History of Kazakhstan" and "World History" on the basis of six historical concepts (concepts); be able to use the advantages of a spiral curriculum;
- be able to introduce innovative learning technologies into the pedagogical process in order to create conditions for effective motivation of students;
- be able to confirm in-depth knowledge in the field of professional specialization; demonstrate modern methodology and methodology for solving professional tasks;
- possess the skills of applying new educational innovative technologies for teaching history;
- possess communication technologies, pedagogical rhetoric skills, communication strategies, tolerance and the ability to pedagogical cooperation;
- possess the skills to study and apply innovative pedagogical experience, high motivation for pedagogical activity, the desire for self-education and self-realization;
- possess the skills of organizing distance learning, organizing communication through forums, chats and video conferences;
- possess the skills of using catalogs of information resources of electronic libraries; demonstrate remote access to theoretical and practical material;
- apply a system of criteria-based assessment that meets the requirements of the education system;
- to apply an updated system of values, skills and abilities in the psychological, pedagogical and historical and methodological fields of knowledge, capable of being embodied in the practical activities of a teacher;
- to use in professional activity basic knowledge in the field of humanities, their main provisions and methods; to design elements of the educational program, formulate didactic goals and objectives of training and implement them in the educational process;
- evaluate and use interactive methods of teaching history, educational opportunities of school history courses;

Labor function:

Methodical - provides methodological support for the educational process

For this , the graduate must

To know:

- methods of self-determination for the development of additional knowledge;
- ways to implement individual professional development plans ;
- principles and methods of constructing situational pedagogical tasks;
- principles and methods of development of educational and program documentation;

Be able and have skills:

- independently plan your professional development;
- independently choose information from Internet sources;
- under the guidance of a mentor to determine methods and techniques, to form general academic skills and skills of students;
- develop training materials in accordance with the set goals of classes under the guidance of a mentor and/or in accordance with instructions and requirements;
- in cooperation with colleagues to create a favorable learning environment for students;

Labor function:

Research - studies the level of assimilation of educational content by students, explores the educational environment

For this , the graduate must

To know:

- principles and methods of research of the educational environment, research of educational practice ;
- research methods in history;
- methods of psychological and pedagogical tracking of students ' activities

Be able and have skills:

- independently use the results of diagnostics of individual characteristics of students;
- in cooperation with colleagues, identifies needs and difficulties in teaching history;
- use methods of joint reflection with colleagues in the context of practice research;
- plan and conduct research in the historical field under the guidance of a mentor.

4. Table 1. The sequence of mastering disciplines in the process of forming special competencies according to the educational program 6B01606 "History"

№	Competence	List of compulsory, elective disciplines and sequence their studies on each learning path		Expected results
		The list of discipline	The sequence of their study	
1.	Special competencies	Archeology	3 term	<p>To know: the main stages and patterns of development of society in the ancient and medieval historical periods, chronological framework of historical epochs, criteria for scientific periodization of the world historical process; basic terminology of historical science, basic approaches to understanding the essence of historical processes and phenomena; the history of formation and development, tasks and methods of archaeology as a science, the place of archaeology in the system of historical sciences, archaeological periodization of history, typology of archaeological monuments, the main stages of archaeological research, methods of study and research of archaeological monuments;</p> <p>Be able to: analyze and explain meaningfully historical phenomena and processes in their economic, political, cultural manifestations; apply knowledge and understanding of the civilizational approach to the study of the historical process, identify a system of complex dependencies and continuity of various types of civilizations, explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions, sedentary and nomadic civilizations; apply knowledge of theoretical aspects of archaeology in the process of educational archaeological practice, methods of field research, identify and recognize archaeological monuments, draw up field documentation, date archaeological monuments;</p> <p>Own: possess the categorical and conceptual apparatus of historical disciplines; methods of historical analysis of the main stages and patterns of development of society in different historical periods;</p>

				<p>fundamentals of analysis of historical sources and documents, possess the basics and systematization of scientific research and publications; terminology of archaeological science, excavation research techniques, skills of working with tools, field camp arrangement, collection and processing, preservation archaeological finds, measurement and mapping of archaeological monuments, reconstruction of the past;</p>
		Archaeology Of Kazakhstan	3 term	<p>To know: to know the main stages and patterns of development of society in the most ancient period of the history of Kazakhstan, the chronological framework of historical epochs, criteria for scientific periodization of the world historical process; basic terminology of historical science, basic approaches to understanding the essence of historical processes and phenomena; the history of formation and development, tasks and methods of archeology as a science, the place of archeology of Kazakhstan in the system of historical sciences, the history of the study of archaeological monuments of Kazakhstan, archaeological periodization of the history of ancient and medieval Kazakhstan, to know the typology of archaeological monuments in Kazakhstan, the main stages of archaeological research, methods of study and research of archaeological monuments;</p> <p>Be able to: analyze and explain meaningfully historical phenomena and processes in their economic, political, cultural manifestations; apply knowledge and understanding of the civilizational approach to the study of the historical process on the territory of Kazakhstan, identify a system of complex dependencies and continuity of various types of civilizations on the territory of Kazakhstan and Central Asia, explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions, settled and nomadic civilizations; apply knowledge of theoretical aspects of archaeology in the process of educational archaeological practice, methods of field and laboratory research, identify and recognize archaeological monuments, draw up field documentation, date archaeological monuments of Kazakhstan;</p> <p>Own: possess the categorical and conceptual apparatus of historical</p>

				disciplines; methods of historical analysis of the main stages and patterns of development of society in the ancient and medieval periods of Kazakhstan; fundamentals of analysis of historical sources and documents, possess the basics and systematization of scientific research and publications; the terminology of archaeological science, the technique of excavation research, the skills of working with tools, arranging a field camp, collecting and processing, preserving archaeological finds, measuring and mapping archaeological monuments on the territory of Kaazakhstan, reconstructing the past;
2.	Special competencies	History of the Ancient World	3 term	<p>To know:</p> <p>the main stages and patterns of development of society in the period of antiquity, the chronological framework of the era of the ancient world, the criteria of scientific periodization of the world historical process, the basic terminology of historical science, the main approaches to understanding the essence of historical processes and phenomena of antiquity; the main stages of the history of primitiveness, the genesis of economic, political and cultural development in the ancient world; driving forces and patterns the historical process, the most important achievements of the culture of the ancient era; apply knowledge and understanding of the civilizational approach to the study of the historical process, identify a system of complex dependencies and continuity of various types of civilizations, explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions;</p> <p>Be able to:</p> <p>analyze historical phenomena and processes in their economic, political, cultural manifestations; analyze the problems of the history of primitiveness, identify cause-and-effect relationships, common features and differences of compared historical processes and events; be able to select, analyze and interpret historical sources, historical facts, historical information when solving problems in the field of professional activity;</p> <p>Own:</p> <p>skills of studying and researching the main stages of historical development in the epochs of primitiveness; skills of identifying common and special in the history of Eastern and Western</p>

				civilizations; comparative and systematic analysis of the historical process; research activities to study the main stages and patterns of development of society of the ancient world.
		History of the Ancient East	3 term	<p>To know: the main stages and patterns of development of society in the period of antiquity, the chronological framework of the era of the ancient world, the criteria of scientific periodization of the world historical process, the basic terminology of historical science, the main approaches to understanding the essence of historical processes and phenomena of antiquity; the causes of the crisis of the era of primitiveness and the transition of the ancient Eastern population to slave-owning statehood; the main patterns of the origin and development of Eastern civilizations; historical facts, events, content of socio-political and socio-economic processes; various aspects of the culture of ancient Eastern society; explain the mechanisms of formation and development of historical forms of statehood, the evolution of state and legal institutions; apply knowledge and understanding of the civilizational approach to the study of the historical process, identify a system of complex dependencies and continuity of various types of Eastern civilizations;</p> <p>Be able to: analyze historical phenomena and processes in their economic, political, cultural manifestations; analyze the problems of the history of the Ancient East, present and critically analyze information about the historical and cultural development of the ancient East and individual countries (regions); apply theoretical knowledge and understanding of the facts of the development of the historical process, be able to select, analyze and interpret historical sources, historical facts, historical information in solving problems in the field of professional activity; to identify cause-and-effect relationships, common features and differences of compared historical processes and events; to carry out a comparative analysis of historical facts, events and phenomena of public life of ancient Eastern states on the basis of historical sources;</p> <p>Own: possess the categorical and conceptual apparatus of historical disciplines (Oriental studies); the skills of using knowledge on current</p>

				problems of the development of the ancient East; the skills of research activities to study the main stages and patterns of development of Eastern societies; the skills of identifying common and special in the history of Eastern and Western civilizations; the skills of comparative and systematic analysis of the historical process; the ability to critically comprehend events and phenomena of eastern historical epochs; the skills of studying scientific literature and its use in specific research; the ability to critically comprehend the events and phenomena of the ancient period of history.
3.	Special competencies	Ancient History of Kazakhstan	3 term	<p>To know: formation and development of archaeological cultures on the territory of ancient Kazakhstan, the origin of the producing economy, changes in social relations, the origin and development of nomadism, Scythian-Saka culture, the history of early state formations and Turkic states on the territory of Kazakhstan; basic terminology of historical science, basic approaches to understanding the essence of historical processes and phenomena of antiquity; knowledge and understanding of the civilizational approach to the study of the historical process, the system of complex dependencies and the continuity of various types of civilizations, explain the mechanisms of formation and development of historical forms of statehood, the evolution of state and legal institutions; historical facts, events, the content of socio-political and socio-economic processes in the ancient history of Kazakhstan;</p> <p>Be able to: analyze the problems of the ancient period of the history of Kazakhstan; analyze and compare the forms of organization and the evolution of the state and social structure at various stages of the ancient period of development of Kazakhstan; carry out a comparative analysis of historical facts, events and phenomena of public life based on historical sources; apply theoretical knowledge and understanding of the facts of the development of the historical process, be able to select, analyze and interpret historical sources, historical facts, historical information when solving problems in the field of professional activity;</p> <p>Own: categorical and conceptual apparatus of historical disciplines; skills of</p>

				<p>analysis of the main stages of the historical development of Kazakhstan in the ancient period of history; identification of common and special in the ancient history of Kazakhstan; comparative and systematic analysis of the historical process; research skills to study the main stages and patterns of development of society; the study of scientific literature and its use in educational and research work;</p>
		<p>Ancient civilizations in world history</p>	<p>3 term</p>	<p>To know: the history of the formation and development of civilizations, the main historical facts, events and processes; key concepts, phenomena characterizing the historical originality of ancient civilizations; the main trends of historical development and the specifics of the historical development of various regions of the world; criteria for scientific periodization of the world historical process, the basic terminology of historical science, the main approaches to understanding the essence of historical processes and phenomena; understand theoretical and methodological foundations of world historical science; the general picture of the world historical process with its regional and local features in the most ancient period; the driving forces and patterns of the historical process; the main facts and phenomena characterizing the integrity of the historical process, Be able to: to show and explain the history of the formation and development of civilizations, historical facts, events and processes that characterize the historical originality of ancient civilizations; to reveal historical phenomena and processes in their economic, political, cultural manifestations. to carry out a comparative analysis of historical facts, events and phenomena of public life on the basis of historical sources; to carry out the selection, analysis and interpretation of historical sources, historical facts, historical information in solving problems in the field of professional activity; Own: fundamentals of the analysis of the main stages of the historical development of ancient civilizations; identification of the common and special in the history of Eastern civilizations; comparative and systematic analysis of the historical process; primary research skills for the study of the main stages and patterns of development of society of</p>

				the ancient world; the study of scientific literature and its use in educational and scientific activities; possess the basics and systematization of scientific research and publications;
4.	Special competencies	Medieval History of Kazakhstan	4 term	<p>To know: the main stages and patterns of development of society in the medieval period of Kazakhstan, the chronological framework of the Middle Ages, to know the basic terminology of historical science, the main approaches to understanding the essence of historical processes and phenomena of medieval history of Kazakhstan; the overall picture of the world historical process with its regional and local features during the Middle Ages; apply knowledge and understanding of the civilizational approach to the study of the historical process, identify a system of complex dependencies and continuity of various types of civilizations, explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions, settled and nomadic civilizations; the processes of Kazakhstan's entry into the Mongolian statehood, the history of post-Mongolian state formations, the problems of the ethnogenesis of Kazakhs and the peculiarities of the formation of the Kazakh nationality and statehood, its place in the world and Eurasian historical and cultural integration processes, the specific features of the formation of the national culture of the Kazakh people;</p> <p>Be able to: to show the inextricable link between the ethnopolitical development of Kazakhstan in the late medieval period with the preceding Turkic period; to have a scientific understanding of this period of historical development, to analyze the historical past on the basis of the principle of historicism; to have an idea of the sources on the medieval history of Kazakhstan; to put into practice the knowledge gained on the socio-economic, political and cultural development of medieval Kazakhstan; to apply knowledge and understanding of the civilizational approach to the study of the medieval historical process, to identify a system of complex dependencies and continuity of various types of civilizations, to explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions, settled and nomadic civilizations; to select, analyze and interpret historical</p>

				<p>sources, historical facts, historical information when solving problems in the field of professional activity;</p> <p>Own:</p> <p>skills of applying the scientific categorical and conceptual apparatus of historical science; skills of identifying common and special in the history and development of nomadic civilizations; methods of historical description and analysis of causes and consequences of events in the history of medieval Kazakhstan, methods of historical analysis of the main stages and patterns of development of society during the Middle Ages; fundamentals of analysis of historical sources and documents, fundamentals of systematization of scientific research and publications; skills of comparative and systematic analysis of the historical process; the basics of research activity on the study of the main stages and patterns of development of Kazakh society, selection and study of scientific literature and its use in educational and research activities;</p>
		History of the Kazakh Khanate	4 term	<p>To know:</p> <p>the main stages and patterns of development in the history of the Kazakh Khanate, in the context of new conceptual approaches, the stages of the formation of the Kazakh nation, socio-economic, political, cultural processes, the political history of the Kazakh Khanate, the role and place of the Kazakh people in the system of nomadic civilization; the processes of the colonization movement of Russia, the results of colonization, its consequences; the evolution of the spiritual world of nomads and their contribution to the civilization of the Eurasian world; apply knowledge and understanding of the civilizational approach to the study of the historical process, explain the mechanisms of formation and development of historical forms of statehood, the evolution of state-legal institutions.</p> <p>Be able to:</p> <p>analyze the historical past on the basis of the principle of historicism, apply in practice the knowledge gained on the socio-economic, political and cultural development of Kazakhstan, identify cause-and-effect relationships of events; carry out a comparative analysis of historical facts, events and phenomena of public life based on historical sources; navigate in modern historical literature, characterize</p>

				<p>the principles and guidelines of new methodological approaches; to carry out the selection, analysis and interpretation of historical sources, historical facts, historical information when solving problems in the field of professional activity; to compare and analyze historical facts in their connection with the world-historical process.</p> <p>Own:</p> <p>skills of applying the scientific categorical and conceptual apparatus of historical science; skills of identifying common and special in the history and development of nomadic civilizations; methods of historical description and analysis of causes and consequences of events in the history of the Kazakh Khanate, methods of historical analysis of the main stages and patterns of development of Kazakh societies; fundamentals of analysis of historical sources and documents, fundamentals of systematization of scientific research and publications; skills of comparative and systematic analysis of the historical process; fundamentals of research activity on the study of the main stages and patterns of development of Kazakh society, selection and study of scientific literature and its use in educational and research activities; skills of independent and research activities using the latest theoretical, conceptual and methodological approaches;</p>
5.	Special competencies	History of the Middle Ages	4 term	<p>To know:</p> <p>the periodization of the history of the Middle Ages and the main directions of the development of medieval studies; the terminological apparatus used by medieval studies; the main types of medieval historical sources; to understand the specifics of working with them; the main facts of the history of the Middle Ages, the processes of the origin, formation, flowering and decomposition of feudal relations, the emergence of nationalities and nations, states of modern Europe, the genesis of capitalism and the preparation of the modernization process, formation of the basis of Christian doctrine and organization of Roman Catholic, Orthodox and Protestant churches; the most important achievements of medieval history; names and biographical information about outstanding historical figures; the main trends of the processes that took place in society, political institutions, economy, religion, culture, the development of structures of everyday life; to understand the historical and cultural originality of medieval civilization to</p>

			<p>represent its place and significance in the general historical process, the influence of the Middle Ages on modern socio-political realities; the main methodological concepts and research schools in the history of the Middle Ages.</p> <p>Be able to:</p> <p>to orient oneself in the main, most significant, modern methodological approaches to medieval history; to describe historical events, cultural monuments, comment on the main content of individual factors and phenomena of the history of the Middle Ages; to analyze, explain, evaluate historical facts and phenomena in the history of the Western European Middle Ages, to work with chronology;- work with a historical map; independently pose a research problem; demonstrate the ability and willingness to work with various types of historical sources, educational, methodological and scientific literature on the problems of the course, the performance of educational and research tasks, independent search, processing and use of various types of information.</p> <p>Own:</p> <p>possess the categorical and conceptual apparatus of the historical discipline; competently reproduce scientific information about the subject of study, trace the cause-and-effect relationships of historical events and processes, identify the main trends of social development, determine their specifics, give an objective assessment taking into account the latest achievements of historical science; the basics of systematization of scientific research and publications; skills of comparative and systematic analysis of the historical process; the basics of research activity on the study of the main stages and patterns of development of medieval society, the selection and study of scientific literature and its use in educational and research activities;</p>
		History of the Middle Ages of Europe	<p>4 term</p> <p>To know:</p> <p>the main periods of European medieval history; the main facts and phenomena characterizing the integrity of the historical process, the driving forces and patterns of the historical process in Europe in the Middle Ages; the content of the evolution of Western European civilization in the Middle Ages based on the achievements of modern historical knowledge; the place of medieval man in the historical</p>

				<p>process, the most important parameters of his spiritual culture and value system formed in the course of historical development; to understand the significance of the spiritual heritage of medieval civilization.</p> <p>Be able to:</p> <p>to orient oneself in the issues of periodization and chronology of the Middle Ages, economic, social and political history; to analyze historical events, establish cause-and-effect relationships; to identify common features and differences of historical phenomena and processes being compared; to draw lessons from historical events; to formulate and justify one's position on the key problems of the development of world civilizations during the Middle Ages; to orient oneself in specialized literature on the profile, competently refer the educational and scientific literature on the subject; apply the acquired knowledge in solving pedagogical, educational, methodological and scientific tasks;</p> <p>Own:</p> <p>to identify the civilizational features of the development of Western European countries in the V–XVII centuries; to comprehend the place and role of the medieval civilization of Western Europe in the history of mankind; to possess a system of knowledge about the main stages of development and the most important events of world history in the Middle Ages; to realize the place and role in the world history of Western European civilization, to understand the general and special in their development, the main complexes of historical sources on the history of individual countries and regions in the Middle Ages; the basics of systematization of scientific research and publications; the skills of comparative and systematic analysis of the historical process; the basics of research activities for the study of the main stages and patterns of development of medieval society, the selection and study of scientific literature and its use in educational and research activities;</p>
6.	Special competencies	Auxiliary historical discipline	4 term	<p>To know:</p> <p>the history of the emergence and development of special historical disciplines, the stages of their formation and modern state; the basic concepts of the studied disciplines, their specifics and application in the learning process; the subject of research of each special historical</p>

				<p>discipline, the features of the disciplinary structure of modern historical science and the place of special historical disciplines in it ;</p> <p>Be able to:</p> <p>apply basic research methods of special historical disciplines in the process of working on sources; analyze the information obtained in the study of special historical disciplines and link them with the real historical process, analyze historical problems, establish cause-and-effect relationships; identify common features and differences of historical processes and events being compared; historical sources, establish cause-and-effect relationships; work with paleographic, metrological and chronological material.</p> <p>Own:</p> <p>general professional knowledge of the theory and methods of historical research; the ability to understand, critically analyze and present basic historical information;</p> <p>skills of working with educational and methodical literature, with historical sources (material and written); necessary theoretical knowledge for the passage of archaeological, archival and museum practices; principles and methods of selection and systematization of archival documents;</p>
		<p>Historical geography</p>	<p>4 term</p>	<p>To know:</p> <p>the main stages of the development of historical geography and modern problems of its development; the place of historical and geographical research in historical and geographical science; patterns of spatial and historical development, the problems of the main branches of historical geography, directions of practical use of historical and geographical research; stages of the development of the earth's territory by human society, the formation of the world map in various historical epochs; the history of the formation and the development of human society in close connection with the geographical, climatic and economic environment.</p> <p>Be able to:</p> <p>make historical and geographical characteristics of regions; carry out historical and geographical studies of territories; explain the reasons for the revaluation of the territory; take inventory of historical and cultural landscapes for the purpose of protection and museification;</p>

				<p>make historical and geographical reviews; critically approach the content of sources and scientific literature on the discipline;</p> <p>Own:</p> <p>general professional knowledge of the theory and methods of historical and geographical research; methodology of historical and geographical zoning and compilation of historical and geographical maps; methods of reconstruction of the past interaction of society and nature; methodology of inventory and museification of historical and cultural landscapes</p>
7.	Special competencies	Basics of museology and archival studies	4 term	<p>To know:</p> <p>to master the basics of archival science and museology; the history and organization of archival and museum business, principles, methods of research work in archives and museums; theory and methodology of archival and museum business; archival law and archival legislation; management and marketing in archives and museums; basic methods, tools for organizing and conducting research in the field of archival science and museology; understand the goals, methodology and methods of professional activity of an archivist and museologist; use fundamental knowledge of archival and museology, know methods of information protection; basic concepts and theoretical research in archival science and museology; methods of analysis and classification of conceptual and theoretical research in museology; fundamentals of museology; the main stages and events of the world and national history of museology; fundamentals of methodological work in the field of broadcasting and popularization of professional knowledge and skills.</p> <p>Be able to:</p> <p>to apply in practice normative acts in the field of archival affairs and; to use in professional activity the conceptual apparatus of archival science and museology; to conduct an examination of the value of documents, prepare them for archival storage or destruction; to identify, select materials for compiling collections of historical documents; to communicate professional information to specialists and consumers of services; to use theoretical knowledge and research methods on practice; design, construct professional activities, carry out diagnostics, evaluate and adjust the results. to use archive materials</p>

				<p>in the process of scientific research; to apply knowledge about the basics of modern museology, to use knowledge of the main stages of the development of museology; knowledge about the processes of formation and development of the main trends in the field of museology; to use in practice knowledge of techniques and technologies for the design of exhibitions and art expositions; interpret information obtained as a result of their own observations or their own search activities in the field of museology via the Internet;</p> <p>Own:</p> <p>methods of information protection; examination of the value of documents, research work in archives; methods of archival work; diagnostics and evaluation of documents; methods of work in archives of republican, regional and local significance; skills of analysis of museum artifacts (in written and oral form); presentation of research results in the form of a report, abstract; techniques of presentation of research results; independent acquisition of new knowledge in the field of museology; analysis of significant problems of modern museology; comparison and evaluation of domestic and foreign samples of museum material;</p>
		History of museums in the world	4 term	<p>To know:</p> <p>the main stages and patterns of the emergence and development of the world's leading museums in the context of global trends, the dynamics of the formation of the museum as a cultural form in a set of countries, the patterns of formation and evolution of the museum as a socio-cultural institution from ancient times to the present; the main prerequisites and conditions and components of the process of formation of museums; the typology of museums in their historical dynamics; the stages of formation and collection the composition of the largest museum collections in the world (Europe, Asia, Africa, America), the purpose of the museum and its functions in different eras; the processes of formation and dynamics of the main directions of museum activity (preservation, educational, educational, etc.), the social functions of museum institutions as institutions of social memory and storage of cultural experience, carrying out specific activities for the acquisition, storage, restoration and publication of cultural monuments;</p>

				<p>Be able to:</p> <ul style="list-style-type: none"> to orient oneself in the diversity of cultural and historical epochs; to orient oneself in the typological features of the museums of the world; in the activities of the leading museums of the world, their specifics, diversity of forms of cultural contacts; to apply the knowledge gained in the development of socio-cultural projects; to show the importance of historical experience for improving the modern theory and practice of domestic museum business; to analyze the facts of the history of museums of the world from the standpoint of patterns of the emergence and development of museum business in the context of global trends; <p>Own:</p> <ul style="list-style-type: none"> skills of analysis of museum artifacts (in written and oral form); presentation of research results in the form of a report, abstract; techniques of presentation of research results; independent acquisition of new knowledge in the field of museology; analysis of significant problems of modern museology; comparison and evaluation of domestic and foreign samples of museum material; ability to apply theoretical foundations and methods of historical and cultural and museological knowledge in the study of modern museums and objects of cultural and natural heritage;
8	Special competencies	Methods of teaching history	5 term	<p>To know:</p> <ul style="list-style-type: none"> the theoretical and scientific-pedagogical foundations of the methodology of teaching history, its place and values in the system of pedagogical sciences and explain the modern strategy for the development of school historical education in the Republic, to apply in practice normative documents on school historical education in the Republic of Kazakhstan; methods and methodological techniques of teaching history, classification of teaching methods, to own the means of teaching history in conditions of updating the content of education; educational opportunities of school history courses. <p>Be able to:</p> <ul style="list-style-type: none"> to determine the main aspects of pedagogical activity; to realize the goals of teaching and upbringing, to build the pedagogical orientation of the methodology of teaching history; to actualize, concretize, implement the goals of teaching and upbringing; to use modern

				<p>innovative technologies in teaching history; to use research methods;</p> <p>Own:</p> <p>methods of preparing and conducting lessons of various types and forms, modern teaching technologies; skills of educational, educational-methodical and research work, technology of criterion assessment; methods of critical thinking; skills of applying new educational innovative technologies of teaching history;</p> <p>skills to study and apply innovative pedagogical experience, high motivation for pedagogical activity, striving for self-education and self-realization;</p>
9	Special competencies	Fundamentals of scientific research	5 term	<p>To know:</p> <p>the logic of scientific research, procedures and levels of scientific work; methods of scientific research, the scope and features of their application, the importance of ideological positions in scientific research; the essence of science, scientific directions and scientific results; basic theoretical provisions, laws, principles, terms, concepts, processes, methods, technologies, tools, operations for the implementation of scientific standards and regulations for the design of research results, preparation of scientific reports, publications for seminars and conferences; general methodology of scientific design and creativity; procedures for testing the results of scientific research.</p> <p>Be able to:</p> <p>to designate the object and subject of scientific research, to pose problems, to find facts, to build hypotheses and their proofs; to orient oneself in the main methodological and ideological problems; to perform the procedure of setting and solving scientific problems; to be able to justify the relevance of the chosen topic, to formulate and solve problems arising in the course of research activities, to choose the necessary research methods and apply them, to make an individual work plan; to carry out the selection of material for scientific research (thesis, systematize literature, work with various sources of information, compile bibliographic lists, apply theoretical knowledge. to build the structure of scientific work (thesis), set tasks and find ways to solve them, perform computer layout of scientific work (thesis), implement verbal speech.</p> <p>Own:</p>

				<p>the skills of choosing a scientific research topic, collecting and processing information, the basic rules for taking notes of scientific literature, the methodology of conducting scientific research; professional vocabulary; conceptual and categorical apparatus, the culture of presentation of the material and the skills of scientific polemics, the use of scientific literature in the process of creating a scientific text. skills to study methods of planning and organizing scientific research; conducting the initial stages of scientific research, selecting the necessary bibliographic publications.</p>
		<p>History and methodology of science</p>	<p>5 term</p>	<p>To know: theoretical and methodological, methodological and organizational aspects of the implementation of research activities; the main stages of the historical development of science; the specifics and foundations of the formulation of the problem of the development of science in the XX - early XXI centuries; the main strategies for describing the development of science; the main problems of the study of science as a socio-cultural phenomenon, its functions, laws of development and functioning; ethical problems and aspects science and scientific activity; basic concepts and concepts of the philosophy of science, the history of the development of scientific knowledge, the history of the formation and development of the scientific picture of the world; ontological, epistemological, social and axiological aspects of the philosophy of science, various methods of scientific cognition of the world.</p> <p>Be able to: represent the structure of scientific knowledge and be able to describe its main elements; analyze the trends of modern science, identify promising areas of scientific research in the subject area of professional activity, the composition of research papers, their determining factors; use experimental and theoretical research methods in professional activities; adapt modern achievements of science and high-tech technologies to the educational and self-educational process; to work with scientific literature of various levels (popular science publications, periodicals), including in foreign languages; to comprehend the dynamics of scientific and technological development in a broad socio-cultural context. use the knowledge of the philosophy</p>

				<p>of science to evaluate and analyze various methodological, interdisciplinary ethical, social, cultural trends, facts and phenomena.</p> <p>Own:</p> <p>culture of thinking, methods and techniques of logical analysis, oral and written presentation of basic philosophical and scientific knowledge, skills of analysis of philosophical and scientific texts, methods of discussion and polemics, public speech and written presentation of one's own point of view; modern methods of scientific research in the subject area; ways of understanding and critical analysis of scientific information; improvement and development their scientific potential; apply the knowledge gained in conducting and organizing research activities;</p>
10	Special competencies	The history of the countries of the East and West in modern times	5 term	<p>To know:</p> <p>the main stages of the historical development of the East and the West, its place in world history; patterns of the historical path of the East and the West; the genesis of the countries of the East and the West in the period from the end of the 17th century to the beginning of the First World War; key problems in the history of the West and the East in modern times; historical causes and prerequisites of the crisis of feudal relations and the formation of capitalist relations in Western and Eastern societies, features of the development of the capitalist order in the economies of the East and West, the essence and patterns of evolution of the most important political institutions and state institutions, types and methods of colonial expansion; the main processes of social development of the West and East in the period of modern times; ideological and spiritual and moral foundations of social models that have developed in the course of historical development in the countries of the West and East in modern times, historical prerequisites for their further evolution;</p> <p>Be able to:</p> <p>to characterize the basic concepts, scientific categories, nodal plots of the history of foreign countries of modern times; to analyze individual problems, identify typological features and features of similar phenomena of the historical process, to distinguish the actions of objective and subjective factors; to take into account and compare different points of view on the key problems of the historical development of the countries of the West and East in modern times; to reveal the connection of actual problems the history of the countries of the West and the East in modern times and trends in the evolution of the modern world; analyze historical problems, establish cause-</p>

				<p>and-effect relationships; characterize the politics, economy and culture of the countries of the West and East in modern times and the main trends of its development; use the whole set of available historical sources, educational and scientific literature, electronic resources for the reconstruction of the new history of foreign countries;</p> <p>Own:</p> <p>identify common features and differences of historical processes and events being compared; work with information (information complexes, sources) to solve educational, professional and social problems; skills in analyzing socially significant processes and problems using basic material on the new history of the East and West; culture of historical thinking, the ability to generalize, analyze, and perceive information methods of historical description and analysis of the causes and consequences of events, methods of historical analysis of the main stages and patterns of development of the countries of the East and West..</p>
		<p>History of Asia and Africa in modern times</p>	<p>5 term</p>	<p>To know:</p> <p>the main events, phenomena, processes of the history of Asian and African countries in the New Time period; the causes, course and consequences of the main events of the history of countries in the New Time period; assessments of the main historical events of the history of Asia and Africa in the New time period in historiography; the main source database of information about the events of the history of countries in the New Time period; basic methods of critical analysis of historical information; basic material on the history of Asia and Africa in the period of Modern times in historical research, in assessing current problems of modernity;</p> <p>Be able to:</p> <p>to carry out the selection of sources on the history of Asia and Africa in the period of Modern times; to analyze and interpret events, phenomena, processes on the history of countries in the period of Modern times when solving problems in the field of professional activity; to analyze the main historiographical concepts; to identify the main mechanisms, factors and trends in the development of Asian and African states in the period of Modern times; to understand the events, phenomena, processes of the history of countries in the period of Modern times; to give a critical assessment of historical data, to conduct a discussion on the topic of historical research.</p>

				<p>Own:</p> <p>identify common features and differences of historical processes and events being compared; work with information (information complexes, sources) to solve educational, professional and social problems; skills in analyzing socially significant processes and problems using basic material on the modern history of Asian and African countries; culture of historical thinking, the ability to generalize, analyze, perceive information, goal setting and the choice of ways to achieve it; the basics of systematization of scientific research and publications; skills of comparative and systematic analysis of the historical process; the basics of research activities to study the main stages and patterns of development of Asian and African countries;</p>
11	Special competencies	The New History of Kazakhstan	5 term	<p>To know:</p> <p>the main stages and patterns of development of the Kazakh society in the period of modern history, the chronological framework of the historical era, the criteria of scientific periodization of the world historical process; the overall picture of the world historical process with its regional and local features in the new period of history; problems socially – political development of Kazakhstan in a new period of history, class stratification, economy of Kazakh society, the development of spiritual culture, the processes of transformation of the Kazakh Khanate into a colonial appendage of the Russian Empire, historical events that took place on the territory of Kazakhstan in interrelation and interaction with the history of the peoples of Eurasia, the place of Kazakhstan in the system of international relations of the XIII-XIX centuries, the main facts and phenomena, characterizing the integrity of the historical process, the driving forces and patterns of the historical process on the territory of Kazakhstan in the new period of history;</p> <p>Be able to:</p> <p>analyze and explain historical phenomena and processes on the territory of Kazakhstan in their economic, political, cultural manifestations in a new period of history; carry out a comparative analysis of historical facts, events and phenomena of public life based on historical sources; carry out selection, analysis and interpretation of</p>

				<p>historical sources, historical facts, historical information when solving problems in the field of professional activity; apply at a basic level knowledge of the theory and methodology of historical science in professional activities; be able to analyze the historical past on the basis of the principle of historicism;</p> <p>Own:</p> <p>the skills of applying the scientific categorical and conceptual apparatus of historical science; identifying the common and special in the history and development of Kazakhstan of the new period; methods of historical description and analysis of causes and consequences of events, methods of historical analysis of the main stages and patterns of development of Kazakh societies; fundamentals of analysis of historical sources and documents, fundamentals of systematization of scientific research and publications; skills of comparative and system analysis of the historical process; the basics of research activity on the study of the main stages and patterns of development of Kazakhstan, the selection and study of scientific literature and its use in educational and research activities;</p>
		<p>Current problems of Kazakhstan a new period of history</p>	<p>5 term</p>	<p>To know:</p> <p>the main stages and patterns of development of Kazakh society in a new period of history, the basic terminology of historical science, the main approaches to understanding the essence of historical processes and phenomena; current problems in the study of the history of Kazakhstan of modern times, the integrity of the historical process within the territory of Kazakhstan, Kazakhstan's entry into the world stream of New history; the range of priority problems: the mentality of Kazakhs, evolution traditions, mores, transformation of law, law, and power, Kazakh society in modern times; transformation of Kazakhstan into a continental colony, to know. how Kazakhstan, the Kazakh people lost their state independence; apply knowledge and understanding of the civilizational approach to the study of the historical process, identify a system of complex dependencies and continuity of civilization, explain the mechanisms of formation, development of historical forms of statehood, the evolution of state-legal institutions, nomadic civilizations;</p> <p>Be able to:</p>

				<p>analyze the historical past on the basis of the principle of historicism, scientific; analyze and explain historical phenomena and processes in their economic, political, cultural manifestations; carry out a comparative analysis of historical facts, events and phenomena of public life based on historical sources; identify current problems and concepts in the field of national history of the new period, carry out selection, analysis and interpretation historical sources, historical facts, historical information in solving problems in the field of professional activity;</p> <p>Own:</p> <p>fundamentals of research activity on the study of the main stages and patterns of development of Kazakh society in a new period of history; skills of selection and study of scientific literature and its use in educational and research activities; fundamentals of analysis of historical sources and documents, fundamentals and systematization of scientific research and publications; skills of comparative and systematic analysis of the historical process in a new period of time;</p>
12	Special competencies	Innovative technologies in teaching history	6 term	<p>To know:</p> <p>current trends in the development of the educational system within the framework of updating the content of education; principles of building school historical education; technologies of designing the pedagogical process in the history lesson, principles of developing innovative methods of organizing the educational process; to know the pedagogical orientation of innovative teaching technologies, since it provides training and education by means of teaching history;</p> <p>Be able to:</p> <p>to distinguish between the concepts of innovation, innovation processes; to determine the theoretical and methodological aspects of innovation in education; to introduce innovative techniques into the pedagogical process in order to create conditions for effective motivation of students; to demonstrate mastery of technologies of personality-oriented learning, critical thinking;</p> <p>Own:</p> <p>theoretical and practical bases of conducting innovative lessons; methods of designing and developing innovative methods of organizing the educational process; methods of building the</p>

				educational process with innovative technologies of teaching history; skills of using innovations in teaching history; make logical diagrams, lesson summaries according to the updated educational program; methods of preparing and conducting various types of innovative lessons;
13.	Special competencies	The history of the countries of the East and West in modern times	6 term	<p>To know:</p> <p>the driving forces and patterns of the historical process; the place of man in the historical process, the state, socio-economic and military-political organization of the world of the XX – beginning of the XXI century; the diversity of cultures and civilizations of the East and West in their interaction; the nature of the struggle around the problems of historical choice and the reasons for the victory of certain forces in a particular period of history; the most important social processes, trends of their development in the world community; the main cultural and historical achievements in the world; the main stages, events of social development of countries in modern times; - the specifics of social processes in the countries of the West and East in modern times;</p> <p>Be able to:</p> <p>conduct a comparative analysis of the facts and phenomena of public life based on the historical material of the countries of the East and West; determine the features of the public organization and culture of different countries; analyze historical information about countries, compare, analyze and design models of the historical development of European and Eastern countries, identify the features of the development of countries in modern times</p> <p>Own:</p> <p>skills of analysis of political, socio-economic processes and problems of the countries of the East and West in modern times, the basics of research activities to study the main stages and patterns of development of the countries of the East and West in the modern period of history; skills of selection and study of scientific literature and its use in educational and research activities; the basics of analysis of historical sources and documents, the basics of and systematization of scientific research and publications; skills of comparative and systematic analysis of the historical process in the recent period of time;</p>

		<p>Modern history of Asia and Africa</p>	<p>6 term</p>	<p>To know: basic material (concepts, names, dates) on the modern history of Asian and African countries; the content and nature of the process of breaking the old socio-economic structure and its transformation; current problems of Modern history of the XX – early XXI centuries, the main patterns of development of the leading countries of Asia and Africa; their similarities and differences; the causes and process of modernization of traditional societies of the East; definition of general patterns of historical development of the leading Eastern countries (Japan, China, Korea, India, Iran, Turkey, Arab countries); the consequences of the decolonization of the countries of the East in the twentieth century, the choice of ways of development in the postcolonial period and the current state of the leading states of the East and Africa in the context of globalization; options for political, socio-economic development and modernization renewal of developing states; basic techniques for reconstructing historical reality using historical sources and research results; debatable and unresolved problems the modern history of mankind and the history of Asian and African countries.</p> <p>Be able to: evaluate and operate on the facts of the modern history of Asian and African countries; work with a map; characterize and evaluate the activities of subjects of the modern history of the East and Africa; formulate judgments based on the analysis of available evidence and the study of a wide range of scientific views; evaluate the main historiographical problems of the course studied; analyze historical information about countries, compare, analyze and to design models of the historical development of African and Eastern countries, to identify the features of the development of countries in modern times; to select, analyze and objectively interpret material for seminars, research activities.</p> <p>Own: methods of selecting sources on the history of Asian and Eastern countries in the modern period of history; skills of analysis and interpretation of events, phenomena, processes in the history of Asian and African countries in the period of modern times when solving</p>
--	--	--	----------------------	--

				problems in the field of professional activity; analysis of historiographical concepts, identification of the main mechanisms, factors and trends in the development of states; evaluation of historical data (events, phenomena, processes); skills of complex work with various types of historical sources; the ability to understand, analyze and present historical information on the recent history of Asia and Africa.
14.	Special competencies	The recent history of Kazakhstan	6 term	<p>To know:</p> <p>the main stages and patterns of development of Kazakh society in the modern period of history, the main approaches to understanding the essence of historical processes and phenomena; the general picture of the world historical process with its regional and local features in the modern period; the main facts and phenomena characterizing the integrity of the historical process, the driving forces and patterns of the historical process in the modern period of the history of Kazakhstan; historical events of the XX- beginning.XX1bv. in the context of modern methodological approaches of historical science, the processes of development and crisis of the Soviet system in Kazakhstan, the formation of an independent Republic of Kazakhstan, the main directions of political modernization, the evolution of the political system, the leading directions of socio-economic and cultural policy of a sovereign state;</p> <p>Be able to:</p> <p>analyze and explain historical phenomena and processes in their economic, political, cultural manifestations in the recent period of the history of Kazakhstan, apply knowledge and understanding of the civilizational approach to the study of the historical process, explain the mechanisms of formation and development of independent statehood, the evolution of state-legal institutions, identify cause-and-effect relationships, common features and differences of the compared historical processes and events; to carry out the selection, analysis and interpretation of historical sources, historical facts, historical information in solving problems in the field of professional activity; to carry out a comparative analysis of historical facts, events and phenomena of public life on the basis of historical sources;</p> <p>Own:</p>

				<p>categorical and conceptual apparatus of historical discipline; methods of historical analysis of the main stages and patterns of development of Kazakh society; fundamentals of analysis of historical sources and documents, fundamentals and systematization of scientific research and publications; skills to identify common and special in the history and development of Kazakhstan in the recent period of history; skills of comparative and systematic analysis of the historical process; fundamentals of research activities on to study the main stages and patterns of development of Kazakhstan society; skills of selection and study of scientific literature and its use in educational and research activities;</p>
		<p>Actual problems of modern history of Kazakhstan</p>	<p>6 term</p>	<p>To know: priorities of national history, issues of actualization of the problems of national history, the main methods of studying the modern history of Kazakhstan, new conceptual approaches in the study of the history of the Fatherland; the main stages of the history of modern Kazakhstan; to understand the processes of transformation of Kazakh society under the influence of the Soviet system, its socio-political transformations, historical foundations and periods and problems of the formation of independent Kazakh statehood in the context of the world and Eurasian historical process, the evolution of forms of statehood, the content of the Kazakh model of development in the period of accelerated modernization, the continuity and continuity of historical and cultural development, ethnosocial processes, social politics, directions and mechanisms of its transformation; features of the daily life of the city and village; a new vision of the historical process; integration of the event history of modern Kazakhstan into the global historical context; Be able to: to reveal the historical content of the foundations of the laws of political, socio-economic, cultural processes at the stages of the formation of an independent state; to form objectively and comprehensively comprehend the inherent advantages, features and significance of the Kazakh model of development; to develop the ability to analyze socio-political processes and give them an objective assessment; to evaluate the history of modern Kazakhstan in the context of world-historical processes; identify the most pressing</p>

				<p>problems, determine the place of Kazakhstan in the global social space and historical time; be able to correlate individual phenomena and events of the historical past with the general paradigm of the world-historical development of human society through analysis, comparative historical and other methods of scientific research.</p> <p>Own:</p> <p>analytical and axiological analysis skills in the study of complex historical processes, phenomena and historical personalities of modern Kazakhstan; scientific method of historical cognition, skills with historical sources, educational and scientific literature, Internet sources, extract and interpret information from them; skills of comparative and systematic analysis of the historical process; ability to critically comprehend historical events and phenomena of modernity.</p>
15	Special competencies	Criteria-based assessment and technologies in history teaching	6 term	<p>To know:</p> <p>the content characteristic of the concept of "criterion evaluation of educational achievements"; scientific foundations of measuring technologies for evaluating educational achievements; a process based on comparing students' educational achievements with certain criteria, contributing to the formation of educational and cognitive competence of students; models and essences of evaluation; assimilation and implementation of a system for evaluating students' educational achievements; methodological foundations and technologies of criterion-oriented learning, features of the assessment system in personality-oriented learning, the functions of pedagogical assessment; functions of pedagogical assessment, types of assessment and design technologies; I know formative assessment, as part of the learning process; summative assessment, as a process that determines and fixes the level of assimilation of the content of the curriculum by students for a certain period;</p> <p>Be able to:</p> <p>describe and organize the learning process using criteria assessment technology; apply measurement assessment technologies in the learning process; plan criteria for evaluating subject and meta-subject results; develop a criteria assessment system that meets the requirements of the education system; use a diagnostic method for the development, communication, behavior of children in different age</p>

				<p>groups; organize various activities of children; evaluate subject results educational activities based on the proposed criteria and norms;</p> <p>Own:</p> <p>the mechanism of assessment and self-assessment, forming the key competencies of students; to possess the pedagogical methodological foundations of measuring assessment technologies, to possess new forms and development of measuring technologies for assessing students in history subjects; specifics, functions and methods of designing and conducting developmental control lessons; the technique of formative and summative assessment; the principles of knowledge control organization, assessment goals;.</p>
		IT in history training	6 term	<p>To know:</p> <p>the educational information environment of an educational institution, its components: informatization of education, information technologies of education, traditional and modern pedagogical technologies; the essence and varieties of information and communication technologies, their place in the educational activities of a modern educational organization; the role of ICT in creating conditions for students to achieve educational goals, conditions for the technologization of the process of teaching history, studying, description of the innovative experience of teaching history, the use of digital technologies.</p> <p>Be able to:</p> <p>to introduce new information technologies into the educational process; to use traditional and innovative methods in teaching history, to use audiovisual means in teaching history; to apply IT technologies in the process of independent work of students; to design the educational process using modern information technologies that correspond to general and specific patterns and features of age-related personality development; to use in educational and educational process modern educational electronic resources;</p> <p>Own:</p> <p>skills of orientation in professional sources of information (magazines, websites, educational portals); skills of using catalogs of information resources of electronic libraries; demonstrate remote access to theoretical and practical material; apply IT technologies in inclusive education; use IT technologies in extracurricular work on the subject;</p>

				organization of distance learning of history, organization of communication through forums, chats and video conferences.
16	Special competencies	Modern course of history in the secondary education system	6 term	<p>To know:</p> <p>objectives, general strategy of teaching, education and development of students, by means of the educational subject "History"; general characteristics of the course of history, the place of the subject "History" in the school education system; the purpose of school historical education; objectives of studying history at the levels of secondary education; the content of the educational subject of History; current trends in updating school historical education; training of subject teachers of grades 5 and 7 according to the updated educational program; changes in the study of basic secondary school subjects, new approaches to learning (value-oriented, activity-oriented, personality-oriented and communicative); learning goals in the form of expected results, a spiral method in building topics in the curriculum, planning expected learning outcomes based on historical concepts, differentiation of learning, the introduction of a system of criteria-based assessment.</p> <p>Be able to:</p> <p>analyze current trends in the field of updating the content of school historical education of the republic; organize the educational process in such a way that students can develop the skills and abilities of historical and critical thinking in each lesson; ensure the formation of a scientific understanding of history and respect for both national history and the history of foreign countries and peoples; organize the process of teaching subjects "History Kazakhstan" and "World History" based on historical concepts (concepts); be able to take advantage of the spiral curriculum;</p> <p>Possess:</p> <p>new approaches to teaching history (value-oriented, activity-oriented, personality-oriented and communicative); methods of organizing teaching subjects "History of Kazakhstan" and "World History" based on six historical concepts; possess a spiral way to design an educational program; methodology of a transparent system for evaluating student academic achievements; skills of drawing up a short-term plan lessons;</p>

		Modern model of historical education	6 term	<p>To know: national priorities and values of historical education and public education; about the modern model of historical education as the organization of the educational process as a whole, as the implementation of a certain scientific approach, as a special way of organizing the educational space; current trends in the renewal of school historical education; directions of updating and reforming historical education in the context of modern innovative processes; goals and objectives of school historical education, the main content lines of school historical education; trends in the renewal of school historical education; the modern concept of historical education; different levels of representation of history - world history, history of states and peoples, domestic history and regional history, the content of school curricula on history; changes in the approach to teaching history at school.</p> <p>Be able to: apply national priorities and values of historical education and public education; form students' ideas about the modern model of historical education as an organization of the educational process as a whole; be able to organize the process of teaching subjects "History of Kazakhstan" and "World History" on the basis of six historical concepts (concepts); be able to introduce innovative learning technologies into the pedagogical process with the purpose of creating conditions for effective motivation of students; to comply with the requirement regarding the unified content of the historical material involved; to form in students: the basics of historical thinking; knowledge of the basic concepts, categories and laws of the historical process and ideas on the theory of historical cognition; to be able to design elements of the educational program, formulate didactic goals and objectives of learning and implement them in the educational process;</p> <p>Own: skills of building a nurturing educational environment, the implementation of spiritual and moral education of students; the use of interactive methods of teaching history, educational opportunities of school history courses; to design the educational process using modern</p>
