1 Explanatory note

The Modular Educational Program (MEP) was compiled on the basis of the regulatory documents of the Ministry of Science and Higher Education of the Republic of Kazakhstan and the internal regulatory documents of Alikhan Bokeikhan University.

- State standard of higher and postgraduate education of the Republic of Kazakhstan, approved by order No. 2 of the Minister of Science and Higher Education of the Republic of Kazakhstan dated July 20, 2022.

- Rules for organizing the educational process on credit technology of education, approved by order of the Minister of Education and Science of the Republic of Kazakhstan dated October 12, 2018 No. 563;

- Model rules for the activities of organizations of higher and (or) postgraduate education, approved by order of the Minister of Education and Science of the Republic of Kazakhstan dated October 30, 2018 No. 595;

- The structure of the modular educational program, edition No. 3 of 08.10.2021

The MEP is designed as a set of consecutive training modules for the entire period of study and is aimed at mastering the competencies necessary for conferring a bachelor's degree in business and management under the educational program "6B04119 State and local administration".

In the block modules of the OOP (56 academic credits in total), general disciplines are included in all educational programs, during the study of which the graduate must master general educational competencies.

The database block includes disciplines of the university component (UC) - 38 credits and elective components (EC) - 74 credits. The modules of these disciplines form a set of competencies: economic and professional.

The PD block includes disciplines of the university component (UC) - 22 credits and elective components (EC) - 38 credits. The modules of these disciplines make it possible to form a complex of special competencies acquired by a graduate

The criterion for the completion of the educational process is the student's mastering of at least 240 credits, including at least 228 academic credits of theoretical training and final certification - at least 12 academic credits. The MOS consists of 23 modules.

When developing a modular educational program, the wishes and recommendations of potential employers were taken into account, aimed at the formation of additional professional competencies that meet the requirements of the labor market (round table with employers "Interaction of the university with social partners as a condition for high-quality training of graduates" dated February 18, 2022)

Social partners who took part in the discussion of the MEP: Yerboluly M., Deputy Director of Damu Entrepreneurship Development Fund JSC for East Kazakhstan region; Zhursymbayeva A.B., director of the Semey branch of the Chamber of Entrepreneurs of East Kazakhstan region; Lui A.V. director of the Native City Public Fund; Sultanova Indira Ardakovna, specialist of the department of KSU "Employment Center of the Akimat of Semey East Kazakhstan"; Baiterekova G.E. director of the regional branch "Semey" JSC "Halyk Bank of Kazakhstan"; Nauryzbayeva S.S. director of the branch of Fortebank JSC in Semey; Ospanova N.T. head of the branch of JSC "Eurasian Bank" in Semey; Akhunzhanov D.G. director of the branch of Nurbank JSC in Semey; Kaupbaev M.Z., Head, Semey Department of Statistics; Ydyrysheva G.N., chief specialist of the State Institution "Department of Internal Policy of the City of Semey"; Malyukevich I.I., head of the planning department of the State Enterprise "Semey Vodokanal"; Korabaev DK, head of the planning and economic department of the State Enterprise "Teplokommunenergo of Semey"; Mukhamedenov E.A., Head of the Inspection Department of the Semey Regional Inspectorate of MD "Vostkaznedra"/

The purpose of the modular educational program is to train bachelors who have knowledge of organizational and managerial, economic, socio-psychological training in the system of state and local administration; in the field of business and management, who are able to make managerial decisions in the economic activities of organizations and companies of various forms of ownership.

The requirements for the level of training of students are determined on the basis of the Dublin descriptors of the first level of higher education (bachelor's degree) and reflect the acquired competencies expressed in the achieved learning outcomes.

Expected results of the modular educational program 6B04119 State and local administration:

ON 1 Demonstrate professionally-oriented skills in working with text material, use translation analysis, demonstrate fluency in state and foreign languages at a professional level, use legislative and regulatory support for office work in public administration bodies.

ON 2 Apply modern information technologies in professional activities, methods of organizing work with documents, master the basics of building information systems and digital security, analyze various sources of information for economic calculations and methods for analyzing economic processes

ON 3 Assess the economic state in the development of the economy of the region and its subjects, understand the economic regularity, financial, accounting and other information contained in the reports of organizations of various forms of ownership, with further use of the information obtained for making managerial decisions to ensure the sustainable development of the country's regions and entrepreneurship.

ON 4 Implement modern methods for calculating and analyzing socio-economic indicators that characterize economic processes and phenomena at the micro level, apply systems of macroeconomic knowledge to analyze the state of the economy, basic methods of forecasting and planning based on methods of economic and mathematical analysis and mathematical programming. Classify and evaluate business transactions in accounting accounts, apply accounting and auditing regulations.

ON 5. Describe the theoretical and legal foundations of finance, the organization of the financial system of the Republic of Kazakhstan, financial and fiscal policies and the structure of the financial mechanism, determine the effectiveness of investment decisions made, including in corporate activities, and the specifics of lending to investment projects.

ON 6. Systematize and summarize constitutional, legal and economic information for use in professional activities, meaning and features of constitutional, administrative and labor law. Understand the importance of the principles and culture of academic integrity for application in professional activities.

ON 7. To reveal the basic concepts and statistical methods of analyzing socio-economic processes. Describe the main approaches to the analysis of fiscal policy, the nature and mechanisms of forecasting the socio-economic development of the country's regions, and the procedure for developing a long-term financial plan and budgets at various levels.

ON 8. Apply basic economic methods for managing and evaluating state assets, the basics of implementing the state's fiscal policy, implementing antimonopoly policy, systematize budget formation and efficient spending of budget funds, and evaluate the requirements and organization of public service provision.

ON 9. Determine the problems and objectives of the development of public and private partnership in the Republic of Kazakhstan, state business policy and legislative support for entrepreneurship in the Republic of Kazakhstan, state regulation of the economy.

ON 10 Determine the priorities of professional activity, develop and effectively implement management decisions; apply adequate tools and technologies in the implementation of corporate governance, personnel management, business communication, study methods for evaluating human

labor; choose ways to standardize labor operations and processes in industrial enterprises; assess the dynamics of changes in the labor market, in the cost of human capital; features of consideration and resolution of labor disputes.

ON 11 Create an atmosphere of trust and respect, ensure compliance with the principles of transparency and fairness, while respecting ethical norms and standards in personnel management, business communication at the local government level and in general.

ON 12 Identify the features and problems of development of all regions of Kazakhstan, investigate the functioning of industry, regional and global markets, integration processes, economic entities of various forms of ownership in the context of digitalization, determine the financing of foreign economic policy.

ON 13 Apply the theoretical foundations of public administration, principles, methods and mechanisms of managing the economy and social development. Disclose the main issues of development and activity of public administration bodies, experience in public procurement, conducting business correspondence, interaction with the population and the business sector in the Republic of Kazakhstan, including in foreign economic activity and based on the experience of foreign countries.

ON 14 Analyze the dynamics of the development of the state apparatus in order to build an effective system of public administration and state monitoring, methods and principles of implementing the social sphere of the state, evaluate the effectiveness of state regulation, state asset management, and the provision of electronic services by participants in the public procurement system.

ON 15 Use economic knowledge, principles of strategic management to make informed decisions in the field of marketing activities, assess risks, the quality of corporate governance, budget formation, the ability to participate in the preparation and implementation of marketing, commercial, investment and other types of organization's policies.

In order to create special conditions for individuals with special educational needs to receive education, the graduate competence model is supplemented with professional competencies that ensure the adaptive nature of the main educational program. For this purpose, the catalog of courses of the additional educational program "Minor" introduces courses for developing the ability of individuals with special educational needs to successfully socialize in society and actively adapt to the labor market, taking into account the characteristics of the disease.

2. Competence model of a graduate

Bachelors of OP 6B04119 Public and local administration carry out their professional activities related to management activities in various areas of economic and social development of administrative-territorial units (districts, oblasts) and the Republic of Kazakhstan.

General education competencies:

- aimed at forming the worldview, civil and moral positions of the future specialist, competitive on the basis of knowledge of information and communication technologies, building communication programs in Kazakh, Russian and foreign languages, focusing on a healthy lifestyle, self-improvement and professional success;
- form a system of general competencies that ensure the socio-cultural development of the personality of a future specialist on the basis of the formation of his worldview, civic and moral positions;
- develop abilities for interpersonal social and professional communication in Kazakh, Russian and foreign languages;

- contribute to the development of information literacy through the mastery and use of modern information and communication technologies in all areas of their lives and activities;
- form the skills of self-development and education throughout life;
- form a personality capable of mobility in the modern world, critical thinking and physical self-improvement;
- evaluate the surrounding reality on the basis of worldview positions formed by knowledge of the foundations of philosophy, which provide scientific understanding and study of the natural and social world by methods of scientific and philosophical knowledge, reveal the meaning of the content and specific features of the mythological-religious and scientific worldview;
- to show a civil position on the basis of a deep understanding and scientific analysis of the main stages, patterns, originality of the historical development of Kazakhstan, to use methods, techniques of historical description to analyze the causes and consequences of events in the history of Kazakhstan;

13	Special	Antimonopoly	7	Know: formation of antimonopoly policy main directions, methods and tools.

		policy of the state		<p>Assessment of the competitive environment in commodity markets. Unfair competition The role of advertising legislation in suppressing unfair competition, the main forms of integration associations; the specifics of state regulation of corporate concentration processes; the specifics of antimonopoly and competition policy</p> <p>Be able to: analyze the effectiveness of the state management system for integration processes; choose the necessary methods of antimonopoly control; assess the impact of management decisions in the antimonopoly sphere and competition policy on the socio-economic development of territories; use scientific and reference literature on management problems.</p> <p>Skills: using various integration process management techniques; planning and control tools in the management process; methods for analyzing the effectiveness of integration process management systems.</p>
14	Special	State Audit Office	7	<p>Know: theoretical and institutional foundations of the organization and functioning of state audit; forms and methods of control and expert-analytical activities; feedback mechanism in the development of state financial control; theoretical and institutional foundations of the organization and functioning of state audit; development of administrative regulations, organization of public services in multifunctional centers, methods and technologies for collecting and analyzing indicators principles of formation of information for the purposes of state audit; trends in the development of state financial control and determine the prospects for its development; algorithm of organizational and managerial activities during control measures;</p> <p>Be able to: work with concepts and categories in the field of state audit, analyze the specifics of the organization and functioning of state audit, justify proposals and recommendations for improving activities based on the conclusions of control and analytical measures; give qualified opinions and advice; analyze problems of state financial control, suggest ways to solve them; summarize and analyze information for the implementation of the goals of control measures and prepare and execute documents based on the results of control, expert-analytical and other activities;</p> <p>Skills: processing and analyzing economic and social data for the purposes of state audit; skills in analyzing law enforcement practices in the field of state audit; standards of control and expert-analytical activities; tools for analyzing theoretical and applied aspects of the development of state audit;</p>
15	Special	Public administration	7	<p>Knowledge of: basic theories and methodologies of public policy and management research; place of public policy and management in the system of political and</p>

				<p>administrative sciences, assessment of the impact of the economic environment on the functioning of organizations and state and local government bodies.</p> <p>Be able to: analyze the system of public administration at various levels; interpret the influence of the political process on public decision-making; apply the methods of specific empirical research in political and administrative sciences, assess the consequences of decisions made</p> <p>Skills: to develop professionally important qualities of a manager; to organize management processes, including the movement of information and business communications in management systems; to build a management system; the ability to implement formal and informal management in practice.</p>
16	Special	State management of foreign economic activity	7	<p>Knowledge of: theory and methodology of public administration in the sphere of foreign economic activity (SE of foreign economic activity); types, types, principles, content and features of SE of foreign economic activity; main forms, mechanisms and tools for implementing state regulatory actions in the field of foreign economic activity and ways to increase their effectiveness; methods and methods of state administration of import and export.</p> <p>Be able to: work with regulatory documents, statistical materials, and economic literature in order to correctly understand and justify decisions made in the field of foreign economic activity management; evaluate the effectiveness of implementing measures of the Foreign Economic Activity Management System and its components; use the knowledge gained in their practical activities when researching and diagnosing problems, forecasts, goals, and situations in the field of foreign economic activity development,</p> <p>Skills: methods of evaluating the effectiveness of decisions in the field of foreign economic activity management at the state and municipal levels; choosing the best options for regulating the state's influence in the field of foreign economic activity in accordance with the country's long-term socio-economic development strategy; making regulatory decisions in the field of foreign economic activity at various economic levels.</p>
17	Special	Managing foreign economic activity	7	<p>Know the essence of foreign economic activity, its content, forms, types and levels, as well as the specifics of the country's foreign economic complex, general characteristics and features of foreign trade transactions and operations, the content and design of foreign trade contracts, the ability to manage organizations, divisions, groups (teams) of employees, projects and networks</p>

				<p>Ability to use modern approaches, methods, management tools, work with regulatory documents, statistical materials, economic literature in order to correctly understand and justify decisions made in the field of foreign economic activity; use the acquired knowledge in their practical activities in the study and diagnosis of problems</p> <p>Skills: methods of building organizational and managerial models, skills of choosing the best options for regulating the state's influence in the field of foreign economic activity in accordance with the strategy of long-term socio-economic development of the country.</p>
18	Special	Local government	8	<p>Know: the main theoretical concepts and modern approaches to local self-government; the main tasks, principles and methods of municipal administration; the content of the main management technologies used by executive authorities; the main directions for improving the effectiveness of local government, the importance of local self-government in the system of people's power, including: the concept and system, basic principles, functions of local self-government, forms of direct democracy.</p> <p>Be able to: use the acquired knowledge in management activities in the process of performing the functional duties of an employee; critically assess the prospects for implementing management technologies in a particular area; justify the principles, approaches, main directions and measures that ensure the effectiveness of municipal administration; correctly conduct a dialogue on topical issues of local government.</p> <p>Skills: conducting a discussion and professional dialogue with the audience; making a reasoned statement of one's own point of view on local government issues; searching and processing information necessary for analyzing problems in the field of municipal administration and preparing proposals for their solution.</p>
19	Special	Project Management	8	<p>Know: the content of the project management concept, the purpose, objectives, principles and basic rules of project management at all stages of their development and implementation; general principles and rules for comprehensive assessment of the effectiveness, feasibility and risks of projects in the pre-investment and investment phases; monitoring basics, composition and methods of collecting and processing information when assessing the progress of projects, analysis and management of project risks; composition and formats of documentation used in the preparation, adoption and execution of decisions on project implementation management, including competitive bidding and procurement, conclusion of contracts; features of project management in the agro-industrial complex;</p> <p>Be able to: collect and analyze information necessary for project planning, forming a</p>

				<p>project management system, as well as for monitoring and evaluating the progress of project implementation; develop and use network schedules, coordination plans, and other documents necessary for project management for monitoring.</p> <p>Skills: possess methods of developing and evaluating project proposals, monitoring the progress of project implementation and managing changes, methods of preparing project estimates, documentation for competitive bidding and contracting, as well as project reporting documentation; information technologies for project management.</p>
20	Special	Professional ethics and management culture	8	<p>To know: the basic rules of professional ethics and methods of business communication in the team; methodological, methodological and practical issues of professional ethics and management culture, and also forms students ' complete system of knowledge about ethical aspects of management, principles of conflict resolution.</p> <p>Be able to: solve problems, assess risks and make decisions in non-standard situations search, analyze and evaluate information necessary for setting and solving professional tasks, professional and personal development; use information and communication technologies to improve professional activities; work in a team and team, ensure its cohesion, communicate effectively with colleagues, management, by consumers.</p> <p>Skills: effective teamwork, organize your own activities, determine methods and methods of performing professional tasks, evaluate their effectiveness and quality;</p>
21	Special	Ethics of public service	8	<p>Know: current problems of professional ethics, ethics of public service, the influence of management culture on the development of the organization, the influence of the manager on the culture of the organization, management culture in public authorities, collection and analysis of information about the culture of the organization, preparation of reports and analytical notes;</p> <p>Be able to: manage an organization in a difficult economic environment, apply business communication techniques in their professional activities; organize their own activities, determine methods and methods of performing professional tasks, and evaluate their effectiveness and quality;</p> <p>Skills: increase the effectiveness of teamwork, organize your own activities, prepare and conduct meetings, business meetings, receptions and presentations;</p>
22	Special	Public asset management	8	<p>Knowledge: analysis of the current state of state asset management, accounting of state assets, analysis of the legislative framework management of state-owned enterprises, management of shares of joint-stock companies and shares of state-owned limited liability partnerships.</p> <p>Be able to: characterize the state asset management system; justify the choice of</p>

				<p>methods for managing state assets; analyze the effectiveness of budget and state asset management using economic tools.</p> <p>Skills: use economic approaches to substantiate management decisions on budgeting and the structure of state assets.</p>
23	Special	Kazakhstan and regional integration processes	8	<p>Know: the main geographical, demographic, economic and socio-political characteristics of the country under study, the main theories of integration; the history of education, the structure and activities of the main organizations and integration associations.</p> <p>Be able to: analyze integration processes and their impact on relations between different countries, taking into account their geographical, demographic, economic and socio-political characteristics</p> <p>Skills: be fluent in the conceptual framework of the history and theory of international relations and international law; basic terms and concepts of theoretical aspects related to the study of international organizations and integration processes in the Republic of Kazakhstan.</p>

Table 2. Sequence of mastering social and professional interaction disciplines

Course	Supporting disciplines	Competencies	Expected results
1	History of Kazakhstan	General education	<p>know: demonstrate knowledge and understanding of the main stages of history development of Kazakhstan</p> <p>Be able to: to correlate the phenomena and events of the historical past with the general paradigm of the world-historical development of human society through critical analysis; be able to objectively and multi-sided comprehend the immanent features of the modern Kazakh model of development</p> <p>Skills: possess the skills of analytical and axiological analysis in the study of historical processes and phenomena of modern Kazakhstan; systematize and critically evaluate historical phenomena and the processes of the history of Kazakhstan</p>
1	Foreign language	General education	<p>Know: lexical minimum and language material of topics and subtopics in a given discipline (social and social and cultural spheres of communication).</p> <p>Be able to: understand by ear not only individual phrases and frequently used words, but also more voluminous statements on topics directly related to it, understand the main content of short simple content on the radio, at the airport, at the station. understand when reading the content of short, simple texts, advertisements, brochures, menus, bus and train</p>

			<p>schedules, short simple personal letters, e-mails. communicate in simple typical situations that require the exchange of information within the framework of familiar topics and activities, be able to talk about family, living conditions, training sessions. write a simple letter of a personal nature, a note, an autobiography.</p> <p>Skills: understanding of foreign language dialogic and monologue speech within the framework of general cultural and professional topics; a foreign language at a level that allows to carry out the main types of speech activity; different ways of oral and written communication; skills of adequate response in situations of everyday, academic and professional communication; skills of listening, reading, writing.</p>
1	Kazakh language/ Russian language	General education	<p>Know: theoretical foundations of the course (language, its functions, forms of speech, text, its features, styles of speech, functional and semantic types of speech); features of dialogic and monologue speech; types of scientific information and the specifics of its implementation in a scientific text; elements of structural-semantic analysis and semantic analysis of a scientific text, components of a speech situation, speaker's intentions.</p> <p>Be able to: to carry out the correct choice and use of language and speech means for solving certain problems of communication and cognition based on knowledge of a sufficient amount of vocabulary, a system of grammatical knowledge, pragmatic means of expressing intentions; compose every day, socio-cultural, official and business texts in accordance with generally accepted norms, functional orientation, using lexico-grammatical and pragmatic material of a certain certification level that is adequate to the goal; interpret the information of the text, explain in the scope of the certification requirements the style and genre specifics of the texts of the socio-cultural, socio-political, official business and professional spheres of communication; participate in communication in various situations in different spheres of communication in order to realize their own intentions and needs (everyday, educational, social, cultural), declaring them ethically correct, meaningfully complete, lexico-grammatically and pragmatically adequate to the situation; discuss ethical, cultural, socially significant issues in discussions, express their point of view, defend it with arguments, critically evaluate the opinion of interlocutors; build speech behavior programs in situations of personal, social and professional communication in accordance with the norms of the language, culture, specifics of the sphere of communication, certification requirements; request and communicate information in accordance with the situation of communication, evaluate the actions and deeds of participants, use information as a tool to influence the interlocutor in situations of knowledge and communication in accordance with certification requirements.</p>

			Skills: the skills of producing oral and written speech in accordance with the communicative goal and the professional sphere of communication; language skills in various situations of everyday, socio-cultural, professional communication; skills of searching, processing information in Russian; types of speech activity.
1	Information and communication technologies (in English)	General education	Know: what economic and political factors contributed to the development of information and communication technologies; features of various operating systems, architecture. Be able to: identify the main trends in the field of information and communication technologies; use information resources to search and store information; work with spreadsheets, perform data consolidation, build graphs; apply information security methods and tools; design and create simple websites; process vector and bitmap images; create multimedia presentations; use the following skills: various platforms for communication; - calculate and evaluate performance indicators of supercomputers; - use various forms of e-learning to expand professional knowledge; use various cloud services. Skills: master database structure development; design and create presentations; receive data from the server; create video files; work with Smart applications; work with services on the e-government website.
1	Sociology	General education	Know: patterns and stages of the historical process, the main historical facts, dates, events and names of world and domestic historical figures; the main events and processes of national history in the context of world history Be able to: critically perceive, analyze and evaluate historical information, factors and mechanisms of historical changes; analyze civil and ideological positions in society, form and improve their views and beliefs, transfer philosophical worldview to the field of material and practical activities; use various philosophical methods to analyze trends in the development of modern society, philosophical and legal analysis Skills: skills of a holistic approach to the analysis of society's problems; methods of philosophical, historical and cultural studies, techniques and methods of analyzing the problems of society; causal relationships in the development of Kazakhstan society; the place of a person in the historical process and the political organization of society; skills of respectful and careful attitude to the historical heritage
1	Politology	General education	Know: the main stages of the development of political knowledge in the history of civilization; schools and directions of modern political science; political life of society; the political system and its institutions; the essence of political processes in the country and the world. Be able to: analyze the features of political systems and the functioning of political

			<p>institutions; critically evaluate the theoretical approaches of political science; identify the interrelationships and patterns of the political process; compare political systems, institutions and actors in the cross-country and subnational context, based on the knowledge gained and the methods mastered.</p> <p>Skills: the skills (gain experience) of working with primary sources on the topics of the course; analysis of regulatory legal acts and other documents; search, processing and analysis of information; solving problems related to the assessment of the political course; working in groups, project activities, business games; public speaking; academic writing. the skills to express their thoughts and opinions in interpersonal and business communication in a foreign language; the skills to extract the necessary information from the original text in a foreign language.</p>
1	Culturology	General education	<p>Know: basic theories of culture, basic concepts of cultural studies; the main directions of the methodology of modern cultural analysis the history of the formation of world culture and civilization, theoretical features of basic cultural concepts, various interpretations of culture and civilization in world and domestic literature; actual problems of the development of modern culture; the idea of culture as a socio-historical phenomenon; patterns of the development of world cultures, as well as the typology of the classification of cultures; basic knowledge about the history of the most important cultures of mankind; about the ways of acquiring, storing and transmitting the basic values of culture - about the diversity and self-worth of various cultures, forms and types of culture, patterns of their functioning and development, the main cultural and historical regions; the history of Kazakh culture, its place in the system of world culture and civilization</p> <p>Be able to: identify the features of this culture, the dominant values in it; explain the specifics of intercultural communication; conduct independent professional activity in a dynamically changing multicultural society; navigate the cultural environment of modern society; explain the phenomenon of culture, its role in human life; navigate cultural issues, independently understand the issues of the influence of cultural factors on the behavior of individuals</p> <p>Skills: practical skills in the preservation and enhancement of national and world cultural heritage; practical skills of practical use of knowledge and skills in taking into account the specifics of cultural behavior of various individuals and collectives in the modern conditions of the formation of civil society in the Republic of Kazakhstan.</p>
1	Psychology	General education	<p>Know: the meaning and place of psychology in the system of sciences; the main directions</p>

			<p>of personality development in modern psychology; personal values and meanings in professional self-determination; the relationship and mutual influence of the psyche and body; techniques and techniques of effective communication.</p> <p>Be able to: interpret basic psychological theories, concepts; use methods and mechanisms of emotion regulation in everyday life; identify patterns of behavior in a conflict situation and conduct self-diagnosis.</p> <p>Skills: determination of individual psychological characteristics of personality, value-semantic representations in professional self-determination of personality; recognition of psychological impact and effective communication.</p>
1/2	Physical training	General education	<p>Know: the role of physical culture in the development and training of a specialist; fundamentals of the state policy of the Republic of Kazakhstan in the field of physical culture and sports; theoretical and methodological foundations of physical culture; the main achievements of the Republic of Kazakhstan in the field of physical culture; hygienic and organizational bases of physical culture and sports.</p> <p>Be able to: use practical skills and abilities in life that ensure the preservation and strengthening of health, development and improvement of psychophysical abilities and qualities; use physical culture, sports and wellness activities to achieve life and professional goals; apply the rules for the safe conduct of physical exercises and sports.</p> <p>Skills: the skills of organizing mass sports competitions; exercises for professional and pedagogical physical training, general physical training, special physical training, as well as apply special games in practice; a system of practical skills that ensure the preservation and strengthening of health, development and improvement of psychomotor abilities and qualities.</p>
1	Fundamentals of market economy and entrepreneurship	General education	<p>Know: to study various scientific theories about the market economy, entrepreneurial activity, to consider the types of entrepreneurial activity, industry, market mechanism. Master various quantitative methods for entrepreneurial calculations, marketing research, analytical calculations and forecasts, master the methodology for calculating general and specific indicators of production and business projects;</p> <p>Be able to: analyze and justify the reality of business plans, Market Segmentation, competently and professionally assess market conditions for organizing your own business, be creative in solving various economic tasks, analyze the economic situation in the field of entrepreneurship and correctly assess qualitative changes in the development of the economy; possess practical skills of independent conduct of Economic Work at the enterprise,</p>

			Skills: mechanisms of the foundations of a market economy and entrepreneurship; basic teachings, concepts and directions of development of a market economy and entrepreneurship; methodology for constructing graphs and schemes illustrating various economic models and types of business plans; directions for assessing economic processes and phenomena; methods for identifying problems of an economic nature in the analysis of actual problems of the modern economy, ways to solve them, taking into account the actions of economic laws at the micro and macro levels.
1	Fundamentals of law and anti-corruption culture	General education	Know: the basic concepts and essence of legal relations, as well as legal mechanisms for regulating legal relations, the procedure for applying responsibility in legal relations, the importance of the principles and culture of academic honesty, the measure of moral and legal responsibility for corruption offenses. Be able to: has an intolerant attitude to corrupt behavior, respects the law and the law; Skills: conducting discussions on legal issues, on the application of norms in the modern period.
1	Economic theory	Economic and organizational-managerial aspects	Know: economic patterns of development of society and problems of its effective functioning at the micro, macro and international levels, the main economic categories in educational and scientific activities; methods of studying economic processes and phenomena; fundamental principles of economic behavior of various subjects; the subject and place of economic theory in the system of economic knowledge; methods of cognition of economic processes; basic concepts and methods of categories of economic science; general fundamentals of economic development; mechanisms of functioning of markets for finished products and resources, formation of factor incomes; the system of national accounts and the main macroeconomic indicators of the national economy; causes of cyclical development of the market economy and its instability; tools and methods of state regulation of the economy.
